Disconnect Switch
4B983

SQUARE D by Schneider Electric

Flange-Mounted Disconnect Switches

Complete kit requires a disconnect switch, handle, and door-closing mechanism.

NONFUSIBLE AND FUSIBLE MECHANISMS

- Include disconnect switch and operating mechanism; handle sold separately

UL 98 Listed and suitable as the main disconnect switch for a control panel. Ship assembled for right-hand operation, but can be easily converted to left-hand with no additional parts.

DOOR-CLOSING MECHANISMS

- Operating mechanism only; disconnect switch and handle sold separately

Primarily for flange-mounted disconnect switches and circuit breaker operating mechanisms, but can be used independently. For small- and medium-size single-door control enclosures.

Schneider Electric

Door-Mount, Nonfusible Load Break Switches

- 3-pole

For applications where motor branch circuit protection is provided upstream of the switch. UL 508 nonfusible load break switches; UL 508 Listed as manual motor controllers. Complete with mounting handle operator, 13" shaft, door interlock plate, and line terminal shroud.

Fiberglass Enclosures

- NEMA 4, 4X, 12, and 13
- IP66

These enclosures are durable in corrosive environments. Compression-molded fiberglass has outstanding chemical- and temperature-resistance, and is easily punched, drilled, filed, or sawed. Gasket assures water-tight and dust-tight seal. Corner latches provide unobstructed access. The continuous hinge provides a secure seal, and double-latching creates added security. Fiberglass material is light-gray inside and out.

J Series Nonmetallic Enclosures

- Fiberglass
- Rated: NEMA 4X, 6P, 12
- Hinged covers

Designed for general electrical and electronic applications and any application that has associated environmental concerns. Built-in mounting capabilities and the strength characteristics associated with a protective wraparound cover. They enhance any instrument installation.

J Series Nonmetallic Enclosures With Window

- Fiberglass
- NEMA 4X, 6P, and 12
- Hinged covers

These enclosures are ideal for general electrical and electronic applications and any applications that are associated with environmental concerns. They feature window and built-in mounting capabilities with the strength characteristics associated with a protective wraparound cover.

STAHLIN

DuraBoxx® Series Nonmetallic Enclosures

- Fiberglass
- NEMA 4X, 6P, and 12
- Screw-on covers

Designed for durable performance in both commercial and industrial indoor and outdoor environments like mining, oil, gas, wastewater treatment, and petro-chem. Sleek design with shallow depths and flush cover construction makes them well suited for high-end electronic applications like wireless communications and operator interfaces.

Enclosure Air Conditioners—NEMA 12 and 4X

RITTAL

- Adjustable temp. setpoint: 68° to 131°F (except 2PUX6 and 2PUX7)
- Status display includes enclosure temperature
- Terminal-block connection

Condenser coil is coated to stay cleaner for consistent performance even in harsh environments. Feature icing protection, startup delay, and connection for a door limit switch. Side-mount models feature air inlets and outlets positioned for optimal heat dissipation.

Wall-mount units greater than 3600 BtuH and all top-mount units have an integrated condensate evaporator. Roof-mount models feature 4 cold-air outlets and a central hot-air inlet.

2PUX6 and 2PUX7 have basic display and controls with overtemperature alarm, and can only be set down to 86°F. All others feature configurable alarm, logging capability, master-slave operation for up to 10 units. 3-phase units include phase monitoring.

HUBBELL WIEGMANN

Enclosure Heaters

1ZHC1

- Anodized, extruded aluminum body
- 35mm DIN rail clip count

Heaters maintain minimum temperatures in enclosures and help prevent condensation.

WARNING: Do not mount on wooden structures. Avoid placement near heat-sensitive components.

RADIANT (15 TO 150W)

Positive temperature coefficient heaters maintain stable enclosure temperatures, promoting reliable performance and extending component life. Fitted with push-type terminal connections. Black color. Class 1 Protection; tested for grounding at 1600V.

Wiring Ducts

- 72-in length
- PVC material

Troughs route and organize short runs of wire and cable in tight spaces. They provide a neat appearance for wiring and allow for configuration changes. They often have fingers on the sides that create slots for cables to be added, removed, or rerouted. Wiring ducts are commonly mounted inside electrical enclosures, control panels, and machines.

Cablofil Wire Mesh Cable Trays

- Lightweight steel

Mesh cable trays allows air to flow through to keep cable ventilated and cool. Also known as basket trays, wire mesh trays may be cut or bent in configurations like curves, slopes, and tees to accommodate complex cable runs. Trays mount on walls, overhead, or under floors in whole-facility installations, and they're ideal for hiding cable in spaces without paneled ceilings.

Cable Ladder Trays

- 4" load depth
- 5¼" side rail height

Rigid aluminum trays have high load capacity and resist stress, camber, and warping. Flange-out side rails ease cable installation. Splice plates are slightly curved, for a spring-fit on straight sections or contour-fit on fittings. Meet NEMA VE1. Include splice plates and mounting hardware.

OFR Series

legrand

1500, 2600, and OFR Series Steel Overfloor Raceways

They have a low profile that prevents tripping while keeping wire and cable concealed. Raceways are often installed in open areas like office conference rooms and halls. Individual components in raceway systems must be purchased from the same brand and series to ensure compatibility.

Prewired Outlet Raceways Strips

Brings power to new spaces or modify wiring in existing areas. They're prewired and include multiple outlets, so they don't require installing separate wiring, raceway, or outlet components. Strips surface-mount on walls and hardwire to existing electrical systems or larger raceway systems.

Outlet Power Poles

- 2 channel
- 5-20R NEMA outlets

Bring power and communications wiring from the ceiling down to workstations and equipment. They're ideal when there isn't a wall nearby to bring in a surface-mounted raceway. They're typically placed in offices, manufacturing facilities, and labs.

Cast Device Boxes and Covers

Boxes feature accurately tapped and tapered threads for tight, rigid joints and ground continuity. A smooth, rounded integral bushing in each hub protects conductor insulation. Openings provide room to make splices and for general maintenance. Accommodate wiring devices like switches and receptacles. Corrosion resistant. Covers for Dry and Wet Locations mount directly on box. Covers for Wet Locations feature a gasket that seals around the plug to keep dirt and moisture out.

While-In-Use Weatherproof Covers

Snap-fit design speeds installation. Padlockable. Corner drill points for box mounting. All have easy-to-remove cordset exit ports and adhered gasket. Single-gang has 16 possible configurations. Double-gang has 70 possible configurations. All are UL Listed and CSA Certified for wet locations while in use [NEC Article 406.8(B)]. Extra-Duty rated models (XD Suffix) comply with NEC requirements [NEC Article 406.9(B)(1)] for extra-duty applications and wet locations.

Weatherproof Outlet Covers

HUBBELL TAYMAC

NEMA 3R covers install quickly using the Quick-Fit keyhole mounting system.

Plastic in-use covers can be custom-fit with Knock-Out technology. Durable high-impact polycarbonate construction features attached gasket and lockable tab. Include mounting hardware. 38R662 to 38R664 and 38R666 are deep design.

Metal in-use covers feature commercial-quality die-cast metal construction that meets or exceeds extra-duty specifications. Lockable open or closed. Universal-Fit technology with included gasket and mounting hardware.

All are UL Listed.

Stainless Steel Outlet Boxes and Covers

Calbrite™
Stainless Steel Conduit Systems

These boxes and covers are designed to be used in wiring devices, such as switches and receptacles. 316 stainless steel, and polished with standard "brite" finish to increase corrosion resistance. Feature machined standard NPT threads. Internal grounding screw included and manufactured with mounting feet.

Traditional Flush Floor Boxes

Satisfy a variety of office, retail, and commercial applications. Feature Scrubshield™ gasketing technology to exceed UL scrubwater exclusion requirements. Floor boxes are fully adjustable for height and leveling. Cast-iron and nonmetallic floor boxes provide corrosion resistance for slab-on-grade applications.

Multiservice Flush Floor Boxes and Fire-Rated Poke-Throughs

- Floor box is for min. 3" to 5" concrete pours, depending on application subplate
- Poke-throughs are for use in concrete floors from 2¼" to 7" thick
- 4" core hole

SystemOne floor box and fire-rated poke-throughs use a universal cover and various application subplates for consistent aesthetics.

Round, flush, nonmetallic floor box has a 1½" data conduit hub for higher capacity and bend radius suitable for Cat 6/6a, coax, and fiber cables. PVC construction can be saw-cut for easy after-pour adjustment.

Poke-throughs expand during a fire to create a fire seal and prevent heat transfer. Step-down clips allow removal from above. UL Listed for use in 1- to 4-hr. rated floors.

Universal cover with Scrubshield™ gasketing technology exceeds UL 514A scrubwater exclusion requirements.

Metal Conduit, Elbows, and Nipples

UL Listed.

Electrical Metallic Tubing (Thin Wall)—Unthreaded metallic tubing provides easy bending, cutting, and joining. Resists flattening, kinking, and splitting to help create smooth continuous raceways for faster wire pulling.

Intermediate Metal Conduit (IMC)—Threaded conduit (unless noted) is as strong as rigid conduit, and weighs up to 30% less. Suitable for use in hazardous locations. Larger interior diameter enables faster wire pulling.

Rigid Steel Conduit (GRC) (Heavy Wall)—Threaded conduit resists impact and provides radiation protection and magnetic shielding.

Rigid Aluminum Conduit—Approximately ⅓ the weight of rigid steel conduit. Resists most corrosive atmospheres; won't leave discoloring stains or streaks. Cuts, bends, and threads easily without special tools.

Conduit Bodies

- For a NEMA 3 seal, use with cover and neoprene gasket (both sold separately) except as noted

Provides access to conductors for pulling, splitting, and maintenance. Flat-back design increases wiring capacity and mounting stability. Covers include stainless steel screws. Larger sizes available on Grainger.com®.

RACO ALUMINUM

Durable die-cast aluminum construction with premium powder-coated finish. Combination head screw and stamped aluminum cover (sold separately).

APPLETON ELECTRIC ALUMINUM

Provide greater cubic content for easier wire pulling, and additional room for splicing. Fit flush and snug against flat surfaces for stable installation.

POWER FIRST® IRON

Features chrome powdered finish with zinc-plating for corrosion resistance. Works with Raco gaskets.

KILLARK® 5 ALUMINUM

Tapered threaded hubs. Raintight when used with gasketed covers. Use with the same gasket as Duraloy 5.

KILLARK® DURALOY®5 IRON

Excellent for high-abuse areas. Suitable for concrete burial. Duraloy® tricoat finish provides superior corrosion protection.

KILLARK DURALOY®7 GRAY IRON

Spring-clip cover ensures easy installation. Duraloy® tricoated finish provides superior corrosion protection. Smooth, integral wire bushings to protect against damage while wire-pulling.

KILLARK DURALOY®8 GRAY IRON

Flat back design provides greater cubic capacity for easier wire pulling and more room for splicing and maintenance. Feature interchangeable competitive bodies, gaskets, and covers with smooth integral wire bushings.

CALBRITE™ STAINLESS STEEL

Designed to connect and change direction of conduit runs; can also be used as pulling fittings. Feature 316 stainless steel construction polished with standard "brite" finish to increase corrosion resistance and aesthetic appearance.

Scan. Order. Done.

Strut Clamps, Attach Conduit or Cable to Standard Strut Channels; Unique 1-pc. Design Eliminates Handling of Hardware				
⅜" EMT, Saddle	B1506S	**4RHF2**	SCH6B	**2KWU9**
½" EMT, 200-lb. Rating	B1508	**4RHF3**	SCH8	**2KWU5**
½" EMT, 200-lb. Rating, Saddle	B1508S	**4RHF4**	SCH8B	**2KWV1**
¾" EMT, 200-lb. Rating	B1512	**4RHF5**	SCH12	**2KWU6**
¾" EMT, ½" Rigid, 200-lb. Rating, Saddle	B1512S	**4RHF6**	SCH12B	**2KWV2**
1" EMT, ¾" Rigid, 300-lb. Rating	B1516	**4RHF7**	SCH16	**2KWU7**
1" EMT, ¾" Rigid, 300-lb. Rating, Saddle	B1516S	**4RHF8**	SCH16B	**2KWV3**
1¼" EMT, 1" Rigid, 300-lb. Rating	B1520	**4RHF9**	SCH20	**2KWU8**
1¼" EMT, 1" Rigid, 300-lb. Rating, Saddle	B1520S	**4RHG1**	SCH20B	**2KWV4**
1½" EMT, 1¼" Rigid, 400-lb. Rating, Saddle	B1524S	**4RHG2**	SCH24B	**2KWV5**
2" EMT, 1½" Rigid, 400-lb. Rating, Saddle	B1532S	**4RHG3**	SCH32B	**2KWV6**
2½" EMT, 2½" Rigid, 400-lb. Rating, Saddle	B1540S	**4RHG4**	SCH48B	**2KWV7**
3" EMT, 3" Rigid, 400-lb. Rating, Saddle	B1548S	**4RHG5**	SCH56B	**2KWV8**
4" EMT, 4" Rigid, 400-lb. Rating, Saddle	B1564S	**4RHG6**	SCH72B	**2KWV9**
Conduit Hangers for EMT or Rigid Conduit, Include Captive Bolt and Built-In Nut; 400-lb. Rating				
½"	BL1400	**4RHZ3**	CD0B	**2KWP4**
¾"	BL1410	**4RHZ4**	CD1B	**2KWP5**
1"	BL1420	**4RHZ5**	CD2B	**2KWP6**
2"	BL1450	**4RHZ6**	CD5B	**2KWP7**
EMT and Rigid Snap-Close Conduit Clips, Load Rating: 100 lb. for Vertical; 25 lb. for Horizontal				
½" and ¾" Conduit with ¼" Hole	BG-8-12	**4RHV2**	812M	**2KWP2**
½" and ¾" Conduit with ¼" Thread Impression	BG-8-12-4T	**4RHV3**	—	—
EMT and Rigid Snap-Close Conduit Clips to Stud Fastener				
⅜" Conduit and MC/AC Cable	BG-6-B5	**4RHU7**	—	—
½" and ¾" Conduit	BG-8-12-B5	**4RHV6**	812MF	**2KXB7**
1" Conduit	BG-16-B5	**4RHT4**	16MF	**2KXB5**
EMT and Rigid Snap-Close Conduit Clips with Hammer-On Edge Clip Fastener				
⅜" Conduit/Cable, ⅛ to ¼" Beam Thickness	BG-6-E-2-4	**4RHU8**	—	—
½" and ¾" Conduit, ⅛ to ¼" Beam Thickness	BG-8-12-E-2-4	**4RHV8**	812M24SM	**2KWP9**
½" and ¾" Conduit, 5⁄16 to ½" Beam Thickness	BG-8-12-E-5-8	**4RHV9**	812M58SM	**2KWR2**
1" Conduit, ⅛ to ¼" Beam Thickness	BG-16-E-2-4	**4RHT5**	16M24SM	**2KWR5**
1¼" Conduit, ⅛ to ¼" Beam Thickness, Side Support	BG-20-E-2-4	**4RHT9**	20M24SM	**2KWR8**
1¼" Conduit, ⅛ to ¼" Beam Thickness, Bottom Support	BG-20-U-2-4	**4RHU1**	20M24	**2KWR7**
1½" Conduit, ⅛ to ¼" Beam Thickness, Side Support	BG-24-E-2-4	**4RHU2**	24M24SM	**2KWT1**
1½" Conduit, ⅛ to ¼" Beam Thickness, Bottom Support	BG-24-U-2-4	**4RHU3**	24M24	**2KWR9**
2" Conduit, ⅛ to ¼" Beam Thickness, Side Support	BG-32-E-2-4	**4RHU4**	32M24SM	**2KWT3**
2" Conduit, ⅛ to ¼" Beam Thickness, Bottom Support	—	—	32M24	**2KWT2**
EMT and Rigid Snap-Close Conduit Clips with Hammer-On Universal Beam Fastener				
⅜" Conduit, 5⁄16" to ½" Beam Thickness	BG-6-U-5-8	**4RHV1**	6M58	**2KWT6**
⅜" Conduit, ⅛ to ¼" Beam Thickness	BG-6-U-2-4	**4RHU9**	6M24	**2KWT4**
½" and ¾" Conduit, ⅛ to ¼" Beam Thickness	BG-8-12-U-2-4	**4RHW7**	812M24	**2KWP8**
½" and ¾" Conduit, 5⁄16 to ½" Beam Thickness	BG-8-12-U-5-8	**4RHW8**	812M58	**2KWR1**
½" and ¾" Conduit, 9⁄16 to ¾" Beam Thickness	BG-8-12-U-9-12	**4RHW9**	812M912	**2KWR3**
1" Conduit, ⅛ to ¼" Beam Thickness	BG-16-U-2-4	**4RHT7**	—	—
1" Conduit, 5⁄16 to ½" Beam Thickness	BG-16-U-5-8	**4RHT8**	16M58	**2KWR6**
Bat Wing Conduit/Cable Hanger, Max Load: 50 lb. for Wire/Rod; 25 lb. for Vertical Flange; 100 lb. for Horizontal Flange				
Fits #12 Wire through ¼" ATR	BW2	**4RJD3**	4Z34	**2KWU4**
14/2 to 12/2 Cable Support	BW4	**4RJD5**	KX	**2KWU2**
½" EMT Support	BW-8	**4RJD6**	K8	**2KWT7**
¾" EMT and ½" Rigid Conduit Support	BW-12	**4RJD1**	K12	**2KWT8**
1" EMT and ¾" Rigid Conduit Support	BW-16	**4RJD2**	K16	**2KWT9**
1¼" EMT and 1" Rigid Conduit Support	BW-20	**4RJD4**	K20	**2KWU1**
Cable Flange Clip Supports				
0.42 to 0.70" dia. Cable, Up to 5⁄32" Flange	BX9	**4RJE5**	449	**2KWX3**
0.444 to 0.560" dia. Cable, 1⁄16 to 5⁄32" Flange	BXS-1214	**4RJE8**	SC2D	**2KWX4**
0.444 to 0.560" dia. Cable, 5⁄32 to 9⁄32" Flange	BXM-1214	**4RJE6**	SC4D	**2KWX6**
0.444 to 0.718" dia. Cable, 5⁄32 to 9⁄32" Flange	BXM-1519	**4RJE7**	SC4E	**2KWX7**
0.500 to 0.718" dia. Cable, 1⁄16 to 5⁄32" Flange	BXS-1519	**4RJE9**	SC2E	**2KWX5**
Cable Clips and Support Brackets				
2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Cable Clip	BX4M	**4RJD8**	MAC2	**2KWW1**
2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Cable Clip for T-Bar Ceilings	BX4M-A6	**4RJD9**	MAC2ATA	**2KWW3**
2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Hammer On Cable Clip for Flanges ⅛" to ¼"	—	—	MAC224	**2KWW2**
Multiple Conduit Mounting Plate, Holds up to 3 Conduit Clips	—	—	SBT18	**6PFP7**
Flared Edges Prevent Damage to the Cable Jacket	—	—	CER4	**6PFP3**
Nonmetallic Cable Support Bracket, Secures Cable to Wood Studs	BRC1	**4RJC1**	CG4	**2KXC2**
Conduit and MC/AC Cable Support Bracket, For 1½" Deep Boxes, Attach Cable or ½ to ¾" EMT	BB38	**4RHJ8**	CS812	**2KXB9**
Conduit and MC/AC Cable Support Bracket, For 2⅛" Deep Boxes, Attach Cable or ½ to 1" EMT	BB38D	**4RHJ9**	CS812D	**2KXC1**
Nonmetallic Cable and FMC Support Bracket, Secures Up To ¾" FMC to Metal or Wood Studs	—	—	CJ6	**2KXC3**
Combination Outlet Box and Conduit Mounting Bracket; Mounts 4" Square Box and ½" to ¾" Conduit (Except No. 4RHT6 is 1")				
Combination Support Bar with Center Hole	BG812-S18	**4RHW2**	812MB18A	**2KWW9**
Combination Support Bar with ¼" Threaded Stud	BG812-S18S	**4RHW3**	812MB18S	**2KWW6**
Combination Support Bar with Bat Wing	BG812-S18-W6	**4RHW6**	812MB186	**2KWW5**
Combination Support Bar with Hammer On Beam Clamp for ⅛" to ¼" Flange	BG812-S18-U24	**4RHW4**	812MB1824	**2KWW7**
Combination Support Bar with Bat Wing	BG812-S18-W2	**4RHW5**	—	—
Combination Support Bar For 1" Conduit Using Plain Center Hole for Screw or Threaded Rod	BG16-S18	**4RHT6**	—	—
Outlet Box Mounting Brackets				
Telescoping Box Mounting Bracket, 11 to 18" Stud Spacing	BB2-16T	**4RHJ5**	TSGB16	**2KXA9**
Telescoping Box Mounting Bracket, 15½ to 26" Stud Spacing	BB2-24T	**4RHJ6**	—	—
Telescoping Box Mounting Bracket, 17 to 26" Stud Spacing	—	—	TSGB24	**2KXB1**
Single Side Box Mounting Bracket, 2½" and 3½" Stud Depth	BB4-23	**4RHK2**	—	—
Single Side Box Mounting Bracket, 2½", 3½", and 4" Stud Depth	BB4-4	**4RHK3**	—	—
Single Side Box Mounting Bracket, 2½", 3½", 5½", and 6" Stud Depth	BB4-6	**4RHK4**	—	—
Electrical Box, Supports 35 to 50 Pounds with a Single Brace	—	—	512HDFM35	**6PFN9**
Electrical Box, Supports 70 to 90 Pounds with a Double Brace	—	—	512HDFM70	**6PFP0**
Box Support, Prevents Box from Pushing Away From Drywall	—	—	766PM	**6PFP1**
Multiple Box Mounting Bracket, 16" Stud Spacing, Mounts up to 3 Outlet Boxes	BB8-16	**4RHK6**	RBS16	**2KXA7**
Multiple Box Mounting Bracket, 24" Stud Spacing, Mounts up to 4 Outlet Boxes	BB8-24	**4RHK7**	RBS24	**2KXA8**
Adjustable Far-Side Support Clip for Outlet Boxes, Suitable For 2½", 3½", and 4" Stud Depth	BB12	**4RHJ2**	—	—
Wiring Device Retainer, Adds Rigidity in Oversize Wall Openings	BB32	**4RHJ7**	RLC	**2KXD1**
T-Bar Ceiling Box Mounting Bracket for 4" or 4 11⁄16" Boxes, 1½" or 2⅛" Deep, 50-lb. Rating	BA50	**4RHH5**	512HD	**2KXK7**
T-Bar Ceiling Box Mounting Bracket, Adj. from 1½" to 8¾" Height, 25 lb. Rating	BA50A	**4RHH6**	512A	**2KXK6**
T-Bar Ceiling Preassembled Fan Mounting Kit, 70-lb. Rating	BA50F	**4RHH7**	—	—
Nail Protection Plate, Press On, Protects Electrical and Plumbing, For Metal or Wood Studs	—	—	304B2	**2KXA3**
Self Tapping Screw, Mounts Boxes or Brackets to Metal Studs, Low Profile Head, Pkg. of 100	—	—	SMS8	**2KXA4**
1 Gang, Mounting Plate for Class 2 Low Voltage Devices in ¼ to 1¼" Drywall	—	—	MPLS	**2KXD5**
Fixture Hanger, Side Mount, Supported from S-Hooks and Jack Chain, 50 lb. Limit	—	—	LFC	**2KXK1**
Fixture Hanger, Top Mount, Supported from S-Hooks and Jack Chain, 50 lb. Limit	—	—	LFC90	**2KXK2**
Electrical Box Hanger, Dual Height, Snaps Onto Ceiling T-Bar, Load Limit 20 Lbs., Pkg. of 10	—	—	512	**2KXK5**
Box Support, Ideal For Supporting and Positioning 4" Square or 4 11⁄16" Electrical Boxes	—	—	TSRBS1625	**6PFR2**
Bracket for 1 or 2 Gang Mud Rings, Mounts Plaster Rings for Low Volt App., 3.51" D	—	—	C23	**52JH49**
Bracket for 1 or 2 Gang Mud Rings, Mounts Plaster Rings for Low Volt App., 3.89" D	—	—	C4	**52JH51**

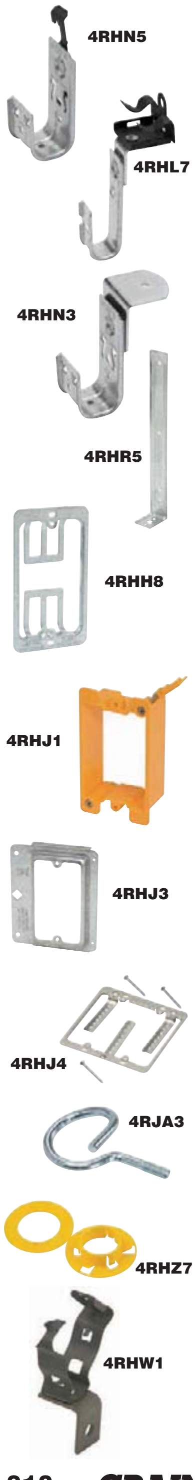
EATON B-Line series

nVent CADDY

Conduit and Cable Clamps, Hangers, and Clips



Description	B-LINE BY EATON Mfr. Model	B-LINE BY EATON Item No.	NVENT CADDY Mfr. Model	NVENT CADDY Item No.
KwikWire™—Adjustable Wire Rope System; Replaces Jack Chain or ATR for Support				
KwikWire™ Clamps For ⅛" or 3/16" Wire Rope	BKC200	**4RHY3**	—	—
KwikWire™ 1/16" Wire Rope, 500-ft. Spool, 75-lb. Rating When Used with BKC100 Clamps	BKW063	**4RHY8**	—	—
KwikWire™ 3/32" Wire Rope, 500-ft. Spool, 150-lb. Rating When Used with BKC100 or BKC150 Clamps	BKW094	**4RHY9**	—	—
KwikWire™ ⅛" Wire Rope, 500-ft. Spool, 250-lb. Rating When Used with BKC150 or BKC200 Clamps	BKW125	**4RHZ1**	—	—
KwikWire™ 3/16" Wire Rope, 250-ft. Spool, 640-lb. Rating When Used with BKC200 Clamps	BKW188	**4RHZ2**	—	—
KwikPak™ Dispenser Box - Includes 100 Clamps (No. 4RHY1) and 500-ft. Spool (No. 4RHY8), 75-lb. Rating	BKP10063	**4RHY5**	—	—
KwikPak™ Dispenser Box - Includes 100 Clamps (No. 4RHY2) and 500-ft. Spool (No. 4RHY9), 150-lb. Rating	BKP10094	**4RHY6**	—	—
KwikPak™ Dispenser Box - Includes 50 Clamps (No. 4RHY3) and 250-ft. Spool (No. 4RHZ1), 250-lb. Rating	BKP20125	**4RHY7**	—	—
KwikWire™ Wire Rope Cable Cutter	BKCC	**4RHY4**	—	—
Acoustical T-Bar Ceiling Fasteners				
T-Bar Support Clip, Allows for Independent Support of Fixtures, 65-lb. Rating, Fits 15/16" T-Bar, Stud Size ¼" x ⅝"	BA1	**4RHG7**	IDS	**2KXJ6**
T-Bar Support Clip, Allows for Independent Support of Fixtures, 65-lb. Rating, Fits 9/16" T-Bar, Stud Size ¼" x ⅝"	BA1-95	**4RHH1**	—	—
T-Bar Twist Fastener, Supports Electrical Boxes from 15/16" T-Bar with ¼" x ⅝" Stud, 50-lb. Rating, Black Finish	BA-4-16	**4RHH4**	4G16	**2KXJ9**
T-Bar Twist Fastener, Supports Electrical Boxes from 15/16" T-Bar with #8 x ⅝" Stud, 25-lb. Rating, White Finish	BA-2-16-W	**4RHH2**	4G8WH	**2KXJ8**
Drop Wire Clip for #12 to #8 Wire Prevents Sway of Dedicated Electrical Drop Wire	BA311	**4RHH3**	—	—
Conduit T-Bar Clip Attaches ½ and ¾" Conduit to T-Bar	BG-8-12-A6	**4RHV4**	—	—
Hurricane Clip Troffer Fastener Provides Positive Support for Troffers and Lay-In Light Fixtures	BA15	**4RHG9**	515	**2KXJ4**
Beam Clamps				
Hammer-On Beam Clamp, Provides ¼"-20 Thread to Hang Electrical Boxes, 75-lb. Rating, ⅛" to ¼" Flange	BU-2-4	**4RJC6**	M24	**2KWY7**
Hammer-On Beam Clamp, Provides ¼"-20 Thread to Hang Electrical Boxes, 5/16" to ½" Flange	BU-5-8	**4RJC8**	M58	**2KWY9**
Hammer-On Beam Clamp, Provides ¼" Stud to Hang Electrical Boxes, 100-lb. Rating, ⅛" to ¼" Flange	BU-2-4-S	**4RJC7**	M24S	**2KWY8**
Hammer-On Beam Clamp, Provides ¼" Stud to Hang Electrical Boxes, 5/16" to ½" Flange	BU-5-8-S	**4RJC9**	M58S	**2KWZ1**
Standard Beam Clamp, 100-lb. Rating, Up to ½" Flange	BC1	**4RHK8**	BC	**2KWY1**
Standard Beam Clamp, 100-lb. Rating, Up to ½" Flange with ½" and ¾" Conduit Clip	BG-8-12-C2	**4RHV7**	BC812M	**2KWY2**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., 1/16" to ⅛" Flange	BE-1-2	**4RHR6**	2H4	**2KWY3**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., ⅛" to ¼" Flange	BE-2-4	**4RHR7**	4H24	**2KWY4**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., 200-lb. Rating, 5/16" to ½" Flange	BE-5-8	**4RHR8**	4H58	**2KWY5**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., 200-lb. Rating, 9/16" to ¾" Flange	BE-9-12	**4RHR9**	4H912	**2KWY6**
Iron, ⅛ in to 5/16 in Jaw Opening, For Use With ⅜ in Threaded Rod, 250 lb Load Rating	—	—	CRLB37EG	**6PFR4**
Wall Mount Cable Hooks, 30-lb. Rating				
¾" Cable Hook	BCH12	**4RHK9**	CAT12	**2KXD7**
1 5/16" Cable Hook	BCH21	**4RHN1**	—	—
2" Cable Hook	BCH32	**4RHN6**	—	—
4" Cable Hook	BCH64	**4RHR1**	—	—
Cable Hook/Beam Clamp Assemblies, 30-lb. Rating				
¾" Hook, Up to ½" Flange Thickness	BCH12-C2	**4RHL2**	CAT12BCB	**2KXE4**
1 5/16" Hook, Up to ½" Flange Thickness	BCH21-C2	**4RHN2**	—	—
2" Hook, Up to ½" Flange Thickness	BCH32-C2	**4RHN9**	—	—
4" Hook, Up to ½" Flange Thickness	BCH64-C2	**4RHR2**	—	—
Cable Hook To Wire/Rod Assemblies, 30-lb. Rating				
¾" Hook, #12 Wire to ¼" Rod	BCH12-W2	**4RHL8**	CAT124Z34	**2KXE9**
1 5/16" Hook, #12 Wire to ¼" Rod	BCH21-W2	**4RHN5**	—	—
2" Hook, #12 Wire to ¼" Rod	BCH32-W2	**4RHP8**	—	—
Cable Hook/Hammer-On Beam Clamp Assemblies, 30-lb. Rating				
¾" Hook, ⅛" to ¼" Flange Thickness	BCH12-U-2-4	**4RHL7**	CAT1224	**2KXE8**
1 5/16" Hook, ⅛" to ¼" Flange Thickness	BCH21-U-2-4	**4RHN4**	—	—
2" Hook, ⅛" to ¼" Flange Thickness	BCH32-U-2-4	**4RHP6**	—	—
4" Hook, ⅛" to ¼" Flange Thickness	BCH64-U-2-4	**4RHR4**	—	—
Cable Hook/Angle Bracket Assemblies, 30-lb. Rating				
¾" Hook to ¼" Threaded Rod	BCH12-RB	**4RHL6**	CAT12AB	**2KXF2**
1 5/16" Hook to ¼" Threaded Rod	BCH21-RB	**4RHN3**	—	—
2" Hook to ¼" Threaded Rod	BCH32-RB	**4RHP5**	—	—
4" Hook to ¼" Threaded Rod	BCH64-RB	**4RHR3**	—	—
Angle Bracket Hanger, 180-lb. Rating, Supports up to 3 Cable Hooks per Side	BCH-HBA	**4RHR5**	CATHBA	**2KXE2**
Cable and Conduit Brackets				
Cable Bracket, Fits 0.430 to 0.560" MC/AC Cable up to 4 Runs, 50-lb. Rating	BRC5-1	**4RJC4**	MCS50	**2KWX8**
Cable Bracket, Fits 0.430 to 0.560" MC/AC Cable up to 9 Runs, 50-lb. Rating	—	—	MCS100	**2KWX9**
Staple-Lok Cable Support, Fits up to ½" OD Cable	—	—	CJ6S	**2KXC4**
Cable Bracket, Fits 14/2 to 10/3 AWG Cable, Supports Horizontal Runs Of MC/AC/FMC Cable Through Metal Studs	—	—	459	**2KXC7**
Low Voltage Cover Plate Mounting Brackets—Replace Electrical Box In Class 2, Low Voltage Outlets				
Single-Gang Old Work Support Bracket	BB10	**4RHH8**	MP1	**2KXD4**
Single-Gang Old Work Support Bracket, Plastic Design	BB10P	**4RHJ1**	MP1P	**2KXD2**
Single-Gang New Work Support Bracket	BB15	**4RHJ3**	MP1S	**2KXB2**
2-Gang Old Work Support Bracket with Screws	BB20L	**4RHJ4**	MPLS2	**2KXD6**
Bridle Rings				
¾" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-12-T	**4RJA2**	2BRT12	**2KXH4**
1¼" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-20-T	**4RJA4**	2BRT20	**2KXH5**
1¼" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-20-4T	**4RJA3**	4BRT20	**2KXH6**
2" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-32-T	**4RJA8**	2BRT32	**2KXH8**
2" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-32-4T	**4RJA6**	4BRT32	**2KXH9**
4" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-64-4T	**4RJA9**	4BRT64	**2KXJ2**
1½" Bridle Ring, ¼" Lag Screw for Wood Beams, 50-lb. Rating	BR-24-4W	**4RJA5**	—	—
2" Bridle Ring, ¼" Lag Screw for Wood Beams, 50-lb. Rating	BR-32-4W	**4RJA7**	4BRT32WS	**2KXJ1**
Miscellaneous				
Flange Clip to Support Wire, Rod, S-Hooks, or Bolting Straps, 1/16" to ¼" Vertical Flange, 160-lb. Rating	BF3	**4RHT2**	VF14	**2KWZ2**
Flange Clip to Support Wire, Rod, S-Hooks, or Bolting Straps, 1/16" to ¼" Z-Purlin Flange, 160-lb. Rating	BF4	**4RHT3**	AF14	**2KWZ3**
Angle Bracket Attachment, Attaches #8 Wire or ¼" Plain Rod to Ceiling, 160-lb. Rating	BH1-H7	**4RHX4**	708AB	**2KWZ5**
Angle Bracket Attachment, Attaches ¼" ATR or Stud to Ceiling, 160-lb. Rating	BH4-H7	**4RHX6**	4TIB	**2KWZ4**
Rod Attachment with Hammer-On Beam Clamp, ⅛" to ¼" Flange, 160-lb. Rating, Attaches ¼" ATR or Stud	BH4-E-2-4	**4RHX5**	4TI24	**2KWX1**
Rod Attachment with Hammer-On Beam Clamp, ⅛" to ¼" Flange, 160-lb. Rating, Attaches ⅜" ATR or Stud	BH6-E-2-4	**4RHX7**	—	—
Metal Stud Grommet, Provides 360° Protection, Universal Design Fits All Factory Punched Metal Stud Holes	BM2	**4RHZ7**	ESG1	**2KXC6**
Conduit and Cable Antirattle Support for FMC, EMT or ENT Conduit Size up to 1" Dia.	—	—	781	**2KXC9**
Angle Bracket, 0.281 Dia. Holes, 25-lb. Rating	BH7	**4RHX8**	AB	**2KXL2**
Signal Reference Grid Wire Clamp, Attaches #8 to #4 AWG Stranded Wire to ¾ to 1" Round or Square Computer Floor Posts	BM5	**4RHZ9**	RGC	**2KXL3**
Cable to Drop Wire Hanger, Fits 0.375 to 0.706" MC/AC Cable, ⅜" FMC, or ½" EMT, 20-lb. Rating	—	—	PCS1	**2KWU3**
Conduit Angle Bracket, Supports Horizontal Runs of ½ or ¾" EMT/Rigid/ENT Conduit Through Metal Studs	BG-8-12-H7	**4RHW1**	—	—
S Hook, #11 Gauge, 29-lb. Rating; For Support of Lighting, Speakers and Other Fixtures	BH10	**4RHX1**	771	**2KXK4**

Beam Clamps

Superstrut | Calbrite Stainless Steel Conduit Systems

Beam clamps suspend threaded rod from a metal beam, steel girder, or strut channel. The rod can then connect to conduit or a pipe hanger to support conduit runs.

Thread Size	Load Capacity	Jaw Opening	Material	Brand	Item No.

PVC Conduit and Fittings

Rust- and corrosion-resistant and easy to install. Belled end eliminates the need for special coupling. May be used in underground applications. Schedule 40 can be used in walls, floors, and ceilings under NEC Article 352. Schedule 80 is for above-ground and entrance applications. Schedule 40 and Schedule 80 conform to UL 651; Fed. and Mil. Spec. compliant.

Liquid-Tight Flexible Conduit

Built for a variety of applications ranging from computer room floors to high-temperature areas.

SERIES 160

Built with a circular cross section with a smooth, corrugated flame-resistant polyvinyl chloride (PVC) inner surface and integral reinforcing member within the conduit wall. Used to help protect insulated wire in assemblies or consoles of electrical apparatus.

SERIES 6000

Designed for use in wet, dry, or oily locations as a flame-resistant, nonmetallic raceway for power, control, and communications cables.

SERIES 6100

Designed for use in specific applications where Underwriters Laboratories (UL) or other agency approvals are not required, but flexibility is.

SERIES 6200

Designed for use in wet, dry, or oily locations as a flame-resistant, galvanized steel core raceway for power, control, and communications cables.

SERIES 6400

Offered in Data Comm blue and designed for use as a raceway for power, control, and communication cables.

SERIES 6500

Designed for use in wet, dry, or oily locations as a flame-resistant, nonmetallic raceway for power, control, and communications cables where repetitive motion and constant flexing is required. Ideal for applications where abrasion and physical abuse may occur.

SERIES 6750

Designed for use where limiting smoke and toxic materials of combustion are important considerations. They can also be used outdoors at -40°F and is sunlight-resistant.

SERIES 6800

Designed for use where operation at a high temperature is required. Feature Extreme Temperature jacket that is halogen-free.

SERIES 6900

UL Listed product is designed for use in raceway areas exposed to extreme temperatures.

SERIES SZ

Designed for use as a raceway for NSF® 169 Component Special Purpose Food Equipment and Devices, meat packing, restaurants, food processing, poultry packing, and pharmaceutical facilities.

Flexible PVC Conduit and Fittings

Fused PVC materials form a rugged and tough, but flexible, conduit with no metal core. Nonconductive, lightweight, nonmetallic materials provide corrosion resistance. Conduit cuts easily and cleanly and resists crushing and crimping. Suitable for all standard-duty applications. Liquid-tight for inside or outside use. UL Listed (PolyTuff® II is UL Recognized), CSA Certified, NEC Article 351-B.

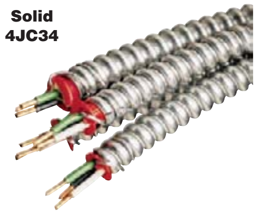
AFC CABLE SYSTEMS® A PART OF atkore

Southwire®

Solid 4JC34



Armored Type MC Cable

Cables are rated for 600V and rated 194°F dry. UL Listed, NEC compliant.

MC-LITE®

Designed with lightweight aluminum armor. UL Classified 1-, 2-, and 3-hr. through penetration

MCAP®

Constructed for superior grounding performance compared to regular MC and AC cables. Features integral grounding/bonding conductor.

MC

Fire Alarm®—For fire alarm systems from panels to devices. Features aluminum-bond ground, red armor, and dual-rated MC/FPLP. UL Listed for plenum use. NFPA compliant. UL Classified 1-, 2-, and 3-hr. through penetration

HCF—Designed for hospital and healthcare use. Armor and aluminum bond provides ground NEC 250.118 (8)

Calbrite Stainless Steel Conduit Systems

Flexible Metal Conduit

Easy to cut, no bending required—replaces EMT conduit in difficult or impractical locations. For dry locations only except PVC coated rated NEMA 4X.

HUBBELL® Wiring Device-Kellems

Liquid-Tight Cord Connectors

- Nylon: for washdown areas
- Aluminum: where lighter weight or better corrosion resistance is desired
- Zinc-plated steel: where higher impact resistance and tensile strength are desired

Proprietary split-hinge Gotcha® ring, color-coded by cord size, grips conductor through cord jacket. Factory-lubricated bushing provides even compression, ensures liquid-tight seal around cord, and minimizes tension on terminals. UL Listed, CSA Certified.

NYLON

Tough, durable, and highly resistant to corrosion.

MACHINED METAL

More durable and reliable than cast metal parts.

Note: Order locknuts on page 306.

HUBBELL® Wiring Device-Kellems

Liquid-Tight Cord Mesh Grips

Deluxe stainless steel cord/cable grips completely eliminate pull tension on terminals, indoors or outdoors, sealing out moisture and cutting oils. Grips control cable arc-of-bend and prevent cord pullout. Corrosion resistant with aluminum fitting that connects to box or hub, effectively sealing out contaminants. Useful in wiring enclosures, pendant stations, construction sites, processing and material handling equipment, pumps, motors, and machine tools.

Machined Aluminum Tray Cable and Cord Fittings

Silver Grip TCF Series nonmagnetic, corrosion-resistant straight aluminum fittings are designed for installation in Class 1 Gas and Vapor environments, without the use of tools. They provide efficient strain relief for cable entering enclosures and raceways in hazardous locations. Tapered neoprene bushing and O-ring seal out moisture and dirt. The chuck grip exceeds the pullout value required by NEC. CSA Certified.

Note: Tray cable and portable cord applications comply with IEC requirements for Class 1, Zone 2, and Zone 1 locations, respectively, when used with enclosures containing no arcing or sparking devices. For enclosures with arcing or sparking devices, TCF fittings must be used in combination with a certified Class 1 hazardous location sealing fitting.

Bus Drop
6C095

Strain-Relief Devices and Cable Support Grips

HUBBELL Wiring Device-Kellems

UL Listed (except 6C095) and CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 10.

I-GRIPS FOR HUBBELL INSULGRIP® PLUGS AND CONNECTORS

Strain relief devices control cable arc-of-bend and reduce high pull tensions on cordsets from wiring terminals. Fit all 2-, 3-, 4-, and 5-wire Hubbell Insulgrip plugs and connector bodies. Eye tabs fit under nylon cord clamp and screws slide through eyelet holes, securing grip in place. Made of high-strength, plastic-coated galvanized steel strand. Indoor use only.

Note: Grip only; plug and connectors are not included. See page 326 for plugs.

BUS-DROP CABLE SUPPORT GRIPS

Safe, easy, and economical method to support flexible-cord or bus-drop cable. Galvanized wire mesh ensures holding power. Single eye easily attaches to any hanger. For indoor use only. Suitable for assembly equipment in manufacturing, processing, or material handling applications.

Single-Eye Cable Support Grips

HUBBELL Wiring Device-Kellems

Hold the weight of electrical cables as they hang in a vertical, sloping, or horizontal position. The single eye simplifies attachment. Easy to install, reuse, and reposition. Split styles wrap around cable when cable end is not accessible. Tin-coated bronze. UL Listed and CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 10.

Self-Testing GFCI Receptacles

- 125VAC
- LED indicator

Devices protect personnel from shock hazards that can occur in electrical appliances and tools, especially in wet and damp locations. They meet new UL requirements by automatically monitoring ground fault circuit interrupting functionality every 3 hours or less. UL Listed (943 Class A for GFCIs, 498 for Receptacles) and CSA Certified.

Surge Suppression Receptacles

HUBBELL Wiring Device-Kellems ® BRYANT®

6C132

- 125V
- Power On indicator light

Provide point-of-use protection that can cause premature electronic equipment failure. Audible alarm alerts occupants when device needs replacement. Features a high-impact, nylon face that resists damage. Isolated ground-grade models protect equipment from effects of noise on the ground circuit. For use in accordance with NEC/NFPA Article 250-74, Exception 2. UL Listed and CSA Certified.

BRYANT® HUBBELL® Wiring Device-Kellems

Hospital Grade Receptacles

These hospital grade receptacles are designed to withstand the severe conditions unique to hospital environments. Nickel-plated bypass contacts help increase contact pressure and lower operating temperature. Four-point grounding system provides redundant grounding for low resistance ground continuity, and thermoplastic polyester (RTP) back is tough and heat-resistant.

Note: To quality for the hospital grade designation and use of the green dot symbol, UL requires product performance to specific levels. These levels form an established baseline below which no manufacturer can fall and still carry a green dot.

HUBBELL® Wiring Device-Kellems

SNAPConnect II Wiring Devices

Suitable for use in commercial construction and in healthcare applications. Great for installations with potential for frequent device change-outs. Additional hospital grade versions are available; see Grainger.com. UL Listed and CSA Certified.

Note: SNAPConnect II is not compatible with SNAPConnect. Please check Mfr. Model number before ordering.

SWITCHES

Feature an abuse-resistant thermoplastic rocker for heavy-duty applications. Design eliminates exposed energized parts. Stainless steel autoground clip. Illuminated Switches have light On with load Off. Pilot Light Switches have light On with load On. 120 to 277VAC.

RECEPTACLES

Abuse-resistant nylon for heavy-duty applications. SNAPConnect feature eliminates exposed energized parts. Stainless steel autoground clip. 120VAC.

PIGTAILED CONNECTORS

1-phase, 2-pole, 3-wire clear polycarbonate pigtails are made for use with the devices listed, and are required for all switches and receptacles.

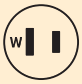
Straight Blade NEMA Configurations



1-15P

The National Electrical Manufacturers Association (NEMA) standardized configurations for single-rated devices were created to minimize the possibility of unsafe mating of unmatched voltages and amperages. The standard also defines dimensional requirements to assist users in selection of the proper product for a particular need. Use the figures below to help identify the correct device for your specific application.

High-Ampere Plugs

UL Listed and CSA Certified.

Note: See page 326 for NEMA configurations.

HUBBELL® PLUGS

Heavy-duty cord clamps handle a wide range of cable sizes and hold conductors securely in place. Nylon bodies withstand severe abuse.

4-position angle plugs allow cord to enter from top, bottom, or either side and stay close to wall.

BRYANT® PLUGS

Durable wall construction protects critical wiring from abusive environments. Reinforced thermoplastic polyester provides high impact and heat resistance.

Insulgrip® Plug and Connector Twist-Lock® Latching Kit

Latch with locking slide provides double-locking feature for plug and connector bodies to prevent unintentional disconnection even under high vibration.

For Use With	Color	Mfr. Model	Item No.
All 3-Wire 20A or 30A Locking PlugsInsulgrip Plugs and Connectors	White	SK2	**6PFN8**
All 4- and 5-Wire 20A or 30A Twist-Lock Insulgrip Plugs and Connectors	White	SK3	**4D579**

Locking Devices

Note: For NEMA configurations, see page 327.

MIDGET DEVICES

Nylon plugs and connector bodies resist impact and abuse. 2-wire valise devices have bundling clamp screw terminals; 3-wire valise devices have insulation displacement (IDC) terminals. This allows easy and fast installation. Angle devices are low profile for use in limited spaces. Valise devices have offset jaw cord grips to prevent strain on terminals. UL Listed and CSA Certified.

HUBBELL NEMA DEVICES

Impact- and crush-resistant nylon construction withstands industrial chemicals and solvents. Plugs and connectors have 2-part offset jaw cord grips and totally insulated dead-front construction. Receptacles have a thermoplastic base, all-brass grounding system, and 1-pc. contact. UL Listed and CSA Certified.

HUBBELL ISOLATED GROUND RECEPTACLES

Insulation barrier construction isolates ground contacts from mounting strap for a noise-free ground. IG triangle on face of receptacle indicates isolated ground device. Green grounding screw is connected directly to grounding contacts. For use in accordance with NEC/NFPA Article 250-74, Exception 4. ANSI C73, NEMA WD-6. UL Listed to Standard 498 and CSA Certified, CSA C22.2 42.

Weatherproof Boots for Plugs and Connectors

Thermoplastic elastomer boots protect cord-connected devices from harmful UV rays and many chemicals. Graduated-step cord entry design accommodates a wide range of cord sizes. Closure plug, sold separately, slips over the connector boot to seal the front of the device when not plugged in.

Note: When selecting a boot for a connector that will be used with a flanged inlet, use a boot for a plug.

Watertight Safety-Shroud Twist-Locks®

HUBBELL® Wiring Device-Kellems

UL Type 4X-rated devices can prevent the ingress of water under hose-down conditions. Feature stainless steel hardware, closure caps, 1-pc. thermoplastic housing, and lockout-tagout hole.

Note: For Watertight Safety Shrouds, see page 334.

50A Twist-Lock® Devices

HUBBELL® Wiring Device-Kellems

Box terminal with Allen-head threaded lug permits high clamping pressure on conductors without damaging the threads. Receptacles have zinc-plated steel nosepieces that cannot be distorted to mate with the wrong device. Connectors and plugs have a super-tough, ribbed-nylon housing for superior impact/crush resistance and secure gripping. Stainless steel shroud on plugs protects plug blades from damage.

Watertight Devices

Corrosion-resistant devices are suitable for dust-laden, damp, or wet (IP66) environments, including temporary submersion (IP67). Rated NEMA 4, 4X, 6, and 6P. UL Listed and CSA Certified.

HUBBELL®

Plugs and connectors feature keyed interior for easy installation and high conductivity brass termination. Also designed with Gotcha® ring and collapsible bushing strain relief. The strain relief nut seals on the body, eliminating areas of debris collection, and provides impact resistance. Unique cone seal prevents dirt and debris from collecting at cable entrance and adjusts to various cable ranges. All stainless steel hardware and corrosion-resistant connection points.

ERICSON®

Designed with antimicrobial additives, these watertight devices provide continual, long-lasting protection against the growth of bacteria, mold, mildew, and fungi. These NSF/UL/CSA rated wiring devices can be used for new and existing installations, and are suitable for a wide range of applications.

BRYANT®

IEC Nonmetallic Watertight Pin and Sleeve Devices

Feature a tough, nylon housing that protects against cracking, warping, corrosion, and chemical abrasion. Neoprene sealing glands provide a water-tight seal. Solid brass pins provide contact reliability and superior conductivity.

Hubbell Single-Pole Connectors

Nonmetallic retaining screw locks contacts in place so they don't move within the housing. Special screw thread prevents installation 180° out of rotation and requires fewer turns, reducing the chance of a conductive screw being substituted. Multiple guides ease cutting to correct cable size. Large raised alignment arrow eases mating of devices. 600VAC/250VDC. Rated NEMA 3R, 4X and 12K. UL and C-UL Listed.

HUBBELL® Wiring Device-Kellems

IEC Nonmetallic Watertight Pin and Sleeve Devices

Non-metallic housings are non-conductive, color coded by voltage and impact- and corrosion-resistant. Patented mechanical cord grips secure both the cable jacket and internal conductors to help ensure stress free terminations. One piece all brass pins and multi-contact springs provide superior conductivity for long-term reliable connections. Individual neoprene glands provide IP67 watertight performance withstanding wet and harsh environments. Receptacle back boxes are also available; see page 334.

IEC Switch Rated Pin and Sleeve Devices

The Advantage Series Switch-Rated Devices are IEC 60309-2 compatible devices that are approved as a disconnecting means for motor and branch circuits. These devices feature an oversized spring-loaded disconnect button, superior horsepower ratings and UL witnessed IP69k and UL Type 4X water ingress protection.

Type 4X Pin and Sleeve Devices

HUBBELL® Wiring Device-Kellems

Interchangeable with traditional all-metallic pin and sleeve devices built to UL 1686-C1. Insulgrip® pin and sleeve plugs and connectors have a metallic shroud to provide ground and protect pins, and a watertight, nonmetallic housing for corrosion resistance and electrical safety. Style I plugs and connectors ground through their metallic shroud, and receptacles are grounded via ground lug in the aluminum back box. Style II devices have a dual-ground safety feature using dedicated ground pin. Receptacle back boxes available; see this page. Gray color.

Circuit-Lock Watertight Mechanical Interlock Devices

HUBBELL® Wiring Device-Kellems

3D147

- Lockable in Off position
- UL Type 4X, 12K watertight enclosures
- Use appropriate Class J time-delay fuse (see page 180)

Space-saving, nonmetallic units incorporate disconnect and receptacle. Meets NEC requirement for a separate disconnect means within sight of motor loads. Arc protection: The devices cannot be turned on without the proper plug fully inserted, and with power On, the plug cannot be removed.

Southwire®

Building Wire

- PVC insulation with nylon jacket
- Rated for 600V

This wire carries electrical current from a power source to a device in a building, such as an outlet or light fixture. Building wire is typically used to run new circuits or extend old circuits inside walls and ceilings in commercial, industrial, and residential properties. **Solid** conductors are tougher and more rigid than stranded. **Stranded** conductors are more flexible than solid and can withstand vibrations and flexing. **THHN** (thermoplastic high-heat-resistant nylon) building wire is a coated wire typically run through conduit or cable trays. **XHHW** (cross-linked polyethylene high-heat-resistant water-resistant) building wire is a coated wire typically run through raceways.

Bus Drop and Tray Cable

1YPX1

These are service cords that connect a power supply to a machine or device. They have two or more insulated conductors and a protective jacket that resists abrasion, water, sunlight, and lubricants. **Bus drop cable** is typically used as a branch connection from a ceiling cable. **Tray cable** is primarily used for wiring installations in open-air raceways and trays.

Machine Tool Wire

1YRA3

- PVC insulation
- Rated for 600V
- Stranded conductor design

This wire is typically used in the internal wiring of HVAC equipment, machine tools, circuits, and control panels. It has a durable jacket that is heat-, oil-, and moisture-resistant.

NM-B Building Cable

Southwire · Southwire Romex SIMpull · IDEAL

- PVC insulation
- Rated for 600V
- Stranded conductor design
- Operating temp.: 140°F dry

Nonmetallic cable is commonly used in residential and commercial applications to provide power for outlets, lighting, and appliances. It is for indoor use only.

UF-B Underground Feeder Cable

- PVC insulation with nylon jacket
- Rated for 600V

UF-B wire can be buried directly in the ground, with or without conduit. It may be used in wet indoor settings because it resists moisture and fungus.

Armored Building Cable

- Rated for 600V

Also known as BX cable or metal-clad (MC) cable, armored cable prevents accidental penetration better than NM-B building cable, but it is heavier and harder to handle, rip back, and cut. Protective corrugated metal jacket (called a sheath or cord) serves as a conduit and provides grounding.

Portable Cord

CAROL. BRAND

- Stranded conductor design

Flexible, moveable electrical cable. **SJOOW and SOOW cord** is heavy-duty service cord with a jacket that hardens under a direct application of heat, allowing the cord to be unaffected by aging, abrasion, water, sunlight, and ozone. **SJTOW and STOW cord** is less flexible than SEOW and SOOW portable cord and will degrade under extreme temperatures and exposure to oil and chemicals. **SEOW cord** is more resistant to water than SOOW portable cord and can be used at lower temperatures, but it is less durable.

Bare Copper Grounding Wire

- Rated for 600V
- Temp. rating: 167°F
- 6 AWG stranded: Class B stranding
- 4 AWG stranded: Class A and B stranding

This wire does not have insulation or a jacket and is used to connect a circuit to a grounding rod in the earth.

Southwire®

Flat Submersible Pump Wire

- PVC insulation

Multiconductor cable connects a submersible pump controller to the motor of the pump. Also known as sub pump wire, it resists oil, lubricants, acids, ozone, and abrasion, making it ideal for wet or hostile environments.

Wire Size	L	Wire Color	Item No.
600 V, THW, Flat Submersible Pump Wire

1YPX4

SC Portable Cord

- Super Vu-Tron rubber jacket over copper conductors
- Temp. range: -58° to 221°F (-50° to 105°C)
- TRU-Mark sequential footage marking

Heavy-duty cable is commonly used to provide temporary power for entertainment industry activities. This cord can be coiled and stored when not in use, making it easy to move from location to location. It can withstand heat and flames, and it's resistant to liquids, solvents, ozone, crushing, and abrasion. UL Type SC, CSA Type PPC, RoHS compliant.

Wire Size	Jacket Color	Jacket Material	L	Item No.

Welding Cable

- EPDM rubber insulation
- Black, abrasion-resistant Carolprene jacket
- Rated for 600V
- Temp. rating: 221°F

1UGT2

Flexible, durable electrical cable supplies power to the secondary circuit of electric welders, which controls the electrode that releases the charge needed for the welding process. It has a single, finely stranded conductor, which gives welding cable more flexibility than other types of electrical wire.

Note: Do not use for in-line voltages, which could be hazardous. Designed for use with secondary voltages.

Continuous Flexing Cable

igus®

- Cut to length; sold in spools or by the foot

This is electrical cable that can withstand repetitive motion and constant bending without damage. It has one or more insulated conductors and a flexible jacket that is oil-, flame-, and coolant-resistant.

General Cable CAROL BRAND

Security and Alarm Cable

SOUND, ALARM, AND SECURITY CABLE, TYPES CMR AND CMP

For burglar alarms, intercoms, PA systems, and sound systems. Stranded or solid bare copper conductor. Jacket has sequential footage markings to facilitate installation. UL Listed and California State Fire Marshall Approved.

Shielded cable has an aluminum/polyester Flexfoil® shield with stranded, tinned-copper drain wire.

Riser

- Temp. range: -4° to 167°F, except 500-ft. 22-ga. unshielded are -4° to 140°F
- Rated for 300V

Ripcord included.

Plenum

- Temp. range: 32° to 167°F
- Rated for 300V

FIRE ALARM/LIFE SAFETY CABLE, TYPES FPLR AND FPLP

- Compliance: NEC Article 760-61
- Type FPLR meets UL 1666 Vertical Tray Flame Test
- 500-ft. Type FPLP meets UL 910 Test for Flame Propagation and Smoke Density
- 1000-ft. Type FPLP meets NFPA 262 Vertical Tray Flame Test
- Temp. range: -4° to 167°F, except 1000-ft. Type FPLP 32° to 167°F
- Rated for 300V

Ripcord included. California State Fire Marshall Approved. Shielded cable has foil shield with stranded tinned copper drain wire. For wiring fire alarms, smoke detectors, fire protective circuits, burglar alarms, and voice communications. Sequential footage markings to facilitate installation.

Speaker Cable

General Cable CAROL BRAND

FLAT

- Compliance: UL Wires Misc.
- Stranded conductors and PVC insulation
- PVC jacket
- Rated for 120V

For general audio speaker use. Not for in-wall use.

ROUND

- Temp. range: -4° to 140°F (176°F on high-definition)
- Stranded bare copper conductors with premium color-coded polypropylene insulation
- PVC jacket

Designed for stereo systems, in-wall speakers, home theater, and remote control circuits.

Communication Cable

- Fully annealed, stranded tinned copper conductors
- Color coded
- 1000-ft. rolls

Cables facilitate cable pull-ins and single-site installations. These cables are typically used for industrial equipment control, electric valve actuation, and remote signaling. Also used for communications and broadcast applications. Multi-paired cable designs find frequent application in circuits requiring circuit-to-circuit isolation from noise, minimization of capacitance imbalances, and a reduction of EMI interference currents.

Note: 100- and 500-ft. rolls are available on Grainger.com®.

5e Plenum Cable

Category Cable

GenSPEED BRAND · CAROL BRAND · MONOPRICE

Designed with a solid conductor. PVC jackets have sequential foot markings. Outside Plant Cable 1MWZ2 features internal cross-web that maximizes pair separation for enhanced electrical performance. 1MWX7 has helical aluminum armor over inner jacket for increased cable protection and tensile support strength. Meet ANSI/TIA/EIA 568A, ANSI/ICEA S-90-661, and NEMA WC63.1. UL and C-UL Listed.

CAT 5E

- 24-ga. conductors
- 100 Mbps, 155 Mbps, and Gigabit Ethernet
- 100 Base-T
- 52/155 Mbps ATM

All pair counts meet Cat 5e Power Sum backbone transmission requirements; suitable for high-speed data transmission.

CAT 6

- 23-ga. conductors
- 1000 Base-T Gigabit Ethernet, 100 Base-X, 10 Base-T (IEEE 802.3)
- 1000 Base-TX
- 4/16 Mbps Token Ring
- 155 Mbps/1.2 Gbps ATM

Excellent for digital video and broadband and baseband analog video. Filler design makes cable very round and easy to handle.

HUBBELL® Wiring Device-Kellems

Pulling Grips

Strong galvanized steel mesh grips provide positive holding power while pulling electrical, data, and communication wires at low tension through conduit. Rubber boot contains and protects cable ends. Flexible single eye provides easy attachment to pulling lines and fish tapes. Reusable and easily installed. CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 5.

Power Distribution Units

Offer reliable rack-mount multioutlet power distribution from any supplied power source. High-quality design includes rugged all-metal housing and secure rack-mount installation with included mounting accessories. Metered units offer real-time local reporting of load levels via built-in digital meter.

Ethernet Switches

12N878

Ethernet switches are used to expand business data networks so more users can link to a local area network (LAN) to share information. They provide multiple ports for connecting coaxial cable and data cables to connect workstations to the hub.

Xcelerator® Jacks—Universal Wired 110 Connection

HUBBELL®
Hubbell Premise Wiring

- Universal wiring for T568A or T568B
- For use with Hubbell wall plates
- Third-party component verified

Fast and easy to install and terminate. Compact, full-encasement housing protects connection elements and snaps into standard Hubbell® keystone opening. Termination towers are angled for easy lacing of wires into IDC contacts. Paired punchdowns have color-coded wiring labels.

Note: See page 347 for Wall Plates.

PROclick® Fiber Pre-Polished Connectors

HUBBELL® Hubbell Premise Wiring

- 900/250 um

Provide a low-cost field termination solution. Eliminate adhesives and polishing and utilizes a fiber clamping method. Perform well under extreme temperatures.

USB Tester and Data Masker

Dual output for charging two USB devices off of one USB 3.0 port; One port is a specially designed masked port to charge your phone or tablet without any data being transferred. Built-in Smart Chip for Intelligent Charging that allows it to determine the safest maximum current your PD can accept.

Fiber Optic Cable Testing Instruments

Description	Mfr. Model	Item No.
IDEAL		
Fiber Optic Test Kit, Power Measurement In dBm and W, Loss Display In dB, Four Wavelength MM/SM Light Source	33-931	**6KJU4**
Fiber Fault Finder, Finds Breaks, Faulty Splices and Crimps Poor Components or Connections for Fiber Cable, Visually Identifies and Locates Faults in Fiber Optic Cabling, 2.5mm Universal Adaptor for All ST, SC and FC Connectors, Useful Over a Distance of 5km (3 miles), Up to 80 hours of Operation, Ruggedised Aluminium Body	VFF5	**6LFY3**
Hubbell Premise Wiring		
Fiber Visual Fault Locator Kit, Fiber Terminations and Breaks, 1.25MM and 2.5MM Ferrule Adapters	OFVFLKT1	**22LV15**
Fluke Networks		
Fiber Optic Cleaning Supplies, Fiber Optic Cleaning, Solvent, Swabs and Cube	NFC-KIT-BOX	**12N847**
Fiber Optic Cleaning Supplies, Fiber Optic Cleaning, Solvent, Swabs, Cube and Case	NFC-KIT-CASE	**12N848**
Visual Fiber Optic Fault Locator, Visible Light Source That Helps Trace Optical Fibers, Check Fiber Continuity, And Find Faults Such as Breaks, Bad Splices, and Tight Bends In Fiber Optic Cable	VisiFault	**2EHV6**
Basic Fiber Verification Kit (MM), Verify Optical Loss and Power Levels	FTK1000	**4AZZ3**
Fiber Optic Tester, Fiber Optic Video Inspection, Allow Tier 2 Certification, Detects (850/1300nm) Multimode and (1310/1550nm) Single Mode Wavelengths, Locate Connections and Faults, Measure Loss and Reflectance	OFP-Q-ADD	**54DV48**
Fiber Optic Tester, Fiber Optic Video Inspection, Extended Single Mode Distance Range to 130km, Fiber Optic Loss, OTDR Testing and Fiber End Face Inspection, Versiv(TM) Modular Design Supports Copper Certification	CFP-Q-ADD	**54DV49**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-100-M	**54DV52**
Fiber Optic Fault Locator, Fiber Troubleshooting, Works On Multimode Fiber, 9/125micron m and 62.5/125 micron m, Locate Severe Bends, High-Loss Splices, Breaks and Dirty Connectors In Single Mode Fiber, Change The Index of Refraction (IOR) to Improve Fiber Length Accuracy	FQM-100-M-VFL	**54DV53**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-M	**54DV54**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-SFP-M	**54DV55**

Flux and Flux Removers

Welding flux removers can make it easier to clean welding flux from stick welding rods and other items. Flux can be difficult to remove manually, but the chemicals in these products can break it down without the added work.

Fume Extractors

HAKKO®

Benchtop Soldering Fume Extractor—Designed to be used in either a vertical, standing up position or a horizontal, laying down position. Horizontal position increases efficiency and airflow. Standard activated carbon filter absorbs up to 80 percent of odors from the air.

Soldering Fume Extractor—This extractor features powerful suction, quiet operation, High, Medium, and Low airflow adjustment, free-standing ducts, and a filter replacement indicator that notifies you when it's time to replace the filter.

Butane-Powered Micro Torches

Master Appliance—All torches are self-igniting. Meet CPSC requirements.

32MC12 and 5PYT3 are palm size and feature pinpoint flame with lever adjustment.

32MC12 includes $^{15}/_{16}$-oz. canister of butane fuel.

1WG61, 5PYT6, and 1YMK6 are designed for handheld or tabletop use. Runs for 2 hr. 1WG61 and 5PYT5 are open flame only.

5HD24 has larger flame hands-free mode with safety lock. Runs for 30 min.

5PTY6 has miniature torch with slide lock, instant Off, and gas adjustment wheel. Runs for 1hr.

1YMK5 and 6NE94 are handheld/tabletop tools that feature slide lock, gas adjustment wheel, and instant off. Runs for 2 hr.

Butane-Powered Soldering Irons

Provide rapid heat from non-toxic butane fuel and without the need for batteries or electricity.

2-in-1 Butane Soldering Irons—Tools can be used with compatible tips for use as a soldering iron or flameless heat tool. Applications include heat-shrink wrapping, desoldering surface-mount components, and soldering large items.

3-in-1 Butane Soldering Irons—These tools are used with compatible tips for use as a soldering iron, flameless heat tool, or open-flame torch. Suitable for use in soldering and desoldering, removing surface-mount components, and in heat-shrink tubing applications.

Cordless Soldering Irons

Weller

Use batteries or butane fuel and are ideal for use in locations where a corded power supply is not available.

Electric Corded Soldering Irons and Kits

Heating elements are wound around steel spools, creating large reservoirs of heat to run longer seams, solder large joints, and have quicker thermal recovery. High top-end temps. make irons suitable for lead-free soldering.

Heavy-duty and Ergo irons have hardwood handles that provide thermal and electrical insulation. Pencil irons have plastic handles and plug-style tips for superior heat transfer. Ergo irons have a near 90° angle in the casing to reduce stress on hands and wrists. Soldering iron kits include soldering iron with stand, lead-free solder wire, flux, tip tinner, brass sponge tip cleaner, desoldering braid, and cleaning pad.

HAKKO®

Soldering/ Desoldering Stations and Tips

Soldering Stations— Digital Soldering Station 32TV10 features 5 preset temperatures, password protection, and a low temperature alarm that provides process control and helps protect against cold solder joints. ESD safe. 32TV11 features superior heat transfer and thermal recovery, a lockout keycard, low temperature alarm, and automatic shutoff after 30 min. Stations 32TU96 and 32TU97 include process control so you can select any temperature without changing the tip. LED in handpiece tells the operator the iron is hot. Include automatic shutoff and sleep mode. No calibration necessary.

Rework and Desoldering Stations—Hot Air Pencil Station 32TU94 is perfect for soldering and desoldering small surface-mount components, shrinking tubing, heating test, and other local heating operations. Ultra-light setting for air volume control. ESD safe. Desoldering Stations 32TU99 and 32TV01 have a self-contained, built-in vacuum. 32TV01 includes a conversion port. Rework Stations 32TV04, 32TV06, and 32TV07 can power any Hakko FM Series handpiece. Graphic user interface is designed for easy setup and operation. Features 3 simultaneous powered ports, self-contained pump, digital airflow indicator, manual or automatic profile for hot air, auto shutoff with sleep function, passcode protection, and security lock.

Digital and Analog Soldering/ Desoldering Stations

- ESD-safe, protects sensitive components
- 120V, 60 Hz

DIGITAL SOLDERING STATIONS

481D58 provides accurate adjustment of hot air through brushless turbine. Designed with up to 5 presets that can be set to run automatically. 481D59 features front panel power switch, setback, lockout, temperature window, standby mode, auto shutoff, and LCD display. 483N57 has standby mode, auto shutoff, intuitive navigation, password lockout, LCD, and lightweight soldering pencil.

ANALOG SOLDERING

Professional Grade—Heating elements are wound around steel spools, creating large reservoirs of heat and resulting in the ability to run longer seams, solder large joints, and a shorter thermal recovery time.

Soldering Irons

These electric soldering irons are corded and plug into a standard wall outlet or compatible soldering station for their power supply. For use in light- and heavy-duty soldering applications.

Electric Soldering Irons—Operate on low wattages and output temperatures and are often used for soldering circuit boards or light electrical jobs requiring minimal heat.

Electric Soldering Irons with LED Lights—Have LED lights that provide a bright and focused illumination on the solder joint. For use on circuit boards or electrical jobs that require minimal heat.

Electric Soldering Irons with Station Connectors—Allow greater control over set-temperature memory, lockout, and overall temperature. For use with compatible pencil-style soldering irons.

High Output Electric Soldering Irons—Operate on high wattages and provide high-temperature output. Typical applications include copper wire connections, cable splicing, sheet metal, and copper gutters.

Note: For soldering stations, see page 364. For all replacement tips and parts, call 1-800-GRAINGER (472-4643); or go to Grainger.com and search for "soldering iron replacement tips".

Modular Soldering Irons

Preassembled irons are a combination of the most popular modular components, and include handle, heater, and tip. For a customized iron, combine 6A907 soldering handle with choice of heating element and thread-on tip. Handle is 3-wire grounded with 4½-ft. cord and features "soft touch" acid- and flux-resistant grips. UL Listed (E21922).

Solder Pots

American Beauty · Hakko

American Beauty—For lead-free soldering. Chemically stable, cast-iron crucibles are resistant to corrosion. Cartridge heating elements are inserted directly into the crucible. Internal removable dross skimmer increases safety and maintains solder purity and temperature. Use for pretinning wires, connectors, and other assembly components. 110-120VAC.

Hakko—Analog pot 32TV27 features analog functionality and a rugged ceramic heating element. Lead-free compatible and can accommodate two pot sizes. Digital pot 32TV28 is used for dip soldering and tinning the ends of wire leads. Features four different heating programs and convenient timer, which is useful where reliable control of solder temperature is essential.

Label Printer Information

Label printers create messages and display information on labels and tags to convey safety information and identify equipment and supplies. Labels, ribbons, and ink fit into a compatible printer. Accessories keep printers in good working order.

PRODUCT TYPE:

Handheld label printers do not require a connection to a computer and can be carried to the jobsite.

Portable label printers are larger than handheld printers and are designed to be set on a work surface when printing. They do not require a connection to a computer and can be carried to the jobsite.

Desktop label and tag printers will produce a wider range of label and tag sizes than handheld and portable label printers and are often used for high-volume printing.

MODE OF OPERATION:

PC Connected—These printers require a connection to a computer. They often use software that utilizes templates to print labels with a consistent appearance.

Standalone—These label printers have a keyboard or keypad for entering information. They don't require a connection to a computer to print labels.

BRADY

M210 Handheld Label Printers and Supplies

- Single color printing capability
- Use thermal transfer print technology
- Barcode capable
- Standalone connectivity
- 203 dpi printer head resolution
- Min./Max. font size 6 to 40 pt.
- Min. Label width is ¼"; Max. Label width is ¾"
- Max. print speed of 0.39 in/sec
- Prints up to 100 labels per day

Monocolor LCD screen and ABC keypad. For use with continuous tapes and die cut labels. Has a single-hand, manual operation cutter. **793EU0** offers general, slide, tube, vial built-in templates for healthcare, hospital, and laboratory applications. **793ET9** and **793EU1** have flags, patch panel, terminal block, and wire wrap built in templates. For use in data and telecommunications labeling, electrical labeling, general identification, lean and 5S labeling, warehouse marking, and wire and cable applications.

- Barcode capable
- Standalone or PC connectivity
- 300 dpi printer head resolution
- Min. Label width is ¼"
- Min./Max. 2 to 26 lines of print

Quick setup time with 1-touch hot keys. Large color TFT backlit, touchscreen display. Prints durable labels including continuous length tape, laminated wire/cable wraps, heat-shrink tubes, and presized labels. Preloaded templates ensure perfect formatting. Life-like onscreen print preview shows how labels will look when applied. Built-in label applications make getting started from home screen easy. Designed with high-impact plastic. **21HN25** (13 fonts) has a manual cutter and includes a carrying case. **21HN26** (15 fonts) has an automatic cutter plus includes a quick reference guide and tape cartridge.

BMP61 Handheld Label Printers and Supplies

- Single color printing capability
- Use thermal transfer print technology
- Barcode capable
- Standalone or PC printer connectivity
- 300 dpi printer head resolution
- Min./Max. font size 4 to 170 pt.
- Min. Label width is ¼"; Max. Label width is 2"
- Max. print speed of 1.33 in/sec
- Prints up to 750 labels per day
- Manual cutter

Printers offer a color LCD touchscreen and QWERTY keyboard input method. For use with continuous tapes and die cut labels. Use for asset tracking, cable and wire, circuit board labeling, data and telecommunications, electrical, general ID applications. Built-in label templates are arrows, CLP/GHS, datacomm, electrical, exit, fire safety, first aid, Greek, home electrical, HSID, international, laboratory, mandatory, miscellaneous, packaging, personal protective equipment, prohibition, public info, safety, warning, WHMIS. Printers feature auto shut off/power conserve, and recharge in 3 hours. Include (1) BMP61 or BMP61-W with WiFi, (1) Free Brady WorkStation Basic Design Suite Download, (1) Glossy White Polyester Asset and Equipment Tracking Labels, (1) Halogen Free Ribbon , (1) Hard Case, (1) Product CD, (1) USB Cord, and (1) Utility Strap. **Continuous roll 4VT35** is halogen free. Labels are polyolefin material with a matte finish. **52AZ37 media adapter** is designed to let you use label cartridges from other Brady labeling systems, including older or discontinued models, with the BMP61 label printer. The label roll adapter can be used with BMP71 label tapes on page 371.

BMP41 Handheld Label Printer and Accessories

BRADY

- Single color printing capability
- Uses thermal transfer print technology
- Barcode capable
- Standalone or PC connectivity
- 300 dpi printer head resolution
- Min. Label width is ¼"; Max. Label width is 1 in
- Max. print speed of 1.3 in/sec
- Max. 250 labels per day

Designed to withstand harsh environments, has been 4 ft drop tested. Features monochrome LCD display and a manual cutter. For use with continuous tapes and die cut labels. QWERTY keyboard input method. Printer features a magnet accessory for hands free printing and smart cell technology.

DYMO Rhino Industrial Labeling Tools

RHINO Handheld Printers and Supplies

- Single color printing capability
- Use thermal transfer print technology
- Barcode capable
- Standalone
- 180 dpi printer head resolution
- Min. Label width is ¼"; Max. Label width is ¾"
- Max. print speed of 2 to 8 in/sec
- Max. 4 lines of print

1-touch hot keys save setup time. QWERTY keyboard input method. Feature impact-resistant rubber bumpers for protection. Use for tracking, barcode labeling, cable and wire, facilities, MRO applications and more.

RHINO 4200

Backlit display and manual cutter. Hot keys option provides shortcuts for creating and formatting wire/cable wraps, flags, code 39 and 128 bar codes, fixed length, general, and breaker labels. Favorites key gives you access to most frequently used labels, symbols, and terms. Kit adds AC adapter, lithium-ion battery, and case.

RHINO 5200

Monochrome LCD display and automatic cutter. Handheld printer includes one ¾" black-on-white flexible nylon label cartridge. Kit adds lithium ion rechargeable battery, one ⅜" black-on-white vinyl label cartridge, AC adapter, and carrying case.

RHINO M1011 Handheld Metal Embossing Label Maker and Tape

- Accepts ½" tape widths

Embossing label maker features front scissor manual cutoff, built-in hole punch, cable-tie slot punch, and measuring gauge to set leading and trailing label edge length. Rugged cast aluminum frame. Produces ³⁄₁₆" high characters with forward and reverse tape control. Includes a 0–9 and A–Z character set. Designed for indoor or outdoor applications. Includes embosser, character wheel, reverse-image character wheel, ½"-wide non-adhesive aluminum and stainless steel labels, and hard carry case. **Metal label tape** resists corrosion from extreme weather, temperature, chemical, or UV exposure. Comes in a box of 10 rolls.

BBP72 and i7100 Desktop Printers and Supplies

BRADY

- Uses thermal transfer print technology
- Barcode capable
- USB printer connectivity, include a USB cable
- Max. printed label width of 4 5/32 in

High-performance thermal transfer printers automatically detect label material and ribbon, then display user information on the screen. Template and settings are automatically calculated. For use with continuous tapes and die-cut labels.

22NA72 includes LabelMark Standard Software and (2) print heads. Has a monochrome LCD display and a manual cutter. **Kits** also include (2) 1 In ribbon takeup cores plus Brady WorkStation Product and Wire ID Software Suite. Offer a color touchscreen and an automatic cutter. Offer automatic label formatting and indoor/outdoor label durability. The peel configuration on **54YN97** and **54YN99** automatically peels labels from the liner. **Label roll cartridges** have a black ribbon.

LabelWorks LW-PX900 Handheld Label Printer

45VZ82

- Single color printing capability
- Uses thermal transfer print technology
- Barcode capable
- Standalone or PC printer connectivity
- 360 dpi printer head resolution
- Min. Label width is 4mm; Max. Label width is 1½"
- Max. print speed of 35 mm/sec

Label Printer includes a tape cartridge, Label Editor software, USB cable, lithium-ion rechargeable battery, AC adapter, (2) removable magnet attachments, owner's manual, and industrial hard plastic case. For use with continuous tapes and die cut labels. Heat-shrink sleeve **Continuous Labels** can be cut from the roll automatically at the desired location. Labels are polyolefin with a matte finish.

Wire Marking Tape Dispenser and Refills

ScotchCode STD Dispenser is compact and refillable, with easy cut-off for no waste. Provides fast, convenient access to 10 rolls of wire and cable marking tape. Non-smear polyester with high-tack acrylic adhesive resists solvents, oil, and water to give optimum adherence to insulation surfaces. Operating temp. range: -40°F to 250°F.

Write-On Self-Laminating Wire and Cable Markers

Convenient-sized books contain white/transparent self-laminating vinyl for use above or below ground. The transparent portion of the label over-wraps to provide a snug-fitting, self-laminating shield that resists oil, water, and solvents.

Insulating Electrical Tape

3M · Shurtape · DuPont™ Kapton® · Thomas&Betts

Tape wraps around wire and cable to prevent shorts and electrical shock. Flexible tape can be slightly stretched and applied with pressure for a secure bond. Most applications use general purpose electrical insulating tape, while other applications require specific properties such as abrasion resistance, corrosion protection, high-temperature resistance. Some tape varieties come in multiple colors for phasing and voltage identification.

Conducting Electrical Tape

Primarily used for connecting flexible circuits, grounding a connection, or draining static charge. Also used for shielding components and circuits from unwanted signals that come from electromagnetic interference (EMI) and radio frequency interference (RFI). Has a non-conductive adhesive has a stronger bond and resists heat, oxidation, and discoloration.

Raychem 3M INSULTAB

All Purpose Heat Shrink Tubing

Covers wire and cable and shrinks when heat is applied to create tightly sealed bundles. Also known as single- or thin-wall heat shrink tubing, it is used across a wide variety of applications to insulate, protect, bundle, and provide strain relief for wire and cable.

2 Breakouts

3M Heat Shrink Breakout Boots

- Black Color

Boots are placed over the point where wire splits off from cable, then heated to shrink the boot and melt the adhesive lining. Also known as cable splitters or transition boots, they create a tight seal around the wire connection that provides mechanical and electrical protection, while the adhesive seals against environmental damage.

3M Raychem Cold Shrink Connector Insulators

Covers low-voltage cable, wire connections, joints, and terminals, and it shrinks when the core is removed to create tightly sealed bundles. It doesn't require heat guns, so it can be used where gas and electrical heating devices are not allowed. It is used across a wide variety of applications to provide electrical and mechanical protection against environmental damage.

BURNDY

1- and 2-Hole Compression Lugs

- Rated for 600V to 35kV, 90°C applications

Lugs withstand a wide range of electrical and environmental conditions, including current surges, extreme temperatures, corrosion, and vibration. Designed to operate cooler than the wire on which they are insulated. Electro-tin plated for corrosion resistance. Aluminum terminals come prefilled with PENTROX™ oxide inhibitor compound.

IDEAL

Noalox® Antioxidant

Provides additional inner-strand and inner-conductor current paths for improved conductivity. Suspended zinc particles penetrate and cut aluminum oxide. Reduces galling and seizing on aluminum conduit joints, promoting good ground continuity.

POWER FIRST

2-Way Connectors

Thomas&Betts

- For 600V applications

Order installation tools and dies on page 382.

COPPER

Easy-to-insulate connectors provide low-resistance, high-quality connection, and high pullout values.

ALUMINUM

Permit aluminum-to-copper and aluminum-to-aluminum splices. Feature aluminum and copper concentric conductors and compact code aluminum strandings.

Hydraulic Crimping Tools

BURNDY

22P210—Features a specialized latch-style head with a generous working stroke for a wide variety of crimping applications. Provides 180° head rotation. Audible pressure valve indicates properly completed crimp. High-speed ram advance for faster crimps.

22P221—Features die-less flip-top head that facilitates tool removal from continuous conductor runs and eliminates the need to purchase and maintain dies. Designed with audible pressure valve. Die embossment provides 360° inspectability. Handle trigger release with convenient ram. Advanced high-speed pump provides fast crimps, longer life, efficiency, and reliability.

22P209, 22P161, 22P162—Dieless system requires only 1 crimp for each wire termination for both long and standard length barrels on HYLUG terminals and HYLINK splices. Rapid-advance pump for faster crimps. Pressure relief valve provides audible indication that crimp is complete. Handle trigger drain for convenient ram retraction. Comfort-grip handle.

22P163—Makes connector installation and tool removal from line conductors of overhead lines easy. Lifting eye allows head to be lifted into working position. Easy die changing. Secure die alignments are provided with heavy-duty reinforced back. Mates with all universal hot-stick tooling.

Crimping Tools

For additional crimping tools, see page 844.

Description	Mfr. Model	Item No.
Power First		
6-Pc. Kit, 1 Tool and 5 Dies, Includes Case	24C968	**24C968**
6-Way Tool, 22 to 10 AWG Capacity	24C969	**24C969**
Panduit		
For Use With UL Listed and CSA Certified Supra-Grip(TM) Disconnects	CT-1015	**1LEL4**
For Use With Panduit Nylon and Vinyl Insulated Terminals, Splices and Disconnects	CT-1550	**38YU61**
For Use With Panduit Insulated Terminals and Splices, Fully Insulated Disconnects, Insulated Parallel Splices and Crimps Panduit Barrel Insulated Disconnects	CT-1525	**38YU62**
For Use With Panduit Non-Insulated Terminals and Disconnects, Panduit Non-Insulated Splices and Compression Lugs	CT-1570	**38YU63**
For Use With Panduit Non-Insulated Tubular Terminals (S series), Copper Code Conductor Lugs and Splices, Copper Flex Conductor Lugs, Dual Rated Aluminum Lugs and Splices and CTAPF10-16 to CTAPF3-12 Copper Taps, Includes 5 - Position, Color Coded Rotating Die	CT-1700	**38YU64**
Sta-Kon		
For Use With A, B, C, Pt Non-Insulated Terminals and Splices, Includes Wire Cutter, Wire Stripper, Screw Cutter and Insulated Grips	WT111M	**3KH45**
For Use With A, B, C: AB, PT, RA,RB, RC Insulated and Non-Insulated Terminal and Splices, Includes Wire Cutter, Wire Stripper, Screw Cutter and Insulated Grips	WT2000	**3KH52**
For Use With Nylon and Vinyl, Type RA, RB, RC Insulated Terminals, Disconnects, and Splices, Includes Color-Coded Die Nests, Die Embossment, Terminal Locator	ERG4001	**4XMR5**

Type FTD

Pan-Term® Ferrules

Panduit

Designed with seamless barrel to contain loose wire strands for superior terminations. These ferrules ease insertion of wire into terminal block, and are suitable for limited-space panel applications. Type FSD and FTD ferrules feature polypropylene insulation housing and funnel entry for faster insertion and lower installed cost. Meet DIN standards for wire containment. UL Listed.

Wing-Nut® Grounding

Grounding Wire Connectors

Easily holds in fingertips to form a secure grip when connecting wires for grounding or bonding. No pretwisting required. Fixed, square-wire spring threads itself creating secure connections. Contoured wing offers maximum torque. Deep skirt helps protect against flash-over. UL Listed and CSA Certified. 6HY42 meets UL 94V-2.

General Application Wire Connectors

Twist-on connectors provide fast installation, no pre-twisting required. Fixed, wire spring creates its own threads as it draws the conductors all the way into the connector preventing any disconnection. Shells are designed to withstand temperatures up to 221° F. UL Listed and CSA Certified.

Power Plug® Luminaire/Ballast Disconnects

- Max. operating temp.: 105°C (221°F)
- Max. voltage: 600V
- Meet Canadian Electrical Code 30-308(4) standards
- Meet National Electrical Code 410.73(G) standards for nonresidential fluorescent luminaries with ballasts

Push-in technology enables quick connections without the need for tools. Designed for new, retrofit, or OEM lighting installations. Provide safe disconnect of hot and neutral ballast wiring. 2-pc. design allows ballast replacement while minimizing the risk of shock; passes UL 2459 and CSA finger probe requirements. Nylon and copper alloy construction.

SpliceLine™ Inline Wire Connectors

Feature crimp-free, push-in design that installs in half the time of traditional butt splices. Perfect for lengthening a short wire in a box or for surface raceway wiring. Easily pass through ½" knockouts. Transparent polycarbonate window allows visual inspection of connection. Check port allows continuity testing.

In-Sure™ Push-In Wire Connectors

- Meet UL 467 for grounding and bonding applications
- Meet UL 94V-2 flame-retardant shell rated at 105°C (221°F)
- Max. voltage: 600V

Feature compact size making installations easy. No-twist connection reduces repetitive motion fatigue. Low insertion force allows fast and easy connections. Clear shell gives visual verification of connection. Accepts solid or stranded wire. UL Listed and CSA Certified.

Insulation Displacement Connectors

INLINE TAPS

Connectors electrically join a tap wire to a through-run wire. Self-stripping.

T-TAPS

Fully insulated connectors eliminate wire stripping. Connector mates with 0.250" male tabs, making a quick-connect wiring connection.

BUTT SPLICES

Squeeze-shut connectors eliminate stripping and twisting. Insulated connection is sealant-filled with a mineral oil-based grease and flame retardant, to provide a moisture-resistant seal.

DIRECT BURIAL SPLICE CONNECTOR KIT

Designed for splicing underground wire connectors and moisture-sealing 2 or more conductors for remote control circuits in irrigation and landscaping. Insulator tube is prefilled. Splice is reenterable. No crimping tools are required. Kit includes 2 tubes of sealant and 2 connectors. UL Listed for direct burial.

Motor Pigtail Connectors

- Tin-plated copper
- For 600V, 90°C applications

Quick-connectors provide fast, reliable electric motor changeout without bolting or taping. Snap-together assembly meets or exceeds the electrical and mechanical performance of bolted connections. Constructed with louvered contact bands. Equal body sizes can be mixed and matched. Reusable thermoplastic elastomer insulation boots keep assembly small for tight motor housings. UL Listed and CSA Certified.

POLARIS™ nsi BURNDY® Blackburn® Multitap Connectors

These connectors are suitable for connecting two or more wires, and feature removable access plugs, and are abrasion- and chemical-resistant. Insulated with specifically formulated high-strength dielectric and molded for precise fit. Suitable for use with aluminum and/or copper conductors.

Power Distribution Blocks

- Aluminum block, except where noted
- Accept aluminum or copper wire
- 600V appliance and industrial rating

These efficient blocks splice cables or split primary power into a wide range of secondary circuits and provide a fixed tap-off point. Save splicing and taping time for contractor rework. UL Recognized and CSA Certified.

NEMA Terminal Blocks, Circuit Protectors, and Fuse Block

- Terminal block temp. range: -40° to 257°F (-40° to 125°C)
- Terminal and fuse block max. 600VAC

Box lug terminal blocks are suitable for use with stranded or solid copper wire. Hardware is recessed into the molding. Built-in wire strip gauge and marking area. Terminal and fuse blocks are rated UL 94 V-2 for flammability.

Mounting: All except 5B364 and 2DC71 have a snap-off arm on the terminal block.

2DD09 includes banana test plug adapter.

35mm DIN Mounting Channels

Symmetrical, prepunched rails are in compliance with EN 50022 standard (DIN 46277-3). Priced each; shipped in pkg. of 10, sold individually in-store only.

5B357 and 2DF49 are galvanized steel.

IEC-Style Terminal Blocks

Schneider Electric

- DIN rail mountable

Feature fast and reliable connection. Resist vibration and shocks, with a wide choice of connection options. Provide the possibility of testing all terminal blocks. Help ensure the quality and operational availability of equipment, and optimizes installation set up and operation. UL Recognized and CSA Certified.

Self-Retracting Cord Reels

Cord reels hold extension cords to provide access and storage while protecting them from tangling, kinking, and other damage. The cord can be extended to exactly the length needed to power equipment located at a distance from a power source. **Self-retracting cord reels** automatically wind extended cord back on the reel. **Stainless steel self-retracting cord reels** are resistant to rust and corrosion. **Reverse feed self-retracting cord reels** are ideal for mounting to mobile equipment.

Self-Retracting Hardwired Cord Reels

These reels allow wires in a power cord to be attached for a permanent connection. Mount these reels out of the way in a central location, such as on a wall or ceiling, to keep a workspace organized and help reduce tripping hazards.

Hand-Winding Cord Reels

Designed with a handle or knob, these reels are typically used with lightweight or shorter cords in retail or small business applications, where rewinding the cord manually doesn't take too much effort.

Motor-Driven Cord Reels

These cord reels have an electric motor that automatically extends and retracts long extension cords in environments such as tunnels and mines, which can require a higher force than is provided by hand-winding or self-retracting cord reels. They usually operate at a slow speed and provide a steady tension on the cord, which helps prevent overstretching and damage.

Hazardous Location Cord Reels

These cord reels are used in locations where exposure to flammable gases, combustible dusts, or ignitable fibers is common, such as mining and chemical-manufacturing settings. They are typically mounted on a wall or ceiling near the place of intended use.

Lighted Cord Reels

- 120V AC

These reels hold power cords with attached lamps to provide portable lighting in areas without a nearby power source. The reels can be mounted on walls or ceilings, and the lights have hanging hooks for hands-free use.

LED lamps last longer and use significantly less energy than fluorescent or incandescent lamps. They also produce very little heat and can withstand vibration and rough handling. **Incandescent lamps** are more economical than LED lamps, but they consume more power and have a shorter lifespan. Lighted cord reels with receptacles can receive an electrical plug.

Indoor Extension Cords

These cords are often used in shorter lengths (less than 25 ft.) than outdoor extension cords to accommodate indoor applications. They have a lightweight jacket that is not suitable for wide temperature ranges and therefore should not be used outdoors.

Extension Cord Adapters

These adapters create compatibility between a device's power cord plug and a power outlet receptacle when they are of different types. They have a plug at one end that connects to the power source and a receptacle at the other end that the device plugs into. They are typically used to supply power to devices in industrial applications, such as power tools and machinery, where a variety of plug types and outlets are common. The current should be limited to the adapter's lowest rating to help prevent overheating.

Flexiduct Extension Cords

These extension cords consist of flexible electrical cable with an integrated lay-flat cord. They are typically used in high-traffic areas to help minimize tripping hazards and reduce wear to the cord. They have a plug at one end that connects to the power source and a metal outlet box with two receptacles at the other end that devices plug into. They are ideal for use in office and commercial settings where there is heavy foot traffic, such as lobbies, hotels and conventions, and trade shows.

POWER FIRST

Indoor Power Supply Cords

These cords are portable lengths of electrical cable used to connect devices and appliances to a power source in indoor applications. They are typically used on equipment that doesn't come with a power cord, such as dryers, ranges, and computer monitors. They have a molded plug at one end that connects to an electrical outlet and a socket or bare wire at the other end that is attached or wired to the device. The power cord should match the amperage rating of the device and plug configuration of the outlet.

Plug-In and Line Cord GFCIs

These GFCIs are used with power cords to help protect users from ground faults. They have an integrated circuit breaker that turns off the power when a current overload is detected, helping protect users from electrical burns, shock, or electrocution. They are commonly used in temporary power applications to provide protection where electrical circuits may come in contact with water, such as in garages or outdoors, and a standard GFCI receptacle is not available. Plug-in GFCIs plug directly into a wall outlet and have one or more receptacles that devices plug into. Inline GFCIs are lengths of cord with an outlet plug at one end and one or more receptacles at the other end that devices plug into.

Manual Reset Type—These GFCIs require the user to reset it after a power outage by pushing the reset button to restore power to the connected equipment. They are typically used in industrial or construction applications where a sudden resumption in power could be dangerous if equipment starts back up unexpectedly, such as power drills, saws, and grinders.

Automatic Reset Type—These GFCIs automatically reset after a power interruption to immediately restart the connected device as soon as the power supply is restored. They're typically used with equipment intended for continuous use where a temporary power failure is likely and undesirable, such as pumps, pressure washers, portable signs or lighting, and engine heaters.

Hardwired 30A GFCIs

These GFCIs are hardwired to machinery or distribution boards. When a current overload is detected, it will trip a circuit breaker to stop the power and protect users from burns, shock, or electrocution. They're typically used in permanent power applications where electrical circuits may come in contact with moisture. UL Listed and CSA Certified.

Surge-Protected Power Strips

These power strips protect connected devices from damage due to unexpected voltage increases. They have a surge protector that absorbs the excess voltage and diverts it to the ground wire, preventing it from reaching the connected equipment. A surge protector's joule rating determines how much energy it can absorb before it fails. They are suitable for homes, offices, medical facilities, and industrial environments where protection from power spikes is needed.

Total Number of Outlets	Cord Length	Rated Joules	Max. Surge Current	Max. Amps	Plug Configuration	Receptacle Configuration	Color	Power Indicator	Coax Surge Protection	Telephone Surge Protection	USB Protection	L	W	Brand	Item No.

Power Distribution Box

See pages 326 and 327 for NEMA plug configurations.

CEP—1-phase GFCI. Boxes are UL and C-UL Listed. Boxes with Automatic Reset include 6 individually protected GFCI circuits.

- Open ground and open neutral protection

Hubbell Wiring Device-Kellems—Meets NEC requirements and is listed at the latest UL 1640 standard. Provide temporary power access for 20A and 30A straight-blade or Twist-Lock devices in a metal NEMA 3R raintight enclosure. UL Listed; 1DNU8 is also CSA Certified.

50A-input models are for use with Twist-Lock connector 3D322; see page 330.

Power First—GFCI distribution boxes feature outlets with circuit breaker protection. Raintight NEMA 3R construction. UL, C-UL, and ETL Listed.

Twistable Drop-Over Cable Ramps

- ABS material

Twistable drop-over cable ramps articulate from side to side, allowing them to turn corners and adapt to an area's layout while maintaining a flat profile. They have an interlocking design which allows for reconfigurations, repairs, or replacements without moving cable or hose.

Drop-Over Modular Cable Ramps

- Polyurethane material

Drop-over modular cable ramps are placed over cable and hose lines that run along the ground. They have an interlocking design, which allows for reconfigurations, repairs, or replacements without moving cable or hose. These cable ramps prevent damage due to foot and vehicle traffic.

Aluminum Drop-Over Cable Ramps

- Aluminum material

Cable ramps drop over power cords, electrical cable, and hydraulic hose to protect them from damage and prevent tripping hazards. They're made from durable aluminum and support heavy loads from forklifts, carts, vehicles, and personnel.

ADA Accessibility Cable Ramps

- Polyurethane material

ADA accessibility ramps cover cable and hose while complying with ADA requirements. They provide a more gradual slope than other cable ramps and are slip-resistant to ensure smooth crossover for wheelchairs and pedestrians with disabilities.

Light-Duty Pedestrian Cable Covers

Light-duty pedestrian cable covers protect power cords and electrical cable from incidental damage caused by light pedestrian traffic. They also provide a smooth surface to reduce tripping hazards.

CableTrak Hose and Cable Carrier System

- Easy assembly with flat-blade screwdriver
- Install vertically or horizontally
- Fiberglass-reinforced, nonabrasive black nylon

Flexible, self-lubricating carriers guide and protect hoses and cables installed between fixed and moving sections of a machine. Cable is installed through the carrier's flip-top for minimal abrasion. Excellent high-speed performance.

Braided Sleeving for Wire and Cable Management

TECHFLEX Braided Sleeving Products

- UL Recognized

For bundling, managing, and protecting wires, cables, and hoses. Most are black (Flexo Flame-Retardant has white tracer). ThermaShield are silver and FireFlex are red. Most types cut cleanly with a hot knife. Flexo F6 Self-Wrap, DuraFlex, ThermaShield tubes and wrap, and Flexo Clean-Cut cut easily with scissors or knife. Insultherm cuts with scissors only.

DURAFLEX HARSH ENVIRONMENT

- Thick, tightly woven nylon
- Resists UV, chemicals, gasoline, salt, snags, cuts, abrasion, and penetration
- Deflects high-pressure hose ruptures
- MSHA

Rot resistant for continuous outdoor use.

WELD WRAP

- Coated fiberglass
- Withstands temps. to 1000°F
- Resists abrasion and punctures
- FED 191/5093

Protects hoses and wiring from molten welding splatter and sparks.

THERMASHIELD REFLECTIVE

- Withstands temps. to 500°F
- Resists gasoline, engine chemicals, cuts, and abrasion

Aluminized heat shield is bonded to tightly braided, insulating fiberglass. Wrap uses a high-temp. adhesive.

DURAWRAP HARSH ENVIRONMENT

- Tightly woven ballistic nylon
- Hook-and-loop closure
- Resists UV, abrasion, gasoline, engine chemicals, and salt water
- Deflects high-pressure hose ruptures

Overlarge sleeving can be used over chain as a scuff preventive.

FIREFLEX HIGH-TEMPERATURE

- Silicone-jacketed fiberglass
- Nonconductive
- Stable to 500°F
- Resists abrasion and punctures

0.08"-thick sleeving bends to follow tight curves. For racing vehicles and similarly demanding industries.

GORILLA SLEEVE

- Flat-filament nylon
- Resists UV, gasoline, engine chemicals, and salt water

0.046" thick for extreme abrasion and cut resistance.

PANDUIT®

Wire Protection Wrap

SPIRAL WRAP
- Natural color
- Temp. range: -40° to 122°F

Allows breakouts of single/ multiple wires. Great for harnessing multiple cables into a single manageable bundle. Each roll includes installation tool. UL Recognized.

PAN-WRAP™
- Black color
- Temp. range: -40° to 122°F

Slot pattern provides improved flexibility and abrasion protection in any application. Wall design facilitates cable breakouts. UL Recognized.

Pan-Wrap™ Installation Tools
- Black color
- Temp. range: -40° to 122°F

180° opening allows easy loading of max. bundle diameters to considerably speed Pan-Wrap™ installation.

All Purpose Nylon Cable Ties

All purpose cable ties bundle and secure wire and cable in general applications where specialized cable ties are not required, such as facility maintenance, housekeeping, and janitorial. Fine adjustment cable ties have a stainless steel barb that can be locked at any point along the strap to adjust to the exact size of a bundle

Metal Cable Ties

Metal cable ties are used for tying, lashing, and identifying materials in harsh environments like boiler rooms, chemical plants, refineries, and paper mills. They have excellent corrosion resistance and durability and can withstand high temperatures.

PANDUIT Ty-Rap RIP-TIE

Slotted Hook-and-Loop Cable Ties

They wrap around wire, cable, cords, and other materials and then fasten onto themselves. They can be pulled apart and refastened, so they're easier to adjust than other cable ties. They're also reusable, so they're ideal for bundles that frequently change size or need continuous access.

Photocontrols

INTERMATIC

Designed for outdoor use, these commercial-grade thermal photocontrols (except instant On/Off) feature a built-in delay to prevent false cycling due to car headlights, lightning, etc. Cadmium sulfide photocell and sonic-welded polycarbonate case and lens. UL Listed and CSA Certified (except 5U789).

FIXED, DIE-CAST ALUMINUM

Specification-grade contactors feature heavy-duty housing and base; gasketed for max. weather protection. For parking lot and building perimeter lighting and controlling outdoor signage lighting.

LEXAN

Material screens out ultraviolet rays for long service life.

Fixed- and Swivel-Mount—Impact- and vandal-resistant. Ultrasonically welded for max. strength. For flood and patio lamps and decorative lighting.

Flush-Mount—Mount in a weatherproof junction box for post lanterns and lighting fixtures. 4JNR2 includes single gang cover plate and gasket.

TURN-LOCK

Heavy-duty enclosures use high-impact UV-stabilized polypropylene materials for long service life. Color coded for voltage designation. Positive snap-action relays reduce bounce and prolong contact life.

Astronomical Lighting Controls

INTERMATIC

- Backup maintains program and time
- Steel enclosures and polycarbonate where noted have lock hasp

Timers automatically adjust daily for changing sunrise and sunset times, eliminating the need for separate photocontrol devices.

ET8000 SERIES

- Enclosures have ½" to ¾" knockouts (1 on the back and each side, 2 on bottom)
- Operating temp. range: -40° to 155°F

Automatically switch loads according to the preset weekly schedule with to-the-minute accuracy. Manual override. Automatic sunrise and sunset settings allow flexibility for applications where load switching differs each day of the week. CSA Certified. UL Listed.

ET90000 SERIES

- Operating temp. range: -40° to 120°F

Permits up to 4000 scheduled On/Off operations; turns On/Off at sunrise or sunset without a photo control device. Provides to-the-second accuracy. Ethernet port allows remote programming via PC; standard on all timers with 4 or more channels and on 1- or 2-channel timer models 13D101, 13D103, 13D105, and 13D107. Copies programming to other time switches for backup purposes via USB cable. Built-in supercapacitor maintains program during power outages. CSA Certified. UL Listed.

Surface/DIN Rail or Flush Mount Time Switches

INTERMATIC

- 21A SPDT contacts
- Captive trippers
- True clock face
- Clear plastic dust cover

These switches are designed to be mounted inside a control panel and can accommodate surface/DIN Rail or flush/panel mounting. Ideal for single-phase applications like lighting control, HVACR, pumps, motors, fan controls, access controls, OEM applications, agricultural facilities, and general purpose electrical circuits.

Description/ Special Features	Min. Time Setting	Max. Time Setting	H	W	D	Voltage	Mfr. Model	Item No.

***Rated 12 to 24VAC/DC.**

INTERMATIC

24-Hour and 7-Day Electromechanical Timers

- Heavy-duty clutchless gears prevent slipping
- Contacts are tungsten-rated to handle inrush currents 10 times their rating

Enclosures feature lock hasp and knockouts. Snap-out timing mechanism with manual On/Off override does not interfere with program. Day skipper adds the flexibility of omitting any day or days from the program. Self-lubricating, synchronous motors. Outdoor enclosures are rated NEMA 3R.

Note: Timers include trippers. Extra trippers are available on this page.

MULTIOPERATION

- Operating temp. range: -40° to 130°F

Provide up to 48 On/Off settings per day with 96 permanently fixed trippers.

7-DAY

Allow precise time-of-day scheduling with 7-day dial. Timers allow different settings for each day of the week.

Cycle Timers

TORK nsi MACROMATIC INTERMATIC

TORK®

60 captive tabs per dial provides up to 30 On/Off cycles.

PERCENTAGE CYCLE TIMERS

Tork®—Can alternately cycle 2 different loads. 2 control knobs set cycle repeat time and percentage operating time. Each knob has Hold setting for manual On/Off. Sealed for use in severe environments. UL Listed and CSA Certified.

- More than 900 jumperless cycle variations
- LED load status indicators

Intermatic®—Can be wired in series with a manual switch or time switch for time-of-day cycling applications. CSA Certified.

- 8 selectable total cycle durations: 30 sec.; 1, 3, 5, 10, 30 min.; and 1, 4 hr.
- Cycling pattern selectable from 3% to 97% of total cycle

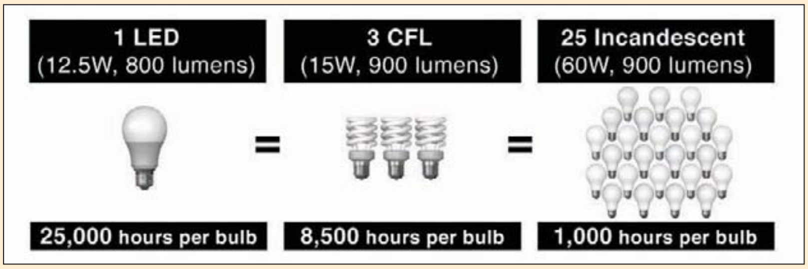
The Life of an LED Bulb

LED bulbs use significantly less energy and need to be replaced less often than other bulb types. Instead of burning out, LED bulbs typically undergo lumen reduction where their brightness fades over time as individual diodes in the bulbs begin to fail. An LED bulb is considered spent when its light output has decreased by 30%. Note: The life of an LED bulb (as measured in hours) and how that life compares to other bulb types is based on ideal conditions where the bulb is used in its intended application.



Understanding Color Temperature of a Light Bulb

Color temperature describes the hue and tone of white that a light bulb emits. It is measured numerically on the degrees Kelvin (K) scale. Light output at about 4000K is neutral white. Light output below 4000K gets warmer and yellower as the degrees Kelvin rating decreases. Light output above 4000K gets cooler and bluer as the degrees Kelvin rating increases.

Color Temperature	Warm/Medium	Neutral	Cool	Daylight
Kelvin Range	2700K - 3000K	3500K - 4100K	4100K - 5000K	6500K
Appearance	Orange/Yellow	White	Blue	Blue
Commercial and Industrial Spaces	Restaurants, Lobbies and Hotel Rooms, and Retail Stores	Offices, Classrooms, Supermarkets, Restrooms, and Breakrooms	Merchandisers Showrooms, Hospitals, and Parking Garages	Museums, Galleries, Task Lighting, Warehouses, and Manufacturing
Residential Environments	Living room, Dining room and Bedrooms	Kitchens, Bathrooms and Workspaces		Reading Areas and Outdoor lighting
Ambiance	Relaxing, Calming, and Friendly	Friendly, Inviting and Vibrant	Bright, Clean, and Invigorating	Energizing, Alert and Intense

Lumens and Watts

Lumens are a measure of how much light a bulb produces, its brightness. The higher the lumens, the brighter the light. Lumens, not watts, provide a basis for comparing the brightness of light bulbs. Watts is a measure of how much energy a light bulb uses. LED light bulbs are the most energy efficient light technology. They require the least energy to run compared to CFL, halogen, and incandescent bulbs of the same lumen output.

Lumens	LED	CFL	Halogen	Incandescent
450	6-8 Watts	9-13 Watts	25-29 Watts	40 Watts
800	9-12 Watts	14-16 Watts	40-43 Watts	60 Watts
1100	13-15 Watts	17-22 Watts	50-53 Watts	75 Watts
1600	16-20 Watts	23-30 Watts	70-72 Watts	100 Watts
2600	21-28 Watts	30-45 Watts	30-45 Watts	150 Watts

Color Rendering Index (CRI)

Color rendering describes how accurately a light source shows color as compared to a natural light source. It is measured on the Color Rendering Index (CRI), which is a scale from 0 to 100% with 100% representing the most crisp, vivid, and true-to-life color. Light sources with CRI ratings from 85 to 90 provide good color rendering. Light sources with CRI ratings of 90 or more provide excellent color rendering and are ideal for lighting photo studios and production floors where tasks require color differentiation.

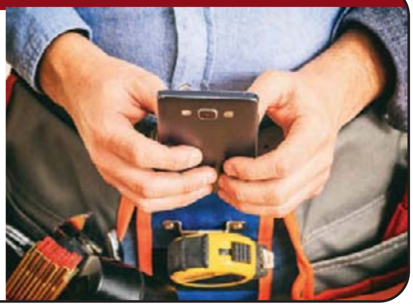
Lighting Certification

Lighting certification refers to product quality specifications and standards established by government agencies and nonprofit organizations.

DesignLights Consortium (DLC)
The DLC works with manufacturers, utility companies, and other partners to set product quality and energy efficiency standards.

DLC standards are numbered by version, with different numbers tied to specific sets of product requirements and higher numbers indicating newer versions.

Rebates for products meeting the standards may be available from regional energy providers.



Plug & Play LED General Purpose Linear Light Bulbs (UL Type A)

Install these bulbs in fluorescent lighting fixtures that are powered by ballasts. Avoid the expense of retrofitting lighting fixtures with LED drivers or wiring the bulbs into the building's power supply when switching lighting systems from fluorescent technology to LED technology. Users must verify that the light bulbs are compatible with the ballasts in the fixtures they will be installed in.

Ballast-Bypass LED General Purpose Linear Light Bulbs (UL Type B)

These bulbs do not require a ballast or driver to power the bulbs. They can be installed in compatible fluorescent lighting fixtures. They eliminate the risk of lighting outages due to faulty ballasts or drivers and avoid the expense of installing LED drivers when converting lighting systems. Ballast-bypass LED linear light bulbs require the fixtures to be wired into the building's power supply, so they are not suitable for facilities that have frequent power surges.

Separate-Driver LED General Purpose Linear Light Bulbs (UL Type C)

Current

The bulb and driver are designed to work together, which helps these bulbs perform more reliably than other types of LED linear light bulbs. The driver also protects the bulb from power quality issues, making the bulbs suitable for warehouses and industrial sites that experience power issues but still wish to convert their lighting system. They install in fluorescent lighting fixtures that have been retrofitted with a compatible LED driver to power the bulbs.

Medium Bi-Pin (G13) Base

These bulbs can be installed in a fluorescent lighting fixture that is powered by a ballast. If the fixture's ballast fails, the fixture can be wired directly into the building's power supply to power the bulb. Avoid the expense or replacing failed ballasts when switching lighting systems. Because users will need access to the lighting fixture to rewire it if the ballast fails, these bulbs are typically used in offices and other spaces where ceilings are 10 ft. high or less.

Hybrid LED General Purpose Linear Light Bulbs (UL Type A/C)

PHILIPS

Install in a fluorescent lighting fixture that is powered by a ballast. If the fixture's ballast fails, the fixture can be retrofitted with a compatible LED driver that provides power to the bulb. This spreads out the cost of converting lighting systems from fluorescent technology to LED technology. Users must verify that the light bulbs are compatible with the ballast in the fixture they will be installed in.

Safety Sleeves & Tube Holders

LumaPro®

Safety sleeves and tube holders keep glass shards and phosphors contained when linear light bulbs break, which eases cleanup and helps prevent injuries. They slip over LED or fluorescent linear bulbs to provide a shatterproof barrier that protects the bulb from impact, damage, dust, and moisture. Colored sleeves tint the light that's emitted from the bulb and can be used in ambient-lighting or accent-lighting applications as well as for marking safety areas, exits, or equipment.

Shatter-Resistant Linear Light Bulbs

Current shat-r-shield

A surface coating keeps broken glass, mercury, and phosphors contained if the bulbs burst or break. This prevents safety hazards by keeping the contaminants from spreading into the surrounding area. They are also used in areas where the light bulbs may be exposed to shaking or impacts, such as railway systems and freight elevators.

PHILIPS Current MaxLite

Plug & Play LED U-Bend Light Bulbs (UL Type A)

Install in fluorescent lighting fixtures powered by ballasts. Use of these bulbs avoids the expense of retrofitting lighting fixtures with LED drivers or wiring the bulbs into the building's power supply when switching lighting systems. Users must verify that the light bulbs are compatible with the ballasts in the fixtures they will be installed in.

Ballast-Bypass LED U-Bend Light Bulbs (UL Type B)

Ballast-bypass bulbs do not require a ballast or driver for power. Install in compatible fluorescent lighting fixtures. These bulbs eliminate the risk of lighting outages due to faulty ballasts or drivers and avoid the expense of installing LED drivers when converting lighting systems. They require the fixtures to be wired into the building's power supply, so they are not suitable for facilities that have frequent power surges.

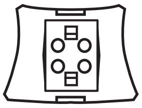
Fluorescent Circline Light Bulbs



4-Pin (G10q)

1V860

These compact bulbs consist of a tube that has been bent into a circle to provide even light distribution for general area lighting. They can fit into small spaces such as drum-style ceiling fixtures and magnifier lamps. Circline bulbs have bases with pins that plug into matching sockets on compatible light fixtures.

High-Intensity Discharge (HID) Lamp Information

HID lamps offer high light output and have longer life expectancy than incandescent bulbs. **LED** lamps use significantly less energy and need to be replaced less often than other HID lamp types. They reach full brightness instantly, produce very little heat, and can withstand temperature changes, vibration, and humidity. **Ceramic metal halide and metal halide** lamps offer better color rendering than high-pressure sodium and mercury vapor lamps and are used for indoor and outdoor lighting. **High-pressure sodium** and **mercury vapor** lamps are used for outdoor, security, and roadway lighting. Ceramic metal halide, metal halide, high-pressure sodium, and mercury vapor lamps take a few minutes to reach full brightness and must cool down before they can be restruck after turning off.

Quick Guide to Color

Color Temperature	Color Designation
1800K	Orange
1900-2200K	Warm Yellow
2700K	Soft White

EX39 Mogul Screw-Base HID & LED HID-Replacement Light Bulbs

The EX39 extended mogul screw base on these light bulbs has a 39mm dia. and a longer center terminal than an E39 base. The bulbs screw into both E39 sockets (typically found on enclosed fixtures) and protected EX39 sockets (typically found on open fixtures). These bulbs are used in fixtures with a high mounting height, such as street lights, floodlights, and high-bay and low-bay lights in warehouses and convention centers.

PHILIPS Current

Light Efficient Design SYLVANIA

E39 Mogul Screw-Base HID & LED HID-Replacement Light Bulbs

These light bulbs have an E39 mogul screw base with a 39mm dia. They screw into standard E39 sockets, which are typically found on enclosed fixtures. E39 mogul screw-base HID and LED HID-replacement are used in fixtures with a high mounting height, such as street lights, floodlights, and high-bay and low-bay lights in warehouses and convention centers.

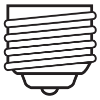
E26 Medium Screw-Base HID & LED HID-Replacement Light Bulbs

The most commonly used type of light bulb base, an E26 medium screw base has a 26mm dia. and screws into a compatible socket. E26 medium screw-base HID and LED HID-replacement bulbs are commonly used in post tops and bollards.



Medium Screw (E26) Base

Bayonet Base (B22d) Base

Light Efficient Design

B22d Bayonet-Base LED HID-Replacement Light Bulbs

The B22d bayonet base on these light bulbs is a 22mm-dia. base with two contacts on the bottom and lugs on either side that lock the bulb in place when the base is pushed into a compatible socket and twisted. These LED bulbs replace low-pressure sodium (LPS or SOX) HID bulbs in outdoor light fixtures.

shat-r-shield INC. The Protective Lighting Company

Shatter-Resistant HID Light Bulbs

A surface coating keeps broken glass, mercury, and phosphors contained if the bulbs burst or break, which prevents these harmful contaminants from spreading into the surrounding area. Shatter-resistant HID light bulbs are used in manufacturing plants, food-processing facilities, and other settings where product contamination must be avoided. They are also used in areas where they may be exposed to shaking or impacts.

General Purpose GU24-Base Light Bulbs

The GU24 base on these light bulbs pushes into a GU24 socket and then twists slightly to lock it in place. General purpose GU24-base light bulbs are used in new construction projects, restaurants, hotels, and other residential or commercial facilities that are required to use energy-efficient LED bulbs.

LED Plant Growth Bulbs

- 20,000 hr Rated Life

Run cool so they can be placed within inches of plants without causing wilt or burn. Grow lights emit light in color spectrums that optimize seedling growth, stem and leaf growth, or budding and flowering to grow plants indoors. They are rated for wet locations to withstand high humidity and resist water sprays. Grow lights are used in greenhouses, hydroponic gardening, vertical farming, agricultural research, and other indoor growth applications.

Shatter-Resistant Spot, Reflector & Flood Light Bulbs

The surface coating on these bulbs keeps broken glass, mercury, and phosphors contained if the bulbs burst or break, preventing the contaminants from spreading into the surrounding area. The bulbs have a reflective inner surface that intensifies their light output. Shatter-resistant bulbs are used in manufacturing plants, food-processing facilities, and other settings where product contamination must be avoided. They are also used in areas where the light bulbs may be exposed to shaking or impacts.

BR and R Light Bulbs

PHILIPS | FEIT Electric | SATCO | NUVO | SYLVANIA | Current | shat-r-shield INC. The Protective Lighting Company

Bulged reflector (BR) light bulbs have a reflector that prevents light from becoming trapped in the bulbs' neck and sides and instead directs the light forward out the bulbs' top. These bulbs are commonly used as floodlights and corridor lights. Reflector (R) light bulbs have a reflective inner surface that intensifies the bulbs' light output. They install into track lights, can lights, and accent lights for general lighting applications.

MR Light Bulbs

Multifaceted reflector (MR) light bulbs have several internal reflectors that direct light at a precise angle as it exits the bulbs. MR bulbs produce a narrow beam of light and are used in display cases and small task lights where the bulb is spotlighting objects that are a short distance away. These compact bulbs also fit into tight areas where the bulb will be concealed, such as elevator lights.

2-Pin Base T-Shaped Miniature Light Bulbs

These miniature light bulbs have two pins on the bottom of their base and are pushed into a compatible socket to install. The base type for each bulb has a number that indicates the distance between the pins, in millimeters. For example, a G4 base has two pins that are spaced 4mm apart.

Prefocus-Base T-Shaped Miniature Light Bulbs

The prefocus bases on these T-shaped miniature light bulbs have a ring or collar that helps ensure the bulbs are properly aligned when they are pushed into a compatible socket to install. Also known as P28s bases, medium prefocus light bulb bases have a 28mm dia. They have a smooth cap shape with two dimples on the sides and one contact on the bottom.

Bulb Eaters and Lamp Crushing Systems and Accessories

Bulb Eater 3
20VR90

401M81

Units safely crush fluorescent lamps into 100% recyclable material. Activated carbon and dust filters capture and neutralize over 99.99% of mercury vapors released in the process. Systems include one straight lamp tube, filter combo kit, spinner assembly, and carbon filter. 20VR90 accepts all fluorescent lamps when 20VR91 is added.

Notes: Use and recycling of the crushed lamps is regulated by the EPA. Not available in CA, CT, ME, MN, MO, NH, PA, RI, VT, WV. Permits required in NJ and MI; application required in TX and VA.

Lamps must be crushed in building where used.

Battery Recycling

Battery recycling products help users comply with regulations for recycling batteries, which may contain hazardous materials. **Prepaid recycling and disposal kits** come with containers, preprinted shipping labels, and shipping instructions for recycling specific types of batteries. Prepaid shipping fees and recycling costs are included with the kits, and a certificate of reclamation is available upon request. **Recycling tubes for standard batteries** can be placed in high-traffic areas such as copy rooms and supply rooms to collect dead batteries for recycling.

Recycling Kits

Kits come with the necessary items for recycling specific quantities of light bulbs, ballasts, and other products that contain hazardous materials in compliance with environmental regulations. RecyclePak® Kits include container (except where noted), preprinted address label; and certificate of reclamation. EverLights Kits have a pre-labeled container with state-specific universal waste shipping instructions and provide a certificate of reclamation upon request.

Note: For customers in Alaska, Hawaii, Arkansas, the Virgin Islands, Guam, and Puerto Rico, please call 1-800-GRAINGER (472-4643).

LUTRON PHILIPS ADVANCE KEYSTONE Current

LED Drivers for Fixture Arrays

These LED drivers protect fixtures that use LED arrays from power supply fluctuations, which can reduce light output quality. They convert high-voltage AC into low-voltage DC to power the arrays. Drivers and bulbs must be the same brand for proper operation.

LED Drivers for Type C Light Bulbs

LED drivers for Type C light bulbs are used to retrofit fluorescent lighting fixtures so they can be used with UL Type C LED linear light bulbs, which are more energy efficient than fluorescent bulbs. The drivers allow facilities to convert their fluorescent lighting fixtures to LED technology without the expense of replacing the fixtures entirely. They protect UL Type C LED light bulbs from damaging fluctuations in the power supply that can reduce the quality of their light output, and they power the bulbs by converting high-voltage alternating current (AC) into low-voltage direct current (DC).

Programmable LED Drivers

Drivers can be programmed to provide a specific voltage and current output that meets the power requirements of particular fixtures. Operators enter the desired specifications into a compatible programming device and then plug the device into the driver to upload the specifications to the driver. Once the driver is programmed to the desired specs, it can be installed in the fixture.

Proprietary Continuous Dimming Fluorescent Ballasts

- Programmed Rapid-Start Ballast Start Type

Proprietary continuous dimming ballasts are only compatible with continuous dimming controls from the same manufacturer and series. The ballasts and dimming controls interface precisely with each other, which makes them more reliable than other types of ballasts and dimming controls. These ballasts allow a light fixture's light output to be adjusted from 100% light output all the way down to the ballasts' lowest light output setting. They are most often used in fluorescent fixtures in lighting system retrofits or new construction lighting installations for large facilities.

Line-Voltage Continuous Dimming Fluorescent Ballasts

Line-voltage continuous dimming ballasts are compatible with line-voltage continuous dimming controls. They receive control signals through their power leads, so they don't require any extra wiring to connect them to the lighting controls. The ballasts allow a fixture's light output to be adjusted from 100% light output all the way down to the ballasts' lowest light output setting and are used in fluorescent fixtures in conference rooms, private offices, auditoriums, and other areas where lights will be dimmed infrequently.

0-10V Continuous Dimming Fluorescent Ballasts

These continuous dimming ballasts are compatible with 0-10V continuous dimming controls and use a low-voltage analog control signal to dim a light fixture's light output to any level between 100% light output and the ballasts' lowest light output setting. They are used in fluorescent fixtures in a wide variety of settings, but may not be suitable for lighting systems that require long wire runs to connect the ballasts to the lighting controls.

2-Phase Step Dimming Fluorescent Ballasts

2LMW6

Two-phase step dimming ballasts are compatible with two-phase step dimming controls and are used in fluorescent fixtures in classrooms, hallways, and other settings that don't require a wide range of dimming. They alter the supply voltage to dim the fixtures' light output to specific levels, for example 100% (full brightness), 50%, and 0% (off).

Instant-Start Electronic Fluorescent Ballasts

Instant-start electronic fluorescent ballasts turn on lights immediately and are used in fluorescent fixtures in warehouses and other areas where lights are left on for long periods of time. These non-dimmable ballasts provide high voltage at start-up and should not be used with occupancy sensors or other lighting controls that turn lights on or off frequently.

Sign Ballasts

PHILIPS ADVANCE

Sign ballasts provide power to light up T8HO or T12HO high-output light bulbs used in indoor and outdoor signs. They withstand cold temperatures, rain, and other harsh weather. These ballasts are designed power specific quantities and lengths of bulbs. When one bulb in the circuit fails, the other bulbs will stay lit so the burnt-out bulb can be quickly identified and replaced.

Electronic HID Ballasts

Electronic HID ballasts are more energy-efficient and less damaging to HID bulbs than other types of HID ballasts, and they provide accurate power regulation for consistent light output and light quality across the life of the bulbs. They also tend to be smaller and weigh less than other styles of HID ballasts. For use with metal-halide HID bulbs.

HID Ballast Kits

HID ballast kits contain HID ballasts, capacitors, ignitors, and other parts that are used to maintain HID light fixtures. They are used when replacing old ballasts and their coordinating components in HID fixtures.

HID Capacitors

HID capacitors install into ballasts on HID light fixtures to help prevent the bulbs in the fixtures from flickering. They help regulate the voltage and current going to the bulbs and ensure the bulbs can produce a steady light output. HID capacitors require regular replacement to ensure they continue to operate HID bulbs at full brightness.

Emergency Lighting Inverters

- Provide at least 90 min. emergency lighting
- Fixture Dependent Lumens
- 120/277VAC input

Compatible with most types of lighting fixtures, including light fixtures that do not have ballasts or drivers inside the fixture. One inverter can supply backup power to multiple lighting fixtures. The inverters are mounted outside of lighting fixtures and do not need to be installed near the fixtures.

Max. Bulb Watts	Bulb Type	Battery Type	Includes	CA Title 20 Compliant	Item No.

Emergency Lighting Devices for Generator Systems

- 24 hr. Emergency Illumination Time
- Fixture Dependent Lumens
- 120/277VAC input

Also known as generator transfer devices, or GTDs, these devices will turn on light fixtures during a power outage even if the switches that control the fixtures are in the off position. They are used with lighting systems in hospitals, universities, and other large facilities that have backup generators or central inverter systems that kick in to supply power to the facilities in the event of a power outage.

General Purpose LED Lighted Exit Signs

- 120/277 VAC
- Universal chevron knockouts indicate direction

Signs mark exits and passages to guide people out of public areas such as schools, offices, and commercial buildings. Mount near exit route doors and doorways, and hardwire into an electrical system to keep them lit for visibility. Signs with battery backup automatically switch to the battery during a power outage. Signs without battery backup are commonly used in buildings with emergency systems that supply power during an outage. Check local safety codes for requirements regarding material, lettering, graphics or specific color, size, and arrangement.

Plastic and **Aluminum** signs are lightweight and won't rust.

Steel signs are heavy-duty for use in locations that may be subject to impact or abuse.

Running Man sign provides a universal, text-free message that directs people to exits.

Wheelchair sign has a pictogram with an international symbol of accessibility to provide direction to exits that are wheelchair accessible.

Edge-Lit LED Exit Signs

- 120/277 VAC
- Universal chevron knockouts indicate direction

Signs spread light uniformly across the face to optimize visibility for marking exits and passages to guide people out of buildings. The slim housing has a trim, upscale look, making them a preferred choice for hotels, conference rooms, and offices with high-end furnishings and finishes.

Surface-mount signs offer versatile mounting to a ceiling or wall.

Recess-mount signs are mounted with the housing concealed in a ceiling cutout. Helps protect internal components from damage and provides a cleaner look.

Self-Luminous Exit Signs

- Universal chevron knockouts indicate direction

Signs contain sealed tritium and phosphor that emit a constant glow without requiring electricity, batteries, or an external light source. Eliminates the need for hardwiring, battery replacement or other maintenance, and testing protocols. Can withstand extreme temperatures and washdowns to allow mounting in dock areas, food processing facilities, chemical plants and other hazardous locations, as well as areas without electricity. Regulated by the US Nuclear Regulatory Commission (NRC) and require disposal in accordance with NRC regulations at the end of their 10- or 20-year life cycle.

LED Exit Sign Retrofit Kits

Kits convert lighted exit signs from incandescent or halogen to LED. Include components that fit into the housing of an existing exit sign for quick, easy installation.

Candelabra kits include screw-base lamps and adapters to fit matching sockets in an existing sign.

Direct Wire kits include an LED light bar that replaces lamps and sockets and connects to existing wiring in a hardwired exit sign.

Wet Location Combination Exit Signs with Emergency Lights

- 120/277 VAC
- Universal chevron knockouts indicate direction
- Provide at least 90 min. emergency lighting
- CA title 20 compliant

Exit light combos hardwire into an electrical system and automatically switch to battery backup during a power loss to keep the exit sign lit and turn on the emergency lights. For use in areas where signs may be exposed to water drips, splash or spray. Select signs are rated for water protection.

Plastic and **Aluminum** signs are lightweight and corrosion resistant.

Fiberglass signs can withstand heavy-duty use in locations that may be subject to impact or abuse.

Combination LED Exit Signs with Emergency Lights

- 120/277 VAC
- Universal chevron knockouts indicate direction

Combo signs mark exits and illuminate pathways to guide evacuations from buildings. Units hardwire into an electrical system and automatically switch to battery backup during a power loss to keep the exit sign lit and turn on the emergency lights. Units meet requirements for exit signs along an egress path, at doorways leading to exits, and at exits. Must be installed and regularly tested in accordance with local safety codes.

General Purpose Emergency Lights

Lights automatically switch on when power goes out and illuminate pathways toward exits in public areas such as schools, offices, and commercial buildings. Run on batteries or have a battery backup to operate independently of hardwired fixtures. Must be installed and regularly tested in accordance with local safety codes.

Plastic lights are lightweight and won't rust.

Steel lights are heavy-duty for use in areas that may be subject to impact or abuse.

Recess-mount lights install into a cutout to conceal the fixture and protect it from damage.

Grid-mount strip-style lights fit into an existing section of T-bar to blend into a drop ceiling for a seamless look.

Wet Location Emergency Lights

Lights automatically switch on when power goes out and illuminate pathways toward exits.

Plastic lights are economical, lightweight, and won't rust.

Aluminum lights provide an upscale look for high-end commercial settings. Low-profile, corrosion-resistant aluminum housing fits closely against surfaces and protects against moisture and rain for outdoor use.

COMPASS · LITHONIA LIGHTING · DUAL LITE · Big Beam Emergency Lighting

Remote Head Emergency Lights

- Adjustable light heads

Lights supplement illumination from primary emergency lighting in the event of a power loss. Connect to a compatible remote-capable emergency or exit light and draw power from it during an electrical outage. Remote heads provide coverage around corners, outside exits, and in areas primary emergency lights can't reach.

Plastic lights are economical, lightweight, and won't rust.

Aluminum lights are lightweight and corrosion resistant.

Steel lights are heavy-duty for use in areas that may be subject to impact or abuse.

Vandal Guard
3XE33

Emergency Light Covers and Shields

Light covers are wire guards that mount over emergency lights and exit signs to protect against impact and scrapes.

Vandal guards are clear, solid polycarbonate shields that totally enclose emergency lights and exit signs to protect them from damage and tampering.

For information on Lighting Certification, see page 422.

2 ft. x 4 ft. LED Panels & Troffers

- 120/277V AC

LED fixtures can replace fixtures of the same size that use 2 to 6 linear light bulbs. They have built-in LED arrays so there are no light bulbs to install or replace. Commonly used to light large classrooms, hallways, office spaces, or department stores.

Center-Basket Lens—Lens has a curved middle section that reflects light to disperse it across a wider area than a flat lens. It also softens lighting to reduce harshness.

Flat Lens—Lens focuses light downward and reduces glare to provide a smooth, consistent lighting effect.

Flat Lens with Controls—Integrated controls on these LED panels allow use with lighting control systems to operate sensors, dimmers, or other control features.

Lumen & Color Temp-Selectable Flat Lens—Lumen and color temp-selectable LED panels have inner switches for choosing light output and color tone settings to suit a room or application.

2 ft. x 2 ft. LED Panels & Troffers

- 120/277V AC

LED fixtures can replace fixtures of the same size that use U-bend light bulbs or 1 to 4 fluorescent linear light bulbs. Commonly used to light spaces where larger fixtures would provide too much direct light.

Center-Basket Lens—Lens has a curved middle section that reflects light to disperse it across a wider area than a flat lens. It also softens lighting to reduce harshness.

Center-Basket Lens with Controls—Integrated controls allow use with lighting control systems to operate sensors, dimmers, or other control features.

Flat Lens—Lens focuses light downward and reduces glare to provide a smooth, consistent lighting effect.

Flat Lens with Controls—Integrated controls on these LED panels allow use with lighting control systems to operate sensors, dimmers, or other control features.

Lumen & Color Temp-Selectable Flat Lens—Lumen and color temp-selectable LED panels have inner switches for choosing light output and color tone settings to suit a room or application.

Center-Basket Lens
45CA06

Flat Lens
420V72

1 ft. x 4 ft. LED Panels & Troffers

- 120/277V AC
- Dimmable

LED fixtures can replace fixtures of the same size that use 1 or 2 fluorescent linear light bulbs. They use significantly less energy than fluorescent troffers and have built-in LED arrays so there are no light bulbs to install or replace. The 1 x 4 size is used to light narrow conference rooms, corridors, and other spaces that need a large amount of light but can't accommodate a larger fixture.

Center-Basket Lens—Lens has a curved middle section that reflects light to disperse it across a wider area than a flat lens. It also softens lighting to reduce harshness.

Flat Lens—Lens focuses light downward and reduces glare to provide a smooth, consistent lighting effect.

Flat Lens with Controls—Integrated controls on these LED panels allow use with lighting control systems to operate sensors, dimmers, or other control features.

Lumen & Color Temp-Selectable Flat Lens—Lumen and color temp-selectable LED panels have inner switches for choosing light output and color tone settings to suit a room or application.

Fluorescent Troffers

- Electronic ballast
- Non-dimmable

Troffers mount in drop ceiling grids to supply a large amount of light for spaces such as offices, classrooms, retail settings, and hallways. They use linear or U-bend light bulbs in a size that matches the fixture and with a base type that matches the fixture ballast. The fixtures accept fluorescent bulbs and some types of LED bulbs.

LED Light Bars

- 120/277V AC
- Dimmable

LED retrofits maintain the look of a fixture and connect to the existing housing so that the fixture doesn't have to be completely removed, replaced, and rewired. They fit into existing fixtures of a compatible size and shape to convert them to LED technology for reduced operating costs.

LED Volumetric Retrofit Kits

Columbia LIGHTING | LITHONIA LIGHTING | PHILIPS

- 120/277V AC

Retrofit kits convert fluorescent troffers to an LED fixture with a center-basket lens that reflects light to disperse it across a wider area than a flat lens. The center-basket lens softens lighting to reduce harshness and has a more appealing design than a flat lens. These kits have built-in LED arrays so there are no bulbs to install or replace.

LED Strip Light Retrofit Kits

KEYSTONE | Columbia LIGHTING

- 120/277V AC
- Dimmable

Kits convert fluorescent strip lights to LED technology to reduce operating costs. They use even less energy than fluorescent fixtures fitted with plug-and-play LED light bulbs, and they have built-in LED arrays so there are no bulbs to install or replace. The kits allow the base of the existing fixture to remain in place while replacing the side framing, interior components, and bulb with an LED strip.

LED Wraparound Lights

Lights have a lens that extends up the sides of the fixture to spread light over a wider area than recessed troffers and panels. Also called wraps, these linear surface-mount fixtures uniformly disperse large amounts of light for general lighting in offices, retail spaces, and healthcare settings. They are typically installed on drywall ceilings. LED lights use significantly less energy than fluorescent lights and have built-in LED arrays so there are no light bulbs to install or replace.

LED Strip Lights

Linear surface-mount fixtures have a housing that is slightly larger than the light bulb it holds. These LED lights use significantly less energy than fluorescent lights and have built-in LED arrays so there are no light bulbs to install or replace. Depending on their size and lens style, they are used for general lighting in applications ranging from workshops, access corridors, and back-of-house areas to retail spaces, hospitality settings, and manufacturing areas.

Linear LED Task Lighting

- 120/277V AC
- Dimmable

Light bars are easily installed with included magnetic clips for under cabinet, work area, display, or task lighting. Offer 3 wattages and 3 color temperatures in a single unit, except base model 61HP81. Suitable for dry or damp locations.

ACCESSORIES

Connectors and cables make it easy to connect power and control wires from one light bar to another. Multiple bars can be connected on one incoming power cable. DIM units link all connections. NODIM units link only AC power. **Emergency battery backup** allows for continuous lighting for a minimum of 90 min. during power outage or emergency situation. **Occupancy sensor** is a high frequency motion/daylight sensor that plugs directly into light bar. **Space connector** can be used when retrofitting fixtures, to bring the length of the LED bar to a standard dimension. **End caps** prevent tampering and create a finished look.

Fluorescent Strip Lights

- Electronic ballast
- Non-dimmable
- Lamps not included

Linear surface-mount fixtures have a housing that's slightly larger than the light bulbs it holds. They have no lens or cover, so they are well suited for supplying direct, general light in workshops, access corridors, and other spaces where the exposed bulbs are unlikely to be hit. They are typically mounted to ceilings but are sometimes used with chains for suspension mounting. They use linear light bulbs in a size that matches the fixture and with a base type that matches the fixture ballast.

Fluorescent Wall-Mounted Lights

- Electronic ballast
- Non-dimmable
- Lamps not included

Wall-mounted light fixtures supply light in areas such as hallways, lobbies, and restrooms. They supplement general lighting in dim corners of large areas or provide primary lighting for small spaces. They use linear light bulbs in a size that matches the fixture and with a base type that matches the fixture ballast. The fixtures accept fluorescent bulbs and some types of LED bulbs.

Fluorescent Wraparound Lights

- Electronic ballast
- Non-dimmable
- Lamps not included

Lights have a lens that extends up the sides of the fixture to spread light over a wider area than recessed troffers and panels. Also called wraps, these linear surface-mount fixtures uniformly disperse large amounts of light for general lighting in offices, retail spaces, and healthcare settings. They are typically installed on drywall ceilings. They use linear light bulbs in a size that matches the fixture and with a base type that matches the fixture ballast. The fixtures accept fluorescent bulbs and some types of LED bulbs.

Columbia LIGHTING

LED Wall-Mounted Lights

- 120/277V AC
- Dimmable

These lights attach to a wall and shine light down onto floors and surfaces. They are commonly installed over sinks, in sitting rooms, and along corridors. LED lights use significantly less energy than fluorescent lights and have built-in LED arrays so there are no light bulbs to install or replace.

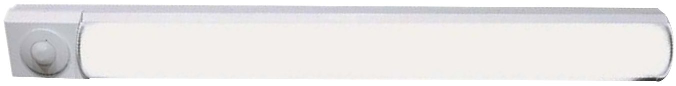
LED Stairwell Lights



45VT37

- 120/277V AC
- Dimmable

LED lights mount to the wall in a stairwell to supply constant light at a low level or at full brightness when their onboard sensor detects movement. They help conserve energy by returning to a low-light setting when movement is no longer detected. These lights have built-in LED arrays so there are no light bulbs to install or replace.

Architectural LED Suspended Lights

- 120/277V AC
- Dimmable

Linear fixtures hang down from the ceiling to provide more light than a pendant fixture and a more refined look than a strip light or wraparound light. They are well suited for open spaces such as offices, education centers, and other customer-facing areas. They use significantly less energy than fluorescent fixtures and have built-in LED arrays so there are no light bulbs to install or replace.

Linear LED Bay Light Fixtures

Install in new lighting layouts or upgrade fluorescent installations to LED. These fixtures use less energy and typically last longer than fluorescent lights, reducing maintenance and downtime. **General light distribution** forms a medium arc to light aisles when mounted from low ceilings or open spaces. **Narrow light distribution** focuses light in a small arc to reach the floor from high ceilings or project into aisles and other narrow spaces. **Wide light distribution** spreads light in a broad arc from low ceilings and across open layouts.

Linear Fluorescent Bay Light Fixtures

- Non-dimmable

Deliver bright, uniform illumination from high ceilings or open trusses. Fixtures mount to illuminate warehouses, factories, gymnasiums, hangars, big-box stores, and other large, open spaces. **Narrow light distribution** focuses light in a small arc to reach the floor from high ceilings or project into aisles and other narrow spaces. **Wide light distribution** spreads light in a broad arc from low ceilings and across open layouts. **General light distribution** forms a medium arc to light aisles when mounted from low ceilings or open spaces.

Round LED Bay Light Fixtures

- Dimmable

Install in new lighting layouts or upgrade existing HID installations to LED. Use in older buildings where overhead ducts or pipes prevent the use of linear bay lights. These fixtures use less energy and typically last longer than HID lights, reducing maintenance and downtime. They deliver bright, uniform illumination from high ceilings in warehouses, factories, gymnasiums, hangars, big-box stores, and other large, open spaces.

Round HID Bay Light Fixtures

- Pulse start ballast

Replace fixtures of the same shape and lighting technology to match existing lighting layouts. Use in older buildings where overhead ducts or pipes prevent the use of linear bay lights. These lights use high-intensity discharge (HID) bulbs and have a reflector that redirects light from the sides and top of the bulb and casts the light downward to increase intensity and reduce glare. They deliver bright, uniform illumination from high ceilings in warehouses, factories, gymnasiums, hangars, big-box stores, and other large, open spaces.

Linear LED Vapor Tight Light Fixtures

Washdown-Rated Linear 45VY72

Wet Location Linear LED Lights 55MR17

- 120V to 277V

Surface-mount fixtures illuminate a wide area for more coverage than round fixtures in damp or humid locations. LED lights use significantly less energy than fluorescent lights and have built-in LED arrays so there are no light bulbs to replace. **Washdown-rated** fixtures illuminate areas where equipment is regularly sprayed down to clean off dirt and debris. **Wet location** lights withstand occasional water drips or light sprays.

Linear LED Hazardous Location Lights

- Color temp. 5600K

LED lights use less energy and typically last longer than other lighting technologies. These lights mount to flat surfaces and illuminate areas with flammable, combustible, or ignitable materials. They keep arcs and sparks contained so that the fixtures won't cause a fire or explosion.

Hazardous Location Signal & Warning Lights

HUBBELL KILLARK

- Hazard classification: Class I/Division 2, Class II/Division 1, Class II/Division 2, Class III

Mark restricted areas, call attention to non-functioning machinery, or alert people to nearby hazards in locations with flammable, combustible, or ignitable materials. **LED signal flashers** provide a longer service life than xenon flashers. **Xenon signal flashers** produce shorter but more intense light bursts than LED flashers.

Square Hazardous Location Light Fixtures

High-output lighting fixtures require less mounting space than linear fixtures and illuminate large spaces in hazardous locations with flammable, combustible, or ignitable materials. They keep arcs and sparks contained so that the fixtures won't cause a fire or explosion.

Flush-Mount Vandal-Resistant LED Light Fixtures

- 120V to 277V
- Dimmable

Fixtures install tightly against walls or ceilings and leave no gaps to hide contraband or pry off the fixture. **Vandal-resistant lights** have a sturdy housing and thick lens that resist impacts and tampering. They illuminate schools, public restrooms, transit centers, and other high-abuse areas. **Confinement lights** combine vandal resistance with features such as ligature resistance or dual lenses that help prevent people from using the fixtures to hurt themselves or others in correctional facilities, detention centers, behavioral health centers, and holding areas.

Wall-Mounted LED Bed Lights

- Non-dimmable
- Color temp. 3500K
- Nominal length 4 ft.

These fixtures mount on a wall and supply reading light above patient beds. Antimicrobial finish inhibits germ growth to help prevent the spread of infection. Built-in LED arrays eliminate the need to replace bulbs.

FEIT ELECTRIC | LIND EQUIPMENT WORK CONFIDENTLY. | LumiCleanse

Portable & Small Space Disinfection & Sanitizing Lighting

These lights provide decontamination of air or surfaces in different parts of a building. UV-C lights inactivate viruses, bacteria, fungi, and other pathogens to help reduce exposure and limit the spread of infections. They are commonly used after standard cleaning in hotel rooms, classrooms, offices, and fitness centers.

Examination Lights

AIM—Designed with a unique, Y-shaped head that facilitates placement of the light around the physician's head.

Cool Spot—Provides pure, white light along with a no-drift arm, high-intensity setting, and variable spot-sized control.

Nova—Produce a cool light while delivering a uniform beam pattern, and higher illumination levels. Designed with K-arm and dual handles that make it easy to position the light.

Outpatient—Low-maintenance light is for most examination applications in the hospital, physician's office, surgery center, and veterinary field.

Super Exam—Controls are mounted directly on the handle, so you can access all light functions and simultaneously aim the light where you need it. The drift-free spring-loaded arm helps make sure that the light stays put. A recessed light source helps reduce glare.

Carelite—A dimmable light source that is recessed inside the light head to reduce glare and minimize disruption to other patients. An integrated observation light lets nurses check on patients without disturbing them.

Floor Stand Exam and Surgical Lights

Exam Lights—35FT57 offers 2 illumination levels. Dual handles and K-arm allows for smooth positioning of light. 35FT58 has a Y-shaped design helping to minimize obstruction of light. Multiple reflectors can be tilted to adjust the lighting position. 35FT65 helps provide shadow-free operation.

Surgical Lights—Adjustable focus offers maximum intensity with minimal heat output. Flexible arm with extensive reach allows for a greater range of motion. Include footswitch, locking casters, hardware kit, and cord wrap.

Task Light—Dimmable light source is recessed inside the light head to reduce glare and minimize disruption to other patients. Integrated observation light lets nurses check on patients without disturbing them while they are sleeping.

Surface-Mount LED Downlights

Attach to ceiling surfaces and give the look and lighting effect of can lights where access above the ceiling is limited. For use in multi-family housing, hospitality, retail, office, and healthcare applications.

Low-Profile Round—Slimmer than standard downlights and can be set closer to ceilings for an even more subtle look. Provide a softer look than square downlights and eliminate having to align the fixture edges with adjacent units.

Low-Profile Square—Models are slimmer than standard downlights and can be set closer for an even more subtle look. Have straight edges with squared corners for a more upscale look than round downlights. Their square shape requires alignment with adjacent units to maintain a consistent look.

Standard Round—Standard, uniform height where a lower profile or tapered look isn't desired. Provide a softer look than square downlights and eliminates the need to align the fixture edges with adjacent units.

Standard Square—Have standard height for installations where a lower profile isn't required. Have straight edges with squared corners for a more upscale look than round models. Square shape requires alignment with adjacent units to maintain a consistent look within a space.

Tapered Round—Lights get thinner toward the edges for a more decorative look than standard or low-profile models that have a uniform height. Provide a softer look than square downlights and eliminate the need to align the fixture edges with adjacent units.

Standard Round, Color Temp. Selectable—Choose among 3 light output options: 3000K, 4000K, or 5000K by using a toggle switch on the back of the fixture. The integrated accent/nightlight delivers an extra-soft amber glow to add accent lighting to any room. Toggle the wall switch from On/Off/On within 3 sec. to change between the area light and accent/nightlight mode.

Canless LED Downlights

Models with multiple color temperature settings have a switch for choosing the hue or tone of light desired.

Low-Profile—Extra-slim body fits into ceilings with shallow plenums or barriers where standard canless fixtures won't fit.

Low-Profile with Nighlight—Have the same features as low-profile models and add an integrated nightlight that emits a soft glow for nighttime illumination.

Standard-Profile—They are taller than low-profile fixtures but more compact than can lights.

Recessed Can LED Retrofit Trim Modules

Models with multiple color temperature settings have a switch for choosing the hue or tone of light desired.

Universal Trim Modules—Used to convert older lighting technologies to LED but also plug into compatible LED-ready housings.

Trim Modules with Speakers—An integrated speaker allows wireless streaming via Bluetooth from a mobile device.

Trim Modules with Nightlight—A nightlight along the edge of the module emits a soft glow for nighttime illumination.

LED Trim Modules for Downlight Housings

These trim modules add a light source, trim ring, and baffle to a compatible downlight housing. They plug directly into a matching connector on an LED-ready housing. Their integrated driver regulates power to the module. Suitable for use in healthcare, hospitality, multifamily housing, office, and retail applications.

Recessed LED Downlight Housings with Integrated Light Source

These lights recess into ceilings and set the edge of the housing flush with the surface for a clean look. Models with multiple color temperature settings have a switch for choosing the desired hue or tone of light. All fixtures are suitable for use in multifamily housing, hospitality, retail, office, and healthcare applications.

Limited Access to Flat Ceilings—Install into existing flat ceilings.

Total Access to Flat Ceilings—Fixtures install into the framing of a new, flat ceiling before drywalling or plastering.

Total Access to Sloped Ceilings—Install into the framing of a new, sloped ceiling before drywalling or plastering. Fixtures direct light downward rather than matching the angle of the housing.

Fixed Rail LED Lights

- 3000K Color Temp.

Provide the look and lighting effect of standard track lighting without the worry of light head and rail compatibility.

Core Series—Cylinder-style light heads offer a basic head shape with a consistent diameter and flat back for simple lighting designs. The light heads are fixed on a straight rail for a traditional track lighting arrangement.

Eva Series—The curved back of these round-back-style light heads gives them a softer, more contemporary appearance than straight cylinder heads. The light heads are fixed on a straight rail for a traditional track lighting arrangement.

Gage Series—These step-style light heads have a classic look to suit most installations. The straight-rail lights provide a traditional track lighting arrangement while curled-rail lights offer a more decorative appearance and more focused light distribution.

Satellite Series—The ultramodern step-style light heads and arched rail update the classic step-and-straight-rail look for a more dramatic effect.

Track Lighting

- Track style: J

Track light heads and pendants fit into track rails to create or modify track lighting systems. They are commonly used in retail, hospitality, and multifamily housing applications. **Cube** fixtures form a compact, square shape for a minimalist yet cutting-edge effect and are for use in small spaces with low ceilings. **Cylinder** heads offer a basic head shape and flat back, while **Flared** have modified step heads with a cone that gradually widens from the base. **Roundback** fixtures have a curved back for a more contemporary appearance than straight cylinder heads. **Spot** heads pivot in a bracket for a greater range of motion than other styles. **Step** fixtures have a stepped cylinder design for a classic look.

Decorative LED Ceiling Lights

Fixtures mount to ceiling surfaces and supply illumination and an appealing design for general lighting. They provide architectural interest and a homelike atmosphere in hallways, entryways, and reception areas in retail, hospitality, healthcare, and multifamily housing applications. Lights with multiple color temperature settings have a switch for choosing the hue or tone of light to match surrounding fixtures or suit a room or application.

Decorative LED Wall Sconces

These fixtures project light up to the ceiling where it filters back down into the room for a dramatic lighting effect. They supply the primary light source in small spaces, or supplement ceiling lights and other fixtures in larger spaces. 750Z17 has multiple color temperature settings and a switch for choosing the hue or tone of light to match surrounding fixtures or suit a room or application.

Bath and Vanity LED Lights

These lights supply general or task lighting and are wall mountable with a small mounting footprint to fit tight spaces especially above or alongside mirrors. They are commonly found in hotel, restaurant, and office restrooms. Lights with multiple color temperature settings have a switch for choosing the hue or tone of light to match surrounding fixtures or suit a room or application.

LED Under Cabinet Lights

Used to brighten countertops, shelves, desks, and other surfaces to help eliminate shadows and illuminate areas where direct light is limited. Their profile is generally slimmer than fluorescent lights to ease concealment under a cabinet or shelf. Lights with multiple color temperature settings have a switch for choosing the hue or tone of light to match surrounding fixtures or suit a room or application.

LED Rope and Tape Lights

Supply a strip of light for long runs and decorative trims in accent lighting applications. **Rope Lights** flex and conform to slight curves and contours. Their light is more focused than the light from tape lights. **Tape Lights** are flatter than rope lights easing concealment in shallow niches and recesses. Their light is more diffuse than the light from rope lights.

Note: Cutting the lights to length revokes their UL rating.

LED Grow Light Kits

- 120VAC

Include fixtures with bulbs or built-in arrays to set up a new installation or add onto an existing one. LEDs use less energy than other lighting technologies and run cool so lights can be placed within inches of plants without causing wilt or burn. Grow lights emit light in color spectrums that optimize seedling growth, stem and leaf growth, or budding and flowering to grow plants indoors.

MiracleLED

LED Grow Light Panels

Feature a large surface for distributing light over a wide area to grow plants indoors. Panels form the base component of an installation and are supplemented with smaller grow lights to get the necessary coverage. For use in greenhouses, hydroponic gardening, vertical farming, farm-to-table and urban farming, agricultural research, and other indoor growth applications.

Lighting Dimmers

LUTRON

- Hard Wired

Lighting dimmers allow users to vary the amount of voltage reaching a light fixture, which varies the brightness of the lamp. Light dimmer switches are variable-voltage devices designed to vary the brightness of lights by decreasing or increasing RMS voltage.

Sensor Switch

Wall Switch Occupancy Sensors

- 120/277VAC
- Motor Load ¼ HP Rating
- 180° viewing angle
- Timer range: 30 sec. to 30 min.
- No neutral required

Passive infrared and passive dual-technology occupancy sensors automatically turn lights On and Off as people enter and leave a room. By reducing the amount of time the lights are on, sensors cut energy consumption and significantly reduce energy costs. Sensors have an integrated photocell that can keep lights off if there is sufficient daylight in the room. Designed with a patent-pending wiring method that enables sensors to function with or without a neutral connection.

PASSIVE INFRARED (PIR)

Sensors detect body heat in motion. They must be located where full line-of-sight is possible.

DUAL TECHNOLOGY SENSORS (PIR AND MICROPHONICS™)

Feature an embedded microphone that hears sounds indicating occupancy in rooms with obstructions, such as bathroom stalls or office cubical areas.

HUBBELL®
Wiring Device-Kellems

Wall Switch Occupancy and Vacancy Sensors

- Field of vision: 180°
- Rated for use with incandescent, fluorescent and LED lighting
- No neutral required, except where noted

These sensors meet the latest codes and standards, and also provide LEED points in Sustainable Sites, Energy and Atmosphere, Indoor Environmental Quality, and Innovative Design Process categories.

Sensors with adaptive technology constantly monitor the controlled area and automatically adjusts the sensitivity and time delay. This means that instead of manually adjusting the sensor for seasonal changes, occupancy pattern changes, etc., the sensor automatically adjusts itself.

DUAL TECHNOLOGY

Combine both (PIR/US) technologies, minimizing the risk of false triggering. Neutral required for 36DZ89 and 36DZ90.

PASSIVE INFRARED

Detects body heat and movement. Requires line of sight for optimal operation.

LUTRON

Wall Switch Occupancy and Vacancy Sensors

- Field of vision: 180°
- Coverage: 900 sq. ft.
- Time delay: adjustable
- Timer range: 1/5/15/30 min.
- High-low sensitivity adjustment

Passive infrared sensors detect body heat to determine when the space is occupied. Work with standard 3-way switches or up to 9 companion switches. Occupancy versions can be set to auto-on/auto-off or manual-on/auto-off. Vacancy versions meet CA Title 24 requirements.

36N228 TO 36N231

No neutral wire required (ground connection required for functionality). Occupancy sensor loads: incandescent, halogen, MLV, CFL, LED, magnetic fluorescent, and electronic fluorescent.

32JA42 AND 32JA43

Switches all lighting loads. Meets many Title 20/24, ASHRAE 90.1, and IECC code requirements.

36WH09 TO 36WH22

Sensors can control up to 25 ballasts or drivers. UL Listed. Comply with Title 20 and Title 24 Section 110.9.

Reversible line/load wiring simplifies installation. Great for offices, classrooms, restrooms, closets, and many other spaces.

POWER PACKS

Powers remote low voltage sensors. Integrated relay switches the lighting load On and Off.

Indoor and Outdoor High Bay Occupancy Sensors

Provide advanced and accurate passive infrared (PIR) technology for unequaled occupancy detection and false trip immunity. Low bay replacement lenses are available for 8- to 16-ft. mounting heights.

LED Anti-Glare Wall Packs

Big Beam Emergency Lighting · Lithonia Lighting · LumaPro

Wall-mounted fixtures cast a bright, clean light and reach full brightness instantly. A shielding device projects light downwards to minimize glare and prevent light pollution. LED lamps last longer and use significantly less energy than other lamp types, produce very little heat, and can withstand temperature changes and humidity.

Compact Wall Packs

Compact wall packs have a length or width less than 11" and take up a smaller mounting space than full-size wall packs, making them a good choice for exterior walls that have narrow surface areas. These outdoor lighting fixtures project widespread light onto building grounds and walkways to increase visibility for pedestrians and enhance security. They are typically used to illuminate commercial buildings, office complexes, recreational facilities, and apartment complexes.

Full-Size Wall Packs

These wall packs have a length or width greater than or equal to 11" and are typically used to illuminate large areas, such as commercial building perimeters and office complexes. They cast widespread light to provide added visibility and can help deter vandals and unauthorized access to perimeters. They are also a good choice for doorway and loading areas in need of extra security lighting, or places where dark sky compliance is not required.

LED Parking Garage Lights

- 120/277V AC

Overhead lighting fixtures cast widespread, uniform light in interior areas of parking structures to increase visibility for pedestrians and vehicles. They mount to surfaces, pendants, or recesses of structure ceilings, soffits, or overhangs. **Linear** fixtures are long and narrow, making them suitable for lighting garage corridors and stairwells. **Low-Profile** fixtures help ensure vehicle clearance in parking structures with a low ceiling height, while **Pendant** fixtures are a common choice for structures with variable ceiling heights.

LED Canopy Lights

Ceiling-mounted fixtures project a 360° widespread beam of light in building entrances and drive-through entryways to provide added visibility for pedestrians and vehicles. They use LED lamps, which reach full brightness instantly, last longer, and use significantly less energy than canopy lights with other lamp types. **LED Low-Profile Canopy Lights** have a slim design that provides more clearance with a height of 5" or less from the ceiling to the base of the fixture. **LED Standard Canopy Lights** have a height of 5" or greater from the ceiling to the base of the fixture.

LED Parking Lot Fixtures

These pole-mounted fixtures project maximum light over large areas to provide high visibility so pedestrians and vehicles can safely navigate their way through. They use LED lamps, which cast a bright, clean light, reach full brightness instantly, and use significantly less energy than metal halide parking lot lights. They are commonly used to replace worn out traditional lamps in existing parking lot lights.

LED Roadway & Street Lights

Outdoor fixtures project a bright, uniform light from dusk to dawn and reach full brightness instantly. They use LED lamps, which last longer and use significantly less energy than roadway and street lights with high-pressure sodium lamps. They also produce very little heat and remain durable through any weather. These pole-mounted lighting fixtures are commonly used to retrofit existing street and roadway lights.

LITHONIA LIGHTING

High-Pressure Sodium (HPS) Parking Lot Fixtures

These parking lot fixtures use high-pressure sodium (HPS) lamps to project a powerful, high-intensity light in either amber or natural light colors. They are generally brighter than LED parking lot fixtures but take longer to warm up and need to be replaced more often. They are typically used to illuminate large sport facilities, such as outdoor stadiums or hockey rinks.

LED Fixed Beam Security Lights

Wall-mounted fixtures have a nonadjustable head that projects a powerful, focused light over outdoor areas around warehouses, supply yards, and commercial buildings. They use LED lamps, which reach full brightness instantly, last longer, and use significantly less energy than fixed beam security lights with other lamp types. They are commonly used to retrofit existing security lights.

LED Motion Sensor and Security Lighting

- 120V AC

LED security lights provide customizable, widespread light coverage to open areas around buildings, residences, garages, and entryways. Wall-mounted fixtures have one to three adjustable heads and include motion sensors, which automatically turn on for instant illumination whenever someone walks through the area.

Outdoor Lighting Motion Sensors

- 120V AC

Incandescent and halogen **Adjustable Beam Angle Lights** project a bright, even light over a widespread area. These wall-mounted fixtures have one or two adjustable heads that can be positioned at different angles. They typically cost less than LED security lights but consume more power and have a shorter lifespan. **Security Light Motion Sensors** automatically turn security lights on and off, providing visibility when needed and helping make outdoor areas safer. They are commonly used to add motion sensing capability to existing adjustable beam security lights.

Outdoor Lampholders

These weather-resistant fixtures add secondary lighting to outdoor areas to increase visibility and provide safe navigation for pedestrians. They have one or two lamp heads and can be mounted on walls, ceilings, or the ground. Lamps are installed in the holders to provide a desired color and illumination level. Lampholders are commonly installed on entryways and doorways, garage and workshop exteriors, outdoor patios and yard spaces, and office buildings.

LED Outdoor Accent Lights

Accent lights draw attention to specific outdoor features, such as trees and garden beds, and provide visual interest. These LED lights project a bright, clean light and reach full brightness instantly. They last longer and use significantly less energy than incandescent or quartz landscape lights. They also produce very little heat and can withstand temperature changes and humidity.

LED Bollards

Bollards provide attractive accent and guide lighting for walkways, entrances, courtyards, and similar landscaped areas. They consist of a sturdy vertical post with a light source located at or near the top. These LED fixtures project a bright, clean light and reach full brightness instantly. They last longer and use significantly less energy than other types of bollard lights.

Traditional Canopy Lights

These canopy lights project a downward beam of light to improve visibility in building entrances with extended entryways or overhangs, such as gas stations, schools, and office complexes. They use incandescent lamps, which can withstand inclement weather and dense fog. They typically cost less than LED canopy lights but consume more power and have a shorter lifespan. **Traditional Low-Profile Canopy Lights** have a slim design that provides more clearance with a height of 5" or less from the ceiling to the base of the fixture. **Traditional Standard Canopy Lights** have a height of 5" or greater from the ceiling to the base of the fixture.

FoxFury Lighting Solutions · NightSearcher by ProBuilt · Pelican

LED Remote-Area Lights

Weather-resistant systems illuminate remote locations.

FoxFury—Quick-deploy area/spotlights are waterproof to 9.8 ft. Included AC or DC cables can be used to drive the system directly, or to recharge the battery. 44M834 and 44ZY99 offer 360° scene, 120° area, and 12° spotlight.

Pelican—The practical, durable, watertight design packs an LED lighthead mounted in an aluminum heat sink into a single case. Tough injection-molded ABS glass-filled nylon housing with telescoping mast and 360° articulated light arrays stands up to tough field use. Includes 110V charger.

Self-Righting Work Lights

Wobblelight by ProBuilt

- 120V
- Polycarbonate dome protects bulb
- Project light in 20- to 100-ft. dia. arc, depending upon bulb wattage

Self-righting bases cannot be knocked over, for stable lighting with no bulb breakage. Require no setup; just plug in. Internal ventilation system keeps lights cool to the touch.

Balloon Work Lights

- 5-15P NEMA plug
- Avg. rated life: 50,000 hr.

Lights have bright LED diodes, housed in a fiberglass housing for glare-free illumination and no bulb breakage. They set up easily; fold open like an umbrella, plug in and turn on. All include a carrying case and tie down set. 444P62, 444P66, and 444P61 include a tripod stand; 444P63, 444P64, and 444P66 have a hanging loop. 444P65 features solar panel and solar controller.

LumaPro FEDERAL SIGNAL Waldmann ENGINEER OF LIGHT. tensor

Task Lights

Versatile lights deliver strong illumination and are ideal for workstations and desktops in production, inspection, medical, and research applications.

Articulating Arm—Articulating arm system is easy to move and can be maintained in a fixed position.

Clamp-On—Lightweight lamps conveniently clip to desktops and workstations for quick and powerful light source.

Gooseneck—Deliver bright light and have a flexible neck that allows easy adjustment to desired position.

Pivoting Head—Swivel head allows adjustment and maneuverability.

Machine Tool Lights

Waldmann ENGINEER OF LIGHT. O.C.White Co. Illuminating Ideas & Designs Since 1883

Waldmann—Coolant-, lubricant-, and vibration-resistant tool lights are built to give you bright, dependable lighting in most volatile machining environments. LED Fixtures are waterproof, impact-resistant, and offer a variety of installation options. Waterproof fluorescent linear fixtures include a built-in electronic ballast. Fixtures have a 10-yr. warranty.

O.C. White—A solid die-cast aluminum body acts as the heat sink for the LED arrays, while a tempered safety glass and a slim, nickel-plated bezel protect the light source. If the light exceeds maximum temperature, the lamp automatically dims itself to cool down. Fixture can be easily mounted to just about any metal surface using the pre-installed high-strength neodymium magnets, or permanently affix using 4 countersunk holes. Up to 3 light fixtures can be run from a single power point. Use light on any mill, lathe, grinder, or a variety of other machines.

Safety Approval Definitions

Note: Always talk to your safety manager or consult supplier websites for additional information about the best products to use in your environment.

DIVISIONS

Describe the imminence of the danger.

Division 1 (Red)—"Hazard likely," such as inside a fuel tanker.

Division 2 (Green)—"Hazard not likely," such as in the proximity of a fuel tanker.

Flammable Liquid (Yellow)

Underwriters Laboratory

Factory Mutual

Mine Safety Health Administration

STREAMLIGHT

Dualie 3AA LED Flashlights

- Submersible to 1 meter for 30 min.
- Intrinsically Safe - Class I, II, Div. 1

Rugged multifunction LED lights feature intuitive, independent switching for each function. The tough non-conductive, corrosion-proof polymer resin construction is impact-resistant to 2 meters and has an integrated low-profile pocket clip to help you keep your hands free for performing other tasks. 52VG80 and 52VG81 include a red laser pointer that can be used either on its own, or simultaneously with the forward-facing spot beam to identify equipment or hazards from a distance. 52NY68 and 52NY69 have an integrated magnetic clip to provide you with another option for hands-free lighting.

Disposable Standard Batteries

Alkaline batteries are the most-common choice for most everyday applications. Lithium batteries provide level, consistent performance in all devices, including high-power-draw devices. Designed to be leakproof and perform well in extreme temperatures, from -40° to 140°F.

Everyday—All-purpose batteries for everyday use in devices such as flashlights, remote controls, clocks, smoke detectors, and other equipment that is used intermittently or has a low power draw.

Premium—Higher-tier batteries provide dependable performance in low-drain devices such as flashlights, remote controls, clocks, smoke detectors, medical devices, multimeters, and similar intermittent-use equipment.

High Performance—Top-tier, high-capacity batteries can handle power demand spikes from high-drain devices such as digital cameras, thermal imagers, digital audio players and recorders, drones, video game controllers, GPS equipment, and keyless locks.

Sealed Lead Acid Batteries

- Terminal location: Top

Sealed lead acid (SLA) batteries are heavy, block-shaped batteries for powering large equipment and industrial systems. Also called storage or standby batteries, sealed lead acid batteries are slow draining when not in use so they're often used in uninterruptible power supplies (UPS) and other backup or reserve power applications. The terminal placement and overall dimensions of an SLA battery must match the location of mating connectors and the installation space within equipment to ensure a proper fit.

Battery Chargers and Maintainers

Sealed lead acid battery chargers and maintainers recharge or maintain the charge of SLA batteries so they're ready for use. These trickle chargers supply a slow, constant charge that typically takes hours to reach full capacity. Slow charging reduces the risk of damage to the battery while maximizing the charge level and life cycle. Charging a battery fully replenishes its charge before it's returned to service, while maintaining a battery keeps it at full charge during storage. Sealed lead acid battery chargers and maintainers should match the voltage of the battery being charged. These devices are commonly used by service and repair personnel. For more chargers see page 925.

Digital Multimeters

Rugged, high-quality meters are designed for field professionals in a wide range of applications. All except 24K480 feature audible continuity.

FLUKE 3000FC SERIES WIRELESS MULTIMETER

True-RMS Wireless Multimeter with Fluke Connect and ShareLive video call. Designed for professional technicians to troubleshoot and repair many problems in electrical and electronic systems. AC and DC voltage measurements to 1000V. AC and DC current with 0.01mA resolution. Continuity, resistance, diode test, capacitance, and frequency measurements. Min./max. recording. CAT III 1000V, CAT IV 600; IP54.

FLUKE 289 TRUE RMS INDUSTRIAL LOGGING MULTIMETER

Industrial logging multimeter designed to solve complex problems in electronic, plant, automation, power distribution, and electro-mechanical equipment. Log data and review it graphically on-screen, solve problems faster, and help minimize downtime. Communicate wirelessly with Fluke Connect and ir3000 FC wireless connector (sold separately).

FLUKE 28 II EX INTRINSICALLY SAFE TRUE RMS DIGITAL MULTIMETER

Completely sealed, IP67 case. 10-ft. drop-resistant. For testing and troubleshooting in petroleum, chemical, or pharmaceutical environments and other hazardous zones: Class 1 Div. 1 Zone and 2 (gas), Class 2 Div. 1, and Class III Zone 21 (dust) areas. The enclosure is IEC 6029 water and dustproof. CAT III 1000V pollution degree 2 and CAT IV 600V pollution degree 2. Intrinsically safe and regulatory compliance certifications include Aex ia IIC T4 and AEx iaD T130°C.

Fluke 116 HVAC Multimeters with Temperature and Microamps

Auto-V automatic AC/DC voltage detection helps eliminate guesswork and LoZ low-impedance input reduces chance of false readings due to ghost voltage. Built-in thermometer and microamp measurements quickly troubleshoot problems with HVAC equipment and flame sensors.

FLUKE 179 TRUE RMS DMMS

Ideal for working with HVAC or electrical equipment, or in small spaces. Feature a digital display with analog bar graph and built-in temperature measurements. All inputs are protected to IEN61010-1 CAT IV 600V/CAT III 1000V. CSA Certified and TuV Listed.

Digital Multimeter Kits

FLUKE

Rugged, high-quality meters with advanced feature sets are designed for field professionals in a wide range of applications.

Description	Includes	Mfr. Model	Item No.
Digital Multimeters			
Digital Multimeter Kit	Alligator Clips, Cable, Instructions, Magnetic Meter Hanger, Soft Carrying Case, Software, Test Lead Set, Thermocouple	Fluke-289/FVF	**1EVC7**
Digital Multimeter Kit	Alligator Clips, Batteries, Instructions, Interface Cable, Magnetic Hanging Kit, Software, Temperature Probe, Test Leads	Fluke-287/FVF	**4CPU5**
Digital Multimeter Kit	Electronic Test Probes, Heavy Duty Hook Clips,Magnetic Hanging Kit, Integrated Temp. Probe, Silicone Test Leads, Soft Case	Fluke 179/EDA2 Kit	**1LWZ6**
Digital Multimeter Kit	Alligator Clips, Magnetic Hanging Kit, Soft Case, Temp. Probe, Test Leads, Yellow Meter Boot	Fluke-87-V/E2	**1PEK9**
Digital Multimeter Kit	9V Battery (Installed), Getting Started Manual, Lightweight Soft Accessory Case, Long Reach Alligator Clips, Magnetic Meter Hanging Kit, Silicone Test Leads, Temperature Probe, Test Probes	FLUKE-87-5/E2 CWG	**4EB22**
Digital Multimeter Kit	(3) AA Batteries, 3000FC Multimeter, CD, Hook Clips, Magnet Hanger, Sharp Test Probes, Soft Case, Test Leads (TL224)	3000FC/EDA2/WWG	**45GG43**
Digital Multimeter Kit	Alligator Clips, Battery, Battery Charger and Adapter, Carrying Case, Digital Multimeter, Flexible Current Probe, Hanging Strap, Test Leads	FLK279FC/IFLEX	**48RH42**
Digital Multimeter Kit	Alligator Clips and Fluke PRV240 Proving Unit Kit, Battery, Test Leads Thermocouple	FLUKE-87V/PRV	**40KJ11**
Digital Multimeter Kit	Battery, Test Leads and Fluke PRV240 Proving Unit Kit	FLUKE-117/PRV	**40KJ12**
Wireless Digital Multimeter Hanging Kit	(3) AA Batteries, 3000FC Multimeter, CD, Magnet Hanger, Soft Case, Test Leads	3000FC/TPAK/WWG	**45GG44**
Instrument Combination Kits			
Wireless Temperature Kit	Alligator Clips, Bead Probe, Magnet Strap, Multimeter, Quick Start Guide Only, Test Leads	FLK-T3000FC K	**31FN20**
Wireless General Maintenance Kit	1X AC Voltage Module, 1X Current Module, 1X DC Voltage Module, 1X iFlex Coil, 1X PC Adapter, 1X Windows Software CD, 3X Alligator Clips, 3X Test Leads, Batteries, Information Pack, Multimeter, Soft Case	FLK-3000FC G	**31FN11**
Wireless HVAC System Kit	1X Alligator Clips, 1X Current Clamp, 1X PC Adapter, 1X Temperature Module, 1X Test Leads, 1X Windows Software CD, Batteries, Information Pack, Multimeter, Soft Case	FLK-3000FC H	**31FN12**
Wireless Industrial Kit	1X AC Voltage Module, 1X PC Adapter, 1X Windows Software CD, 2X Alligator Clips, 2X Test Leads, 3X Current Module, 3X iFlex Coil, Batteries, Information Pack, Multimeter, Soft Case	FLK-3000FC I	**31FN13**
Digital Multimeter Kit	3000FC Multimeter, Alligator Clips, Batteries, IR Adapter, Magnet Hanger, Manual CD, PC Software, Softcase, Test Leads, Thermocouple Adapter	287/FVF/IR3000/WWG	**45GG41**
Digital Multimeter Kit	3000FC Multimeter, Alligator Clips, Batteries, IR Adapter, Magnet Hanger, Manual CD, PC Software, Softcase, Test Leads, Thermocouple Adapter	289/FVF/IR3000/WWG	**45GG42**
Infrared Thermometer Kit	Mfg. No. Fluke-62 MAX+, T+PRO, Fluke 1AC-II, Fluke C115 Soft Case, Battery, Instruction Sheet and Information Sheet	Fluke62Max+/T+P/1AC	**46N344**
Infrared Thermometer Kit	Mfg. No. Fluke-62 MAX+, Fluke-323, Fluke 1AC II, Fluke C115 Soft Case, TL175; Battery, Registration Card and Instruction Sheet	Fluke62Max+/323/1AC	**46N345**
Digital Multimeter, Clamp On Kit	80AK-A Thermocouple Adapter, 80BK Integrated Temperature Probe, 80pk-11 Pipe Clamp Thermocouple, C115 Soft Carry Case, Fluke-323 True RMS Clamp Meter, Information Pack, Mfg. No. Fluke-116 Multimeter w/Batteries, TL175 Test Leads, TPAK Hanging Strap	FLUKE-116/323	**46N341**
Digital Multimeter, Clamp On Kit	C115 Soft Carry Case, Fluke-323 True RMS Clamp Meter, Information Pack, Mfg. No. Fluke-117 Multimeter w/Batteries, TL175 Test Leads, TPAK Hanging Strap	FLUKE-117/323	**46N342**
Digital Multimeter Kit	1AC-II Voltage Detector, 3000FC Multimeter, Alligator Clips, Batteries, Test Leads	3000FC/1AC-II/WWG	**45GG40**
Digital Multimeter, Infrared Thermometer Kit	62Max Infrared Thermometer, 80AK-A Thermocouple Adapter, 80BK Integrated Temperature Probe, 80pk-11 Pipe Clamp Thermocouple, C115 Soft Carry Case, Information Pack, Mfg. No. Fluke-116 Multimeter w/Batteries, TL175 Test Leads, TPAK Hanging Strap	FLUKE-116/62Max+	**46N340**
Voltage Detectors			
AC and DC Voltage Module Kit	Alligator Clips, Batteries, Information Pack, Magnet Strap, Multimeter, Soft Case, Test Leads	FLK-V3003FC K	**31FN27**
AC Voltage Module Kit	Alligator Clips, Batteries, Information Pack, Magnet Strap, Multimeter, Soft Case, Test Leads	FLK-V3000FC K	**31FN22**
DC Voltage Module Kit	Alligator Clips, Batteries, Information Pack, Magnet Strap, Multimeter, Soft Case, Test Leads	FLK-V3001FC K	**31FN26**
Automotive Test and Record Instruments			
Automotive Multimeter Kit	Fluke 88V Automotive Digital Multimeter, 3MU86 Leads (TL224), 3MU87 Probes (TP220), 3MU85 Alligator Clips (AC285), 4XL48 Hanger (TPAK) 2DPH6 Temp. Probe (80BK-A), 5U843 RPM Pick-up (RPM80) 2 Probe Pins, Insulation Piercing Clip, 5U830 Case, (C800), 4YE79 Holster, 9V Battery and Instructions	Fluke 88 V/A	**5BB61**
Accessories			
Soft Carrying Case	Detachable, Extendable Shoulder Strap	C280	**2VFZ9**
Modular Test Lead Kit	Mfr. No. AC220 SureGrip Alligator Clip Set, Mfr. No. TL224 SureGrip Silicone Test Lead Set, Mfr. No. TP220 SureGrip Test Probe Set	Fluke-TL220	**3EB21**

EXTECH INSTRUMENTS · WESTWARD · AMPROBE · FLIR

Digital Multimeters

Audible continuity lets your eyes focus on other test results. Each includes test leads and batteries. Select models have the following features: Low-impedance (LoZ) mode prevents false readings caused by ghost voltages. Low-pass filter (LP) reduces noise for accurate readings. Microamp (M) measurement is for HVAC flame rod applications. Noncontact voltage (NCV) verifies power is off to help assure safe testing. True RMS (TRMS) boosts accuracy when reading noisy, distorted, or nonsinusoidal waveforms.

Extech Pocket—Easy-to-read meters slip into your pocket to keep with you at all times—great for most mechanics and technicians.

Extech Compact EX350 Series—Advanced features include LoZ and Low-Pass Filter.

Extech Full-Size EX400 Series—1" digits are easy to read.

Westward Kit—Conveniently combines digital multimeter 22XX19 with infrared thermometer 28AF72 and accessories for on-the-go maintenance and troubleshooting.

Amprobe Pocket Digital Multimeters—1WKN7: one-handed, pen-style meter has digital/analog displays. 1WKN5: ⅜"-thick meter displays large digits with icons. Convenient attached test leads. 1WKN5 automatically selects resistance or AC or DC voltage.

Amprobe Full-Size Digital Multimeters—1WKP5 performs component and logic tests. 12U584 is designed for electrical contractors and checks voltage, current, continuity, resistance, startup capacitors, capacitor banks, frequency, and temperature. 34K450 and 12U583 offer HVAC-specific features.

FLIR Industrial—22UL80 and 22UL81 have integrated Bluetooth connectivity compatible with the FLIR Tools mobile app.

Footnotes: AR = autoranging, B = 1.5V/9V battery test, C = capacitance, D = data hold, DC = duty cycle, DL = datalogging up to 20,000 points, DT = diode test, G = analog bargraph, IF = integrated flashlight, IR = infrared temperature, LoZ = low impedance mode, LP = low-pass filter, M = microamp (μA), MR = manual ranging, NCV = noncontact voltage, T = Type K temperature probe.

FLIR

DM285 Imaging Multimeter

- True RMS AC voltage and current
- High-contrast TFT LCD

Visually guides you to the exact location of an electrical problem with Infrared Guided Measurement (IGM) technology powered by a built-in 160 x 120 FLIR thermal imager. Features LoZ (low-impedance mode) and VFD (low-pass filter) to help you solve even the most complicated electrical issues. Complete with test leads, test lead holder, alligator clips, and Type K Thermocouple.

EXTECH INSTRUMENTS

Waterproof Multimeters

Designed for heavy use in industrial applications. Measure AC/DC voltage and current, resistance, dual-sensitivity frequency (electrical and electronic), duty cycle, audible continuity, 2.8V diode test, and have data hold and auto-off functions. 1PTK1 is average responding. 1PTK3 also measures temperature. 2ELP6 has an analog bargraph. 2ELP7 has a 40,000-count display. All models include test leads, magnetic hanging strap, carrying case, and 9V battery. All except 1PTK1 have Type K temperature probe.

Simpson

Analog Multimeters

- Accuracy: VAC ±3% full scale; VDC ±2% full scale

Analog display gives you a quick visual status check. Each includes test leads and batteries.

Rugged 4CWP2 is designed for railroad signaling and communications service, with an AC current transformer, current-limiting diode, and adjustable pointer stop. Padded case.

Note: Simpson Instruments optional clamp current probes 2T416 or 2T978 extend meters' AC capability up to 250A; sold separately on Grainger.com or call 1-800-GRAINGER (472-4643).

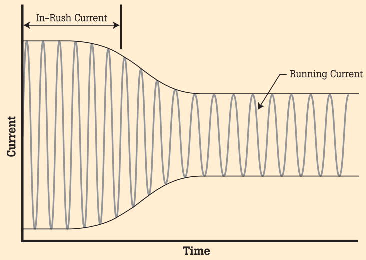
True RMS Current vs. Inrush Current

TRUE RMS
- “RMS” (root mean square) comes from a formula that calculates the effective value (or heating value) of any AC wave shape
- Electrical components such as fuses, bus bars, conductors, and circuit breakers are rated in RMS current because their main limitation has to do with heat dissipation
- When checking an electrical circuit for overloading, the RMS current is measured and compared to the rated value for the component in question
- For circuits with AC and DC components or distorted signals, a meter with an AC+DC function is used

INRUSH
- Fluke clamps' proprietary inrush (starting) measurement takes a large number of samples at the beginning of the starting current, then digitally filters and processes the samples to calculate the actual starting current
- Measure starting current in the same manner as an overcurrent protection device
- More accurate than slower min./max. functions that can miss the event partially or completely



FLUKE

Clamp Meters

Each includes a soft carrying case.

GENERAL PURPOSE

Fluke 323/324/325 True RMS AC
- Continuity for quick checking of shorts
- Capacitance and temperature (324 and 325)
- AC/DC current measurement (325)

Small size fits easily into tight places. CAT IV 300V, CAT III 600V.

Fluke 324
20E890

HEAVY INDUSTRIAL

Fluke 353/355 True RMS AC/DC 2000A
- AC+DC true RMS ensures accurate measurement of AC+DC and distorted signals
- Selectable low-pass filter to smooth out noisy loads and stabilize readings

Measure frequency up to 1 kHz for optimum troubleshooting. Quickly analyze readings using the min., max., and avg. functions. CAT IV 600V.

Fluke 355
2FTY9

HVAC/R

Fluke 902 FC
- Flue gas temperatures with Type K thermocouple
- Flame rod testing with μA current measurement range
- Capacitance measurement

CAT IV 300V.

Fluke 902 FC
48RH39

DETACHABLE JAW

Fluke 365 True RMS AC/DC
- Built-in flashlight/torch
- Designed for use while wearing personal protective equipment
- 200A AC/DC

Detachable jaw eases wire access and viewing the display. Compact design fits in your hand. CAT III 600V, CAT IV 300V.

Fluke 365
6FXH8

FLUKE CONNECT CLAMP METER
- True RMS
- Measures up to 400A AC
- Inrush function

Fully functional meter wirelessly relays measurements to other Fluke Connect-enabled master units. Designed to be used as a standalone or as part of a system. Features logging function for recording and saving up to 65,000 readings.

Fluke Connect Flex Clamp Meter Kit
31FN17

Clamp Meters and Flexible Current Probes

FLUKE.

Wires in tight, compact spaces. Panels out of reach. Feature extra large conductors. Designed for noise-free, reliable readings. These clamp meters are known as workhorse clamp meters, with advanced performance and easy operation.

FLUKE-373 TRUE RMS CLAMP METER

Offers advanced troubleshooting performance that is perfect for a number of AC-only current measurements. The state-of-the-art signal processing technology cuts through electrical noise to help you get stable, dependable measurements that are easy to read on the large, backlit LCD. Automatically sets the correct range, so you won't have to change positions while taking a measurement. Includes clamp meter, test leads, and soft case. CAT IV 300V; CAT III 600V.

Fluke 373
6FXH7

REMOTE DISPLAY CLAMP METER

Fluke 381 Remote Display True RMS AC/DC with iFlex

- Designed to increase productivity and save troubleshooting time
- Frequency measurement to 500 Hz with jaw or iFlex
- Min./max./avg. and inrush recording captures variations automatically
- Radio transmitter Auto-Off when display is connected to meter

The removable magnetic, wireless display increases measurement flexibility. It can be conveniently mounted where it is easily seen, and carried up to 30 ft. from the point of measurement without interfering with measurement accuracy. Integrated low-pass filter and state-of-the-art signal processing allow stable readings in noisy electrical environments. CAT IV 600V, CAT III 1000V.

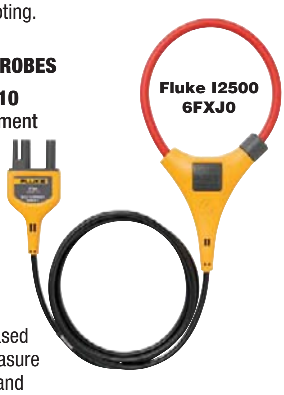
FLUKE CONNECT FLEX CLAMP METER KIT

Provides all the essentials for convenient test and measurement troubleshooting.

IFLEX FLEXIBLE CURRENT PROBES

Fluke i2500-18 and i2500-10

- 2500A AC current measurement
- Small cross-section for improved wire access
- Provide inrush and frequency on select Fluke meters, including those on this page



Fluke I2500
6FXJ0

Expand a clamp meter's measurement range to 2500A AC. Probes also provide increased display flexibility, ability to measure awkwardly sized conductors, and improved wire access. Connect directly to the meter, displaying current measurements without error-prone scaling factors. 6-ft. cord allows separation between the measurement location and the clamp meter, making it easier to view the display. 0.3" coil dia. allows measurement in tight spaces. CAT IV 600V, CAT III 1000V.

Fluke Connect Wireless Current Modules

FLUKE.

Designed to take 3-phase measurements in ⅓ of the time. Record over time to monitor circuit load changes for an hour, a shift, or a week. Use Fluke Connect wireless to collect and share logged data from remote modules. Perform analysis with your PC and share the results using Fluke Cloud storage and ShareLive video call. Video data or graphs to get input from team members.

FLUKE A3000 FC WIRELESS AC CURRENT CLAMP MODULE

True RMS current clamp meter. Fluke Connect enabled.

FLUKE A3001 FC WIRELESS IFLEX AC CURRENT MODULE

True RMS flexible current meter. Measure around awkward-sized conductors or get into tight spaces. Fluke Connect enabled.

FLUKE 370 FC SERIES CLAMP METERS

True RMS meters offer advanced troubleshooting performance. The iFlex flexible current probe allows easy connections to wires in tight spaces. In addition, all three clamps are now part of the Fluke Connect family of wireless test tools. With a 370 FC Series Clamp Meter and Fluke Connect Measurements app, you can log and trend measurements to pinpoint intermittent faults. Transmit results wirelessly via Fluke Connect Measurement app. Create and send reports right from the field. Capture measurements outside the arc flash zone with Bluetooth connectivity to your Apple or Android devices.

Imaging 600A True RMS AC/DC Clamp Meters with IGM

FLIR

- Frequency counter: 60 kHz
- Smart diode with disable
- Inrush current
- LoZ
- Variable-frequency drive (VFD) low-pass filter
- 60 Hz frequency calibration

2-in-1 testers have a built-in thermal imager that uses Infrared Guided Measurement (IGM) and a laser pointer with crosshair to pinpoint potential electrical problems and capture center-point temperature readings. The narrow jaw and built-in worklights help you enter tight or dark locations. Both models include CAT IV silicon test leads and AAA batteries. CAT IV 600V. 444M26 can also datalog and store 10 sets of 40,000 scalar measurements and 100 images. Bluetooth connectivity for easy transfer to a PC and direct connection to FLIR Tools.

Clamp Meters with IR Thermometer

FLIR

Commercial-grade electrician's 1000A meters also provide noncontact infrared temperature measurements on vents, equipment, and motors. Measure voltage, resistance, frequency, AC/DC current, and capacitance, with min./max./avg., rel., data hold, and peak hold. LCD shows results, or stream them to a compatible mobile device with the free FLIR Tools Mobile App. Readings also can be transmitted directly to a FLIR METERLiNK-enabled thermal imaging camera (see page 607). CAT IV 600V, CAT III 1000V safety rating. Each includes test leads and battery. 22UL79 includes calibration certificate.

Clamp Meters

EXTECH INSTRUMENTS FLIR

1000A SERIES INDUSTRIAL

These tough meters have a built-in noncontact infrared thermometer and allow you to locate hot spots and overheating motors. All models have peak hold to capture inrush current and transients. Include Type K bead wire probe, belt holster, 9V battery, and soft carrying case. 4GGD9 and 4GGE1 also include professional test lead kit.

HIGH CURRENT—1500A AND 2000A

High-capacity models support a variety of measuring functions and feature true RMS sensing. Each includes test leads and 9V battery. 5LUT4 and 5LUT5 also include case.

HIGH CURRENT—3000A FLEX CLAMPS AND ADAPTERS

True RMS 3000A AC flex clamps are designed with a 0.3" (7.5mm) dia. coil to take measurements in tight or awkward spaces. Inrush current (100ms) for equipment startup spikes. Bright LED work lights provide easy navigation. Datalog up to 20,000 points for trend analysis. Bluetooth communication for remote viewing and data transfer to mobile devices via FLIR Tools Mobile App.

40GT09 and 40GT08 flex clamp adapters plug directly in any meter with standard banana plug inputs and 1 mV range to convert it into a 3000A clamp meter.

Clamp Meters

Maintenance and troubleshooting testers for electrical, industrial, and HVAC applications include battery(ies). Select models have the following features: True RMS (TRMS) provides accurate readings of noisy, distorted or nonsinusodial waveforms. Autosensing (AS) technology enables the meter to recognize the input and automatically switch to the correct mode of operation. Low-pass filter (LPF) attenuates high frequencies to reduce noise for accurate measurement of variable frequency drive signals. DC microamp (M) measurement is for flame rod applications.

MINI CLAMP METERS

Compact size allows measurements in tight locations. Include test leads and case.

HIGH RESOLUTION MINI SERIES

Devices feature DC autozero and accuracy at low currents, and are designed to operate in tight spaces. 2HPF6 provides noncontact frequency measurement to 10 kHz through the clamp jaws. Each includes case; all except 2HPF6 include test lead.

POCKET-SIZE WITH AUTOSENSE

5.8" x 2.4" x 1.2" testers have a compact 0.8" jaw that accommodates conductors up to 300MCM and allows measurement in tight locations.

EXTECH INSTRUMENTS

OPEN JAW WITH AUTOSENSE

Feature an open-jaw design for quick measurements in tight locations. 40JL43 has input impedance that automatically decreases with the input voltage to provide low-impedance testing of ghost voltages.

COMPACT CLAMP METERS

Pocket-size meters loaded with multimeter features and built-in noncontact voltage (NCV) detectors to meet many applications. Jaws fit conductors up to 500MCM.

MULTIFUNCTION HVAC

5-in-1 meters feature dual Type K thermocouple inputs for superheat differential measurement. 2HPF8 and 6RGL7 add IR thermocouple with laser pointer and 2 temp. probes. Each includes test leads and case.

600 SERIES ELECTRICAL

Low impedance (LoZ) mode helps eliminate false readings caused by ghost voltages in these meters with true RMS AC or AC/DC. Include test leads; 40JK35 also includes bead wire probe.

EXTECH INSTRUMENTS

Digital Multimeter Troubleshooting Kit

Essential diagostic, installation, and repair tools are combined in a handy carrying container to provide protection and organization for the meters and accessories.

Includes	Mfr. Model	Item No.
4000 Count Display, CAT IV-1000V Safety Rating, CAT IV-600V, Double Molded Housing, Drop Proof, DV25 Dual Range AC Voltage Detector (24 to 1000VAC/100 to 1000VAC) Plus Flashlight with Audible, Mfr. No. EX505 Industrial Grade, Rugged Multimeter with True RMS Functions, Set of Double Molded Professional Test Leads, Soft Carrying Case, TL808 (8) Piece Professional Test Lead Kit with CAT III-1000V Safety Rating, Type K Thermocouple Bead Probe and Type K to Banana Input Adaptor, Visual Indication, Waterproof	EX505-K	**4DKJ7**

4FFJ8

2ATU9

2ATB3

Clamp Meters

AMPROBE

CAT III 600V safety rating unless otherwise noted. Select models are VAR clamps, which measure volts, amps, and resistance (continuity). Each includes carrying case. All except 38RX02 and 2ATU8 include test leads, and all include batteries.

ANALOG

Instrument works in cold temperatures where digital clamp LCD screens tend to freeze, and measures amps and volts without needing batteries. Cat IV 600V safety rating.

400 AMPS ELECTRICAL

A 180° rotating head measures AC current and helps take other readings in tight places.

600 AMPS ELECTRICAL

2ATU9 has extra-thin jaws for frequency measurement and is overload protected.

3DNY9 and 3DNZ1 show voltage and current on dual displays for voltage drop tests.

800 AMPS ELECTRICAL

VAR clamps for electrical and HVAC applications include relative readings; 2AUZ9 features true RMS.

1000 AMPS INDUSTRIAL AND HIGH CURRENT

2ATU8 provides a wide range of measurements. 4FFK1 is designed for high-current industrial applications, supporting a broad range of measuring functions with true RMS sensing. Large backlit display. 4FFK1 has CAT IV 600V safety rating.

4NYX6

Clamp/Fork Meters

Milwaukee

Rugged, heavy-duty instruments feature true RMS measurement for greater accuracy. High-contrast, white-on-black, backlit display is easy to read. LED task light. Each includes test leads and AA batteries. 4NYX6 and 4NYX7 are CAT IV 600V. 4NYX6 features Lo-Z measurement to eliminate ghost voltage. 4NYX7 provides 600μA DC readings for flame rectification and has a dual banana thermocouple input for contact temperature measurement. 5MLK3 is CAT III 600V.

FLUKE T5 ELECTRICAL TESTERS
Compact pocket testers make easy and accurate OpenJaw current measurement.

FLUKE T6 ELECTRICAL TESTERS
Measure voltage without test leads using integrated FieldSense technology. Measure voltage through the open fork, without test lead contact to live voltage, without opening covers, or removing wire nuts. Use on wires up to AWG 4/0 (120mm²) carrying as much as 200A.

FLUKE T+/T+PRO VOLTAGE AND CONTINUITY TESTERS
- GFCI trip test

Vibration, light, and beeper indicate presence of voltage without the hazards of a solenoid tester. Low impedance avoids ghost errors.

FLUKE 9040 PHASE ROTATION INDICATOR
- 3-phase indicator
- Clear LCD

Powered by unit under test—no batteries required.

FLUKE CONNECT VOLTAGE TESTERS
Designed to help you spend ⅓ the time taking 3-phase power readings, work safer, and communicate wirelessly with Fluke Connect app with these fully functional AC voltage meters.

VOLTAGE TESTER ACCESSORIES

High Voltage Storm Restoration and Maintenance Tools

Personal Voltage Detector—Detects and alerts operator when in the presence of electrical fields or energized electrical equipment.

Noncontact Voltage Detectors—Noncontact voltage detectors give indication with a typical detection distance of 10". A 15-min. charge provides a full day use.

Voltmeters—Compact dual-stick voltmeters and phasing set with capacitance test point mode and peak hold. 1% accuracy from reading.

Direct-Contact Voltage Detectors—Single-point instruments are designed to read voltage on a conductor up to 500kV line-to-ground.

Low-Voltage Detector—Used to detect stray voltage as low as 5 volts.

High Voltage Ammeter—Capability to take spot-load studies at transformers or any mid-span location, as well as phase balance studies on primary or secondary lines, all within accuracy of 1%. Takes True RMS AC current measurements up to 2000A, 25 to 500 Hz.

Hotsticks—Fiberglass sticks are designed and required to be used with voltmeters, noncontact and direct contact voltage detectors, and ammeters.

4WPZ4

4WRC5

Modular Test Lead Probes, Clips, and Extensions

4WRC8 has a 4mm dia. sharp point and 2mm tip.

4WRC5 and 4WRC7 have a 2mm dia. sharp point for hard-to-reach areas and recessed components.

4WRC6 is flat-bladed.

4WRA3 is insulation piercing, plunger style.

4WRA2 is designed to test semiconductor interconnects and high-density circuit boards.

4WRC1, 4WRA9, 4WRC2, and 4WRD4 are plunger style. 4WRC1 is a hook clip. 4WRA9 alligator clip tip grabs round fasteners. 4WRC2 is a pincer clip for testing areas in close contact. 4WRD4 is a bus bar clip.

Test Leads, Test Probes, Test Lead Sets, and Clips

Convenient accessory sets expand testing capabilities.

Description	Instrument Safety Rating	Includes	Mfr. Model	Item No.
Clamp Test Leads				
5-Way Test Lead Set	CAT I 30V	1 pr. (red, black) flexible silicone-insulated leads	Fluke-TL26A	**1TC10**
Automotive Test Lead Set	CAT I 30V	1 pr. (red, black) flexible silicone-insulated leads	Fluke-TL28A	**1TC11**
Modular Test Lead Kits				
SureGrip Master Accessory Set	CAT III 1000V, CAT IV 600V	2 plunger-style alligator clips, 2 plunger-style hook clips, 2 plunger-style pincer clips, 2 alligator clips, 2 sharp test probes, 2 test leads, foldable pouch	Fluke-TLK-225	**4CB84**
Electronic Set	CAT II 300V	2 med. alligator clips, 2 probe-tip extenders, 2 test probes, 2 test clips with hook clips, 2 test clips with pincer-tip adapters, 2 test lead couplers, 2 bare-spade lugs, 2 test leads with stainless steel tips, foldable pouch	TL81A	**5XV77**
Electronics Master Set	CAT II 300V, CAT III 1000V	2 modular leads, 2 modular probes, 2 Minigrabber jack sets, 2 med. alligator clips, 2 spade lugs with banan jack set, 2 couplers, 2 Micrograbbers, 2 Micrograbber leads, foldable pouch	TLK287	**2JYX5**
Industrial Master Set	CAT III 1000V, CAT IV 600V	2 test leads, 2 alligator clips, 2 hook clips, 2 large alligator clips, 2 test probes, hanging kit, thermocouple temp. probe, soft case	TLK289	**2JYX6**
SureGrip Deluxe Lead Set	CAT III 1000V, CAT IV 600V	Right-angle test leads, 2 styles of alligator clips: plunger-style and large jaw, sharp test probes, zippered vinyl case	Fluke-TLK-220	**4CB83**
SureGrip Electrical Lead Set	CAT III 1000V, CAT IV 600V	63 in silicone-insulated test leads, test probe with flat blade, alligator clips with safety grip, spring-loaded jaws, wide 20mm opening	Fluke-TL223	**3EB22**
SureGrip High-Energy Lead Set	CAT III 1000V, CAT IV 600V	Modular insulated-tip test probes, modular probe extenders, modular test leads	Fluke-TL238	**4YE80**
Probe Test Leads (1 Pair)				
TwistGuard Test Leads	CAT II 1000V, CAT III 1000V, CAT IV 600V	Adjustable length probe tip with Wearguard to indicate wear	Fluke-TL175	**6YPT0**
Retractable Tip Test Probes, 5 in L, PR	CAT IV 600V, CAT III 1000V	Interchangeable probes for use with most Fluke test lead sets	Fluke-TP175	**6YPT1**
Hard Point Test Lead Set	CAT III 1000V, CAT IV 600V	1 pr. (black, red) comfort-grip probes, 48 in PVC insulated test leads with right-angle shrouded banana plugs	Fluke-TL75	**1T341**
Premium Test Lead Set	CAT III 1000V, CAT IV 600V	1 pr. (black, red) comfort-grip probes with silicone-insulated, right-angle test leads	Fluke-TL71	**4XL47**
RetractableTip Test Lead Set	CAT II 600V	1 pr. (black, red) test leads with sharp needle-point tips adjustable from 0mm to 76mm	Fluke-TL40	**1ND97**
Test Clips				
SureGrip Alligator Clips	CAT IV 600V, CAT III 1000V	1 pr. (red, black) small, insulated, nickel-plated jaws in plunger-style clips	Fluke-AC220	**3MU82**
SureGrip Hook Clips	CAT IV 600V, CAT III 1000V	1 pr. (red, black) nickel-plated jaws	Fluke-AC280	**3MU83**
SureGrip Alligator Clips 1.13 in Opening	CAT IV 600V, CAT III 1000V	1 pr. (red, black) large alligator clips with nickel-plated steel jaws	Fluke-AC285	**3MU85**
Heavy Duty Bus Bar Clip Set	CAT III 600V	1 pr. (black, red), bus bar jaw	Fluke-AC87	**4YV66**
Heavy Duty Insulation Piercing Clip	CAT IV 600V, CAT III 1000V	1 red clip with banana plug	Fluke-AC89	**1TC26**
Test Lead Extentions (1 Pair)				
SureGrip Test Lead Extension Set	CAT III 1000V, CAT IV 600V	1 pr. (red, black) silicone-insulated leads with straight connectors on both ends	Fluke-TL221	**3EB19**
SureGrip Silicone Insulated Test Leads	CAT III 1000V, CAT IV 600V	1 pr. (red, black) shrouded leads with right-angle on both ends	Fluke-TL222	**3EB20**
SureGrip Insulated Test Leads	CAT III 1000V, CAT IV 600V	1 pr. (red, black) DMM test leads with safety shrouded, standard dia. banana plugs	Fluke-TL224	**3MU86**
Heavy Duty Test Leads	CAT III 1000V	1 pr. (red, black) straight leads	Fluke-TL27	**5PR89**
Test Lead Kits				
Basic Electronic Lead Set	CAT III 300V	Two 1m test leads (10A), 2 insulated alligator clips (5A), 2 insulated probe-tip extenders (3A), zippered vinyl soft case	Fluke-TL80A	**5XV76**
Test Probes (1 Pair)				
Slim Reach 2mm Diameter Tip	CAT IV 600V, CAT III 1000V	1 pr. (red, black) slender probes	Fluke-TP2	**4PD27**
Slim Reach 4mm Diameter Tip	CAT IV 600V, CAT III 1000V	1 pr. (red, black) slender probes	Fluke-TP4	**4PD28**
SureGrip Industrial Test Probes	CAT IV 600V, CAT III 1000V	1 pr. (black, red) deep-reaching probes with banana plugs	Fluke-TP220	**3MU87**
Electronic Test Probes	CAT III 1000V	1 pr. (black, red) probes for high-density material with banana plugs	Fluke-TP80	**1TC20**
Test Probe Leads	CAT III 1000V, CAT IV 600V	(1) Red and (1) Black Lead	TL76	**4XKU5**
Test Probe Leads	CAT III 1000V, CAT IV 600V	(2) Test Probes and (5) Sets of Replaceable Tips	TL910	**4XKW5**

FLUKE

Power Quality Troubleshooters

Additional accessories are available; call 1-800-GRAINGER (472-4643).

- Auto-trend automatically records every measurement without setup
- System monitoring: Up to 10 power quality parameters on 1 screen
- Inrush mode for troubleshooting nuisance circuit breaker tripping

Troubleshoot in real time: Cursors and zoom tools help analyze trends while background recording continues. Energy loss calculator quantifies classic active and reactive power measurements, unbalance, and harmonics to pinpoint the true dollar cost of system energy losses. Rugged, reliable tools test power quality for troubleshooting, preventive maintenance, and analysis in industrial applications and utilities. Color LCD display. CAT IV 600V safety rating for use at the service entrance.

Rugged, reliable tools test power quality for preventive maintenance and long-term recording and analysis in industrial applications and utilities.

VOLTAGE RECORDER

Fluke VR1710 Voltage Event Recorder

- Records all values continuously with no gaps
- CAT II 300V

Easily pinpoints the root cause of 1-phase voltage problems. Plugs directly into main power socket to capture data for fast, easy recording of voltage trends, dropouts, and power quality. Saves testing time by simultaneously recording events and voltage. Includes USB interface cable and software.

3-PHASE ENERGY LOGGERS

NIST Certified.

Fluke 1732/B and 1734/B

Easy-to-use, 3-phase electrical energy loggers help find the sources of electrical energy waste. Loggers discover when and where energy in your facility is being consumed—from service entrances to individual circuits. Connect with other Fluke Connect devices to simultaneously log up to 2 other measurement parameters (log virtually any parameter available on a Fluke Connect wireless digital multimeter or module).

Fluke 1736

This power logger can employ the Fluke Connect Mobile App and desktop software to help you respond in real time to critical power quality and energy consumption data. The instrument automatically captures and logs more than 500 power quality parameters for energy studies and power quality logging, to help you optimize system reliability and cost savings. Comes with voltage test leads, 4 alligator clips, four 1500A flexible current probes, WiFi adapter, 3 line cords, color coding set, Fluke Energy Analyze Plus software on a USB flash drive, and soft case.

3-Phase Power Quality Recorders

EXTECH INSTRUMENTS DRANETZ

4DKJ9

32ZN35

- **Backlit LCD shows 35 parameters**

Work with 1- and 3-phase systems (wye and delta). Programmable sampling rates. Log voltage, current, sags or surges, harmonics, energy, power factor, power, and frequency.

Note: Additional accessories are available on Grainger.com; search for "power quality recorders accessories."

PQ3400 Series—Provide true RMS power measurements on displays that can be read in direct sunlight. Adjustable CT and PT ratios. Log up to 30,000 readings in Microsoft Excel format on a removable SD memory card for easy data transfer. Each includes 4 voltage leads with alligator clips, universal 100 to 240VAC adapter, case, and AA batteries. Cat III 600V.

- **Kit current capability up to 3000A, probe dependent (clamp probes sold separately)**
- **2 GB SD memory card**

382100 Series—Provides simultaneous display of true RMS data. Adjustable CT and PT ratios. Includes three 1200A current clamps, 4 voltage leads with alligator clips, AC adapter, AA batteries, and case. CAT III 600V.

- **Optically isolated RS-232 interface; USB adapter**

PQ3350 Series—Provide clamp-on true RMS power measurements with simultaneous display. Adjustable CT and VT ratios. Measure 1- and 3-phase/3-wire or 3-phase/4-wire systems with datalogs (52,428 1-phase readings, 17,476 3-phase). Each includes 3 flexible clamp probes (1200A, 12" PQ3350-1; 3000A, 24" PQ3350-3), 4 voltage leads with alligator clips and retractable plunger clips, USB cable, software, AC adapter, case, and AA batteries. CAT III 600V.

- **Graphic phase diagram with 3-phase system parameters**
- **Peak capture**
- **Optically isolated USB interface**

Power Quality Recorders—The Dranetz HDPQ merges state-of-the-art power monitoring capabilities with excellent communication capabilities to provide users with an exceptional monitoring experience. Each instrument has a built-in 7" color widescreen LCD user interface for monitoring setup and data review. By putting operator safety first, the Dranetz HDPQ also enables users to review data and change settings remotely from virtually any Smartphone or Tablet mobile device, along with traditional PC and Mac laptops and desktops. Just hook up the instrument, close the cabinet doors to the "safe" the environment, and use either a free third party VNC App or the Dranetz HDPQ Apple or Android App.

AEMC CL601—Self-contained, data logging, true RMS AC clamp-on current logger offers simple 1-button operation with no exposed connections. 64 samples per cycle. Overload indication. Includes DataView software, USB cable, and batteries.

- **Jaw opening: 1.7"**
- **5 LED indicators**

AEMC L261—Provides continuous voltage recording for up to 8 wk. and real-time wave form viewing when connected to a PC. Sampling rate is programmable from ⅛ sec. to 1 in 24 hr. Has true RMS and DC voltage logging. Includes test leads, DataView software, interface cable, and batteries.

Extech DL160—Can simultaneously measure 2 AC voltage inputs, 2 AC current inputs, or 1 each of AC voltage and AC current. Programmable sample rate from 1 sec. to 24 hr. Readings can be downloaded to a PC for analysis. Includes 2 current and 2 voltage sensor modules, 2 test leads, 2 alligator clips, software, USB cable, universal AC adapter, and batteries.

Extech DL150—Has programmable sample rate from 1 sec. to 24 hr., and true RMS readings to 600V or 200A. Data can be downloaded to a PC for analysis with included software. Includes current clamp, test leads, USB cable, universal AC adapter, and battery.

Milliohm Meters and Micro-Ohm Meters

Measure resistance of motor coils, circuit breaker contacts, transformers, and printed circuit board layouts. Test leads have Kelvin clip connectors.

AEMC—5GTJ1 has a polarity reversal switch for bidirectional testing and features overload and input fuse protection. Stores up to 99 test results. DataView software included.

Seaward Cropico—4-terminal measurement with automatic or manual current range selection and open circuit lead warning LED. 39N142 measures temp. from -50° to 800°C, with automatic temperature compensation.

Extech 1XU20—High-resolution instrument provides 7 resistance ranges, with automatic zero and built-in comparator for Hi/Lo/Go resistance testing or selection.

Extech 4PC52 and 5ZR91—Precision testers feature manual zero display adjust and over-range indication.

Extech 1XU18—Overtemperature/overvoltage protection, plus invalid test indicators and auto-hold.

Megger 4WXR6—Power limited ranges, high power outputs, and 10A duty cycle ranges, with high noise immunity and up to 600V protection between terminals.

Megger 1APD9 and 1APE1—Low-resistance testers average forward and reverse readings and provide manual current selection or automatic testing of contact resistance and bonds. 1APE1 features selectable high/low test limits and stores up to 700 time-stamped tests to download via RS-232 interface.

Motor Rotation Indicators and Testers

Devices help ensure correct motor/pump installation by identifying the phases and CW/CCW rotation, to prevent damage to the motor or electrical system.

AEMC Phase Sequence Tester—Detects open or de-energized phases. Determines correct wiring for proper rotation. Color-coded leads and black alligator clips. Line powered; no battery required.

Amprobe Phase Sequence Motor Rotation Tester—Tests power sources and motors, using test leads or wirelessly. L1/L2/L3 inputs. Convenient error display. Test leads, probes, alligator clips, carrying case, and AAA batteries.

Extech Noncontact Phase Sequence Tester—Checks phase sequence and status on 3-phase power sources. Beeper indicates phase detected and if it is reversed. 3 built-in, 30" test leads have color-coded, fully insulated alligator clips. Includes case and AA batteries.

Extech Phase and Motor Rotation Tester—Checks phase orientation on 3-phase power sources and shows motor rotation. Indicates phase sequence and status.

Extech Phase Sequence Tester—Phase orientation on 3-phase power sources. Graphical and multiline indication. No battery required.

Megger Phase and Motor Rotation Tester—Tests phase sequence and rotation, motor rotation, and transformer polarity without having to first energize the motor. Fuse-protected test leads, spare fuses, and battery.

UEi Test Instruments Hermetic Compressor Analyzer—Indicates motor winding continuity and ground faults. Breakout jacks for voltage and resistance, 3 ranges of 250VAC, dual AC voltage operation, and reverse motor option.

Earth/Ground Resistance Testers

Each includes carrying case and batteries.

Extech Autoranging Clamp-On Tester 1YB44—Measures resistance current from 0.2mA to 30A. Programmable data logging with 116 data points. Automatic self-calibration, high/low alarms, and 9999-count LCD. Resistance check plate.

Megger Autoranging Clamp-On Tester 46AN65—Measures resistance current from 0.5mA to 35A and true RMS ground leakage current up to 35A RMS. Stores up to 2000 date- and time-stamped records. Electric noise filter, intelligent data hold, resistance and current alarms, and Bluetooth download capability. Includes calibration check, wrist strap, and software.

AEMC Autoranging Tester 4GA30—2- to 4-point ground resistance tester is fuse-protected to 250VAC. All error conditions are listed on the front panel, including low battery, overrange, and test lead shorts and lead reversals. Requires ground kit.

Extech 4-Wire 13X132—Autoranging tester with automatic zero adjustment measures resistance current less than 2mA. Performs 4-, 3-, and 2-wire testing with automatic I (current) and P (potential) spike checks. AC earth voltage, test hold, data hold, and overrange and low battery indication. Includes test leads with alligator clips and 4 auxiliary earth bars. Pollution degree 2.

Megger 1-Button 2MY25—Ground rod and grid testing and noise rejection to 40V. Measures ground resistance without disconnect when used with clamp 2MY26, sold separately on Grainger.com. IP54 weather-resistant. Includes probe and wire test kit.

Extech 3-Range Kit 9XKP5—Measures earth/ground resistance in 3 ranges. Hold, auto-zero, auto-off, and overload protection. Indicates overrange and low battery. Includes test leads, 2 auxiliary earth bars, and rubber holster.

Insulation and Leakage Testing Basics

Equipment—including motors, drives, cables, and transformers—relies on insulation for proper operation. In insulation testing, a relatively high DC voltage is used to make leakage current more apparent (similar to pressure testing a plumbing system). Although instruments supply high voltage, the current delivered is strictly limited to protect machinery and ensure operator safety.

Most digital multimeters have a resistance measurement capability, but this function uses just a few volts. What's needed is to test the insulation at a higher voltage than working voltage. This will ensure that any leakage will show up, and if there is a potential for arcing it will occur under controlled test conditions. If testing above the working voltage is not possible, insulation resistance can be determined by measuring leakage current directly with a leakage clamp meter.

Insulation and Leakage Testers

FLUKE

Rugged and reliable testers are designed for troubleshooting and preventive maintenance applications. 1k to 10kVDC output tests insulation beyond working voltage and ensures that leakage and arcing are identified in a controlled testing environment.

FLUKE 1507/1503 MEGOHMMETERS

- Earth bond resistance measurement verifies grounding integrity

Insulation testers have a remote test probe that simplifies repetitive or hard-to-reach testing. 1BE65 has a CAT III 1000V, CAT IV 600V safety rating; 1BE68 has CAT III 600V. 1BE65 autocalculates polarization index (PI) and dielectric absorption ratio (DAR), saving time and money. Its pass/fail compare function enables repetitive tests.

FLUKE 1555/1550C MEGOHMMETERS

- Selectable test voltages: 50V increments from 250V to 1000V, 100V increments above 1000V
- Autocalculate polarization index (PI) and dielectric absorption ratio (DAR) with no additional setup
- Guard system prevents leakage current effect on high-resistance measurements
- Capacitance and leakage current measurement
- Ramp function for breakdown testing

Provide digital insulation testing up to 10,000V (1555) or 5000V (1550C)—the entire range of test voltages specified in IEEE 43-2000. Test a wide range of high-voltage equipment, including switchgear, motors, generators, and cables. Store up to 99 measurements with user-defined labels, with a PC interface for preventive or predictive maintenance programs. 5NLK9 includes heavy-duty alligator clips. Kits add NIST certificate of calibration, IP67 case, and heavy-duty alligator clips for 1550C. Instruments have CAT III 1000V, CAT IV 600V safety rating.

FLUKE 1587/1577 INSULATION TESTERS

- Autodischarge capacitive voltage
- AC/DC voltage, DC mV, AC/DC mA, resistance, and continuity

Instruments provide 2 powerful tools in 1—a multimeter and an insulation tester. Model 1587 adds capacitance, diode test, temp., min./max., frequency, and low-pass filter. Both have CAT III 1000V, CAT IV 600V safety rating.

FLUKE 1587FC/MDT ADVANCED MOTOR AND DRIVE KIT

- Polarization index (PI) with dielectric absorption ratio (DAR)
- Memory storage and temperature compensation through mobile app
- Bluetooth interface

Digital LCD (backlit), remote probe, contact temperature probe, phase rotation indicator, and VFD low-pass filter. Kit includes Fluke 1587FC Insulation Multimeter (45ZA03), Fluke i400 Current Clamp (4YE82), and Fluke 62 Max +IR Thermometer (16X950). Instruments have CAT III 1000V, CAT IV 600V rating.

Vibration Testers

FLUKE.

Vibration measurement and evaluation is one of the best ways to assess the condition of rotating machinery. These vibration testers make machine condition evaluation fast and simple for frontline technicians by providing onboard identification and severity of the most common mechanical faults: bearing impacting, shaft misalignment, looseness, and unbalance. Fault conditions are categorized as slight, moderate, serious, or extreme to help prioritize corrective actions.

FLUKE 810 VIBRATION TESTER

Compares machine vibration signatures to a database of hundreds of thousands of machines of many types, sizes, and configurations, to produce an instant diagnosis and severity without the need to build-up measurement baselines over time. Includes laser tachometer, tri-axial accelerometer with magnet, viewer PC software, training DVD, smart battery pack with charger. 3-yr. warranty.

FLUKE 805 FC VIBRATION METER

Fluke Connect-enabled wireless meter monitors machine condition with direct-measurement sensor tip, noncontact IR temperature sensor, and connector for external magnetic sensor accessory.

FLUKE.

Earth/Ground Testers

Provide frontline troubleshooting and in-depth soil analysis—a complete solution for utilities, electrical contractors, industrial facilities, telecom, and data centers. Each includes required connections, leads, and hard case. Genuine Fluke accessories are available on Grainger.com, search for "earth ground tester acc".

FLUKE 1623-2 AND 1625-2

Designed with 3- and 4-pole fall of potential and 4-pole soil resistivity testing. Also features selective earth ground rod testing using 1 clamp and stakeless earth ground rod testing using 2 clamps. 30JZ61 features automatic frequency control that identifies existing interference and selects a measurement frequency to minimize its effect; provides more accurate earth ground value. Also calculates earth ground impedance at 55 Hz to more accurately reflect the earth ground resistance that a fault to earth ground would see. Includes adjustable limits for faster testing. Kits 30JZ58 and 30JZ59 include 4 stakes, 3 wire spools, 2 clamps, cables, batteries, manual, and carrying case.

Portable Oscilloscopes

FLUKE

Connect-and-View automatic triggering captures complex signals. TrendPlot paperless recorder mode extends trend analysis up to 22 days. 5 versions of each model are complete kits that include FlukeView ScopeMeter software and hard carrying case. NIST versions include calibration certificates.

Note: Additional accessories are available on Grainger.com; search for "fluke oscilloscope accessories."

FLUKE 190 SERIES

- DMM and paperless recording modes
- Color display
- Safety rating: CAT III 1000V, CAT IV 600V, with isolated floating inputs

Rugged instruments combine oscilloscope and digital multimeter (DMM) functionality in a single housing, for use in harsh environments. 60-, 100-, 200-, and 500-MHz oscilloscopes provide up to 2.5G samples per sec. (Sa/s) with advanced triggering, waveform measurement, and analysis. They feature 2- and 4-channel input. Each includes shielded 10:1V test lead, ground lead, 2 hook clips, 3 alligator clips, banana-to-BNC adapter, rechargeable Li-ion battery pack, and charger.

COMPACT SCOPEMETER 120B SERIES

- Paperless recording
- Safety rating: CAT IV 600 V

5,000-count True-RMS digital multimeters combine an oscilloscope, multimeter, and paperless recorder in a rugged, IP51 housing for use in harsh environments. They integrate with the Fluke Connect mobile app and FlukeView for ScopeMeter software for easier collaboration, enhanced data analysis, and improved critical test information archiving. Fluke 125 models also perform harmonics and bus health test. Complete kit contents are listed on Grainger.com.MDA-500 Series Motor Drive Analyzers

- Built-in report generator
- Color display
- Safety rating: CAT III 1000V, CAT IV 600V

Portable Motor-Drive Analyzers help ease troubleshooting for inverter-type motor drive systems, with guided testing and preset measurement profiles to make sure that you have the data that you need. Measure key motor-drive parameters, perform extended harmonics measurements, conduct guided measurements, and create reports all with a single tool. Graphical step-by-step voltage and current connection diagrams ease set-up.

Analog Panel Meters

- ±1.5% accuracy
- Polycarbonate window

Each includes panel cutout template and mounting hardware.

Percent Load Meters—These sensitive meters visually monitor the load conditions of AC or DC motors while they are running, helping to prevent motor overloading and burnout. Scale is color segmented for easy reading.

Current Transformers and Shunts for Digital and Analog Panel Meters

CURRENT TRANSFORMERS

Produce a 5A output for each primary range.

SHUNTS

50mV shunts enable a digital or analog panel meter to indicate higher DC currents than with a self-contained internal shunt. Portable units are mounted in a phenolic base. Switchboard units mount directly onto a busbar.

Primary Range	Item No.
Solid Core Current Transformer	
0 to 50A	12G458

EXTECH INSTRUMENTS   BK PRECISION ELECTRONIC TEST INSTRUMENTS

Single-Output DC Power Supplies

EXTECH

Each includes power cord.

5% to 100% Current Limits

6XAA3 and 6XAA5: Short circuit protection. Constant voltage or current. High load/line regulation. Banana plug output terminals. Low noise/ripple.

13X092: Dual-action voltage and current control with push-knob for fine and coarse tuning. Automatic constant current and constant voltage crossover. Remote control for output voltage/current and On/Off. 2 custom voltage and current presets and 13.8V/20A factory preset. Overvoltage, overtemperature, and short-circuit protection. High RFI immunity and excellent EMI.

B&K PRECISION

Constant Current

- Parallel or series connection
- Load regulation

6T508: Overload, thermal, and short-circuit protection.

2LUW9: Overload and short-circuit protection. Variable voltage output at continuous operation. Output selectable by slide switch.

2LUW7: Overcurrent, overvoltage, and overtemperature protection. Automatically recalculates voltage/current limits for each setting. Output On/Off control. 100W max. output.

0% to 100% Current Limits

- Reverse polarity and overload protection
- Parallel or series connection
- 16 programmable preset outputs
- In-case calibration
- Output On/Off control
- Selectable 10mV/10mA resolution
- Load regulation

Each includes RS-232-to-TTL cable and software.

5% to 100% Current Limits

- Reverse polarity, overload, thermal, and short-circuit protection, except 1T197 reverse polarity and overload only
- Load regulation
- 0 to 30V models offer constant voltage and current and parallel or series connection
- 0 to 60V and 0 to 35V models offer current limiting, constant current, or voltage operation

AMPROBE Leica Megger RIDGID

Underground Utility Locators

Receiver (locator) and transmitter combine to trace buried wire, pipe, and cable lines to help avoid injury or underground utility damage during excavation operations.

LOCATORS

Amprobe Underground Utilities Locator—Digital signal processing enables variable filtering, signal amplification, and noise reduction. Measures energized circuits with included inductive transmitter. Features fused voltage protection and 50/60 Hz passive tracing.

Leica Underground Utility Locator—Locates and traces energized lines up to 10 ft. deep. When used with the signal transmitter (Digitex), range can be over 5000 ft. and detect de-energized lines and pipes. Inductive and direct signal capabilities with 3 different frequencies.

Megger Split Box Pipe/Cable Locator—Finds buried manhole covers and traces energized or de-energized cables up to several miles. Peak and null detection. 126 kHz output frequency. Inductive transmitter allows measurement of energized circuits.

RIDGID Utility Locator—Antennas receive active and passive signals from all directions. Inductive and direct connection. Transmitter sold separately.

RIDGID High-Frequency Utility Locator—Can be configured with up to 30 frequencies. Continuously searches passive power and radio bands to locate and avoid unknown metallic lines. Traces energized lines and sondes (beacons) simultaneously. Inductive and direct coupling.

ACCESSORIES

Leica—Property connectors in 2VCX9 connect Signal Generator 2VCX5 to any standard 120V outlet to locate outside power supply. Service Tracer Mouse 2VCY1 is a dual-frequency standard sonde used with service locators and tracers to trace nonmetallic pipe. Signal Generator 2VCX5 includes connection cable set containing earth spike, and crocodile connection cable.

RIDGID Inductive Signal Clamp—Where direct connect is not possible, fits around 4" lines to apply a signal to cable or pipe. For use with RIDGID transmitters, sold separately.

498X84

2VCX4

3JG93

2YCA5

RIDGID Transmitters—Use with RIDGID utility locators to locate buried utility lines.

1DPH3 can transmit dual frequencies and audibly confirms good circuits; with two 10-ft. coil connectors. 1DPH4 displays line resistance, current flow, and power; with two 25-ft. coil connectors.

2YCA4 induces at 8 kHz and 33 kHz for longer trace lines and low-distortion locates. Displays line resistance and current flow; with grounding stake and two 10-ft. coil connectors.

UEi TEST INSTRUMENTS

Cable Length Meter

Measures copper and aluminum cables, and covers the major wire gauges. Automatic temperature compensation; reads in feet and meters. Milliohm measurement capability measures from 15 to 30,000 ft. 5-yr. warranty.

Connector Type	Includes	Item No.
Kelvin Clip Leads	Abrasive Pad, Copper Calibration Bars, Soft Carrying Case, Test Leads	**29RM95**

Ferrous Metal Locators

CST/berger

Instruments locate iron, surveyors' markers, valve covers, and other ferrous objects underground, underwater, or in snow. Each includes soft case.

3XA25—LCD with digital bar graph. Sensitivity switch allows manual adjustment.

1ELK5 and 1ELK6 with Erase—Detect metals up to 15 ft. underground. Aluminum sensor tube allows use in various weather conditions. Erase button helps distinguish between target item and interfering items. With high-tech magnetic sensors and electronic balancing. LCD with digital numeric and bar graph displays, plus power line indicator. 1ELK5 analog bar graph allows you to locate visually.

Combination Tachometers

EXTECH INSTRUMENTS · AMPROBE · MONARCH INSTRUMENT · Nidec SHIMPO

Handheld instruments offer surface and noncontact measurement choices. Each includes batteries. NIST models include certificate and calibration documents.

EXTECH

Tachometers and Laser Tachometers—Laser light source, except 8PMK7 and 22DC94 have visible light source. Each includes tip(s) and wheel for contact readings and reflective tape for noncontact.

41D940 and 41D941 also measure length.

Tachometers with Infrared Thermometer—Make contact/noncontact speed measurements and noncontact surface temperature measurements.

- IR temp. range -4° to 600°F

AMPROBE

Tachometer 6NGZ4—Makes contact/noncontact speed measurements with noncontact rpm. Infrared light source. Features selectable units in contact mode and data hold. Includes cone and funnel contact tips and reflective tape.

Tachometer 4FKR9—Measures rotational and surface speed, with selectable rpm/length units using the infrared beam or adapter. Includes 6 adapters, reflective tape, and carrying case.

- Meter/foot/inch length measurements

MONARCH INSTRUMENT

Laser Tachometer and Kit—Pocket Laser Tach 200 is a 32-function tachometer/ratemeter, totalizer/counter, and timer (stopwatch). Fixed decimal points. TTL compatible pulse output can trigger data collectors or stroboscopes. Accepts remote optical sensor 3WB47, sold separately on page 565. Tripod mountable.

Instrument 4YE86 includes 12" reflective tape. Kit 4YE87 adds remote contact assembly with concave and convex tips, 10cm linear scope wheel, 5-ft. reflective tape, and carrying case.

SHIMPO

Tachometers—Measure rotational, linear, and surface speed plus total length. 10-measurement memory. Complete with 2 cone tips, funnel tip, extension shaft, and carrying case. Speed wheel included: 6" with 21YD75 and 21YD76, 12" with 21YD77 and 21YD78.

Digital Contact Tachometers

EXTECH INSTRUMENTS · Nidec SHIMPO

Extech—Each includes interchangeable cone, flat tips, surface speed wheel, carrying case, and AA batteries.

- Digital
- Max./min. values

Shimpo—Measure rotational, linear, and surface speed plus total length. 10-measurement memory. Each includes 2 cone tips, funnel tip, extension shaft, speed wheel, carrying case, and AA batteries. 21YD66 and 21YD67 have a standard 6" speed wheel.

21YD68 and 21YD69 have a 12" wheel for enhanced accuracy with high-speed readings.

- Digital
- Last/max./min. recall
- 16 selectable units

Stroboscopes and Tachometers

EXTECH

Digital Stroboscope/Tachometer—Handheld instrument has xenon flashtube light source. Includes 6-ft. power cord and lamp.

FLUKE

Digital LED Stroboscope—High-intensity 7-LED array in high-efficiency, uniform-flash LED light source, which combines with digital pulse width modulation to return exceptionally sharp images at high speeds.

MONARCH INSTRUMENT

Rechargeable digital strobes provide continuous safe, cool operation. Fully backlit LCD. Each includes standard 120V charger for internal rechargeable battery. Battery life: LED 8 hr. and xenon 2 hr. Kits add spare lamp and carrying case.

Basic Stroboscopes and Kits—Digital control. Superbright LED or xenon flashtube light source.

Deluxe Stroboscopes and Kits—Multibutton keypads for x2/÷2 brightness adjust, visual phase shift, and tach mode. 8 to 10 hr. run time for LED. 3-hr. recharge time.

- Internal phase shift
- TTL input/output jacks
- Superbright LED or xenon flashtube light source

Phaser Stroboscopes and Kit—Allows degrees phase shift and time delay from external trigger. Multibutton keypad for advanced intuitive control. High-power charger/supply for continuous operation.

- External phase shift
- TTL input/output connectors
- Superbright LED or xenon flashtube light source

PLS Pocket Strobe and Kit—Provides a uniform light output for visual diagnostic inspection and rpm measurements. Features external input for remote triggering or tachometer mode, pulse output and memory for up to 5 present flash rates. 5- to 6-hr. run time.

SHIMPO

Stroboscope 787YX3—Compact LED scope has coarse/fine tuning and user-defined flash rate memory storage. 5-digit display.

⅛-DIN Panel Tachometers and Sensors

PANEL TACHOMETERS

Extech 5AY32—Permits rpm measurements of a 1-hole gear or disc, eliminating the need for special gears. Display updates once per sec. Resolution: 0.1 rpm.

Monarch Instrument 4KF46—Universal-input instrument for 2- and 3-wire sensors requires 1 pulse per revolution.

Monarch 5TDG6 and 5TDG7—Programmable universal-input instruments for 2- and 3-wire sensors measure mph, cm/sec., and other units, including linear rate of travel when using 2 sensors. 1 pulse per revolution. 2 setpoints for high/low alarm. RS-232C interface.

SENSORS

Extech Photoelectric Sensor—Generates a light beam with a 0.4" (10mm) target opening.

Proximity Sensors—For use with ferrous/nonferrous metals.

Extech 5AY33 measures a pulse when a metallic object (stud) passes by the sensor. Min. object detection size: 0.07" x 0.11" (2mm x 3mm).

Monarch 4KF50 has an inductive probe that allows use with a 0.5" metallic target (bolt head or keyway).

Monarch Magnetic Sensor—As distance increases, output signal decreases. Includes 8-ft. cable and mounting nut.

- For use with ferrous metal gear teeth; min. target size 0.001"

Monarch Remote Optical Sensor—Stainless steel sensor operates up to 3 ft. and 45° from reflective target. Includes mounting bracket and 12" reflective tape. Additional reflective tape sold separately.

- LED light source and on-target indicator
- For use with reflective tape

Tension/Compression Digital Force Gauges

Measure standard and peak tension (pull) or compression (push) of mechanical items and systems.

SHIMPO

- 1000 Hz sampling rate
- LCD with reversible viewing direction

Gauges feature standard or peak measurement modes, force direction indication, and reversible keypad. Auto-Off can be disabled for continuous use with included AC adapter/charger. Each includes tension attachment (hook), compression attachments (chisel, flat, notched, and cone), metric/English thread adapter, extension rod, and hanger.

FGE-HXY and FGE-XY—Feature peak hold. Selectable oz., lb., g, or Newton units (8- to 32-oz. range) or lbs., kg, or Newton units (5- to 500- lb. range).

FGV-HXY and FGV-XY—With selectable High/Low comparator, onboard min./max./peak/avg./standard deviation, and continuous and single memory options. Software package, RS-232/USB/analog outputs, and USB cable for data export and analysis.

Selectable oz., lb., g, or Newton units (8- to 32-oz. range) or lb., kg, or Newton units (5- to 1000-lb. range).

EXTECH

- 5-digit LCD with reversible viewing direction

Feature peak hold and zero/tare functions. 0.2 (fast) and 0.6 sec. (slow) response time settings. Each includes AA batteries. Optional data acquisition software with RS-232 cable 1CLF1 and optional USB adapter cable 1CLF2, sold separately on Grainger.com

Force Gauge/Data Loggers and Gauges with 44-lb. and 176-oz. Capacity—Feature load cell measurement transducer with tension adapter (hook), compression adapters (flat, cone, and chisel), and 5" extension rod.

Force Gauge with 220-lb. Capacity—RS-232 interface for data export. Backlit display. Includes tension and compression adapters (hooks), S-type load cell, and 6½-ft. cable.

D1784

Tension/Compression Mechanical Force Gauges

- Accuracy: ±0.2%
- Dial indicator

Measure tension (pull) or compression (push) in real time or peak mode for assembly line quality control. 165-lb. overload protection safeguards against damage. Each includes compression attachments (flat, chisel, notched, and cone), tension attachments (hook, large hook, and large V-hook), extension rod, and carrying case.

Heavy-Duty Vibration Meters

Batteries and carrying case are included.

EXTECH

Digital Vibration Meter Kits—Measure velocity, acceleration, and displacement. Feature Min./Max. and RMS or peak value measurement. With built-in RS-232 interface and LCD. Each includes remote vibration sensor with 3.9-ft. cable, magnetic mount, and holster. Can store and analyze data with optional software and cable 1CLF1, sold separately on Grainger.com.

Pen Vibration Meter—Measures RMS acceleration and velocity, with zero adjustment and low battery indicator. Housing is IP65 dust-tight and waterproof. Includes pin-tip probe, and magnetic mount.

Vibration Meter/Data Loggers 13X134 and 43Y050—Measure velocity, acceleration, and displacement. Feature Min./Max., RMS/Peak/Max. Hold modes, and selectable sampling rate from 1 to 3600 sec. Retain up to 99 readings, or use included 2G SD card to store datalogs for analysis. Include remote vibration sensor with magnetic mount on 47.2" cable.

MONARCH INSTRUMENT

Vibration Tester—Meter/stethoscope system measures acceleration, velocity, and acceleration enveloping. Features bearing gear check and LCD. Includes accelerometer with cable, headphones, magnetic base, and stinger.

TPI

Vibration Meters—Easy-to-use vibration monitoring and analysis tools display vibration signals. Automatically perform vibration analysis functions based on machine running speed to help diagnose faults such as unbalance, misalignment, and looseness. Designed for use with assets like pumps, motors, fans, or bearings.

Coating Thickness Gauges

DeFelsko Inspection Instruments · EXTECH INSTRUMENTS · REED INSTRUMENTS

METAL TESTING

- Ferrous metals such as steel or iron
- Nonferrous metals such as brass, aluminum, or copper

Thickness Tester—Provides automatic substrate recognition: magnetic induction for ferrous substrates, eddy current measurement for nonferrous. Features single and continuous measuring modes; direct and group working modes with memory storage of 400 readings: 80 direct and 320 group. Includes user-settable high/low alarms, min./max./average measurement, and 1- or 2-point calibration. Comes with USB interface cable, software, calibration iron, calibration aluminum, precision standards, AAA batteries, and carrying case.

PosiTest DFT 2GE21 and 2GE22—Compact digital units include wrist strap, precision plastic shims, 2 AAA batteries, and hard carrying case. Features zero and 1-point calibration adjustments. Displays the average for up to 99 measurements. 2GE21 measures coatings on steel. 2GE22 measures coatings on steel and aluminum.

PosiTector 6000—Instruments feature no calibration adjustment required for most applications, 1- or 2-point adjustment. Average zero feature, mils/microns/mm switchable, adjustability to known thicknesses, and high-resolution mode. Provide audible and visible high/low limit alerts, calculations of average, standard deviation, and min./max. thickness. Standard models 12Y318 and 12Y320 have a 250-reading memory capacity. Advanced models 12Y319 and 12Y321 feature 100,000/1000 group reading memory capacity, Scan mode, on-screen batch annotation, and data transfer via USB, WFi, or Bluetooth. All models include rubber holster with belt clip, USB cable, PosiSoft software, nylon case, and NIST calibration certificate.

PosiPen—Pen-type, pull-off gauge is permanently calibrated to measure small steel parts, hot surfaces (up to 450°F), and hard-to-reach places. Includes leather pouch and calibration certificate.

PosiTest FM and GM—Permanently calibrated, mechanical pull-off gauges measure nonmagnetic coatings on steel only. Each includes wrist strap, leather pouch, and calibration certificate.

NONMETAL TESTING

PosiTector 200—Each includes plastic shims, protective rubber holster, 1 bottle ultrasonic couplant, USB cable, PosiSoft software, nylon carrying case, AAA batteries, and NIST calibration certificate.

Ultrasonic Wall Thickness Gauges

DeFelsko Inspection Instruments · CorDEX · EXTECH INSTRUMENTS

DEFELSKO

PosiTector ultrasonic thickness gauges (UTGs) measure wall thickness of materials such as steel, aluminum, plastic, and more. Flip display for right-side-up viewing in-hand or on work table. Accuracy: ±0.001", ±0.03mm. 250-reading memory. Each includes 5 MHz probe, protective rubber holster, couplant, USB cable, PosiSoft software, AAA batteries, nylon carrying case, and calibration certificate. Conform to ASTM E797.

UTG C (Corrosion)—Measures the effects of corrosion or erosion on tanks, pipes, or any structure accessible on 1 side only. Excellent for rough surfaces and heavily corroded applications. Scan mode for quick inspection over a large area.

UTG M (Multiple Echo)—Features through-paint capability to measure the metal thickness of a painted structure without removing the coating.

CORDEX INSTRUMENTS

UT5000 Intrinsically Safe—Provides nondestructive testing and predictive maintenance on pipelines and fixed equipment in hazardous locations. Built-in RFID+ software tags measurements with their locations along the pipeline and then organizes the data to give engineers the view at any specific location. Corrosion mode helps identify thinning spots. Accuracy: ±0.05mm (0.002").

EXTECH

Compact, rugged meters for nondestructive thickness measurements. 20LK16 features a 5 MHz probe, dot-matrix display, high-impact housing, and ability to capture minimum thicknesses. IP54 rated. 20LK17 includes echo-to-echo option to reduce coating errors, B-scan, and vibrate on alarm. 20LK18 has a color LCD, live waveform, file compare feature as a real-time corrosion monitor, dynamic change of waveform color on alarm, and grid review of saved readings.

Dial Industrial Pressure Gauges with All-Stainless Steel Wetted Parts

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 20,000 psi at Grainger.com
- Stainless steel housing

Thread-mounted gauges have a bottom or back connection. Measure low and high positive pressures and are available in vacuum and compound ranges. Stainless steel wetted parts resist rust and corrosion. Commonly used for higher temperature process media when temperatures exceed 140°F (60°C).

Vibration-resistant gauges are available with liquid-filled cases or proprietary dry-case resistance technology for applications exposed to pulsation, spikes, and vibration.

Pic gauges have laminated safety glass lenses.

Ashcroft and Winters gauges have polycarbonate lenses.

High-Accuracy Dial Process Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 10,000 psi at Grainger.com
- 4½" nominal dial size
- Glass lenses

High-accuracy movement for use in demanding chemical and petroleum process applications. Operate at temperatures up to 150°F and higher. Thread-mounted with a bottom connection. **Stainless steel wetted parts** resist corrosion, rust, and many processed chemicals.

Gauges with adjustable red max. hand allow setting a maximum set point against which the main pointer can be visually gauged.

Industrial & Process Panel-Mount Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 1000 psi at Grainger.com

Gauges feature a front- or back-flange panel mounting ring. Threaded connection attaches to the process, pipe, or tank. Process connection and connection location must be compatible with the type of application as well as the size of the panel cutout required. **K4534** has adjustable red max. pointer that allows setting a maximum set point against which the main pointer can be visually gauged.

Back-flange gauges securely mount flush with a wall, panel, or other surface.

Front-flange gauges have the flange positioned near or as part of the bezel and can be secured flush to the panel without protruding from it.

Duro gauges have glass lenses.

Winters gauges have polycarbonate lenses.

3-A Certified Sanitary Pressure Gauges

- Available in pressure ranges from 0 to 300 psi at Grainger.com
- Stainless steel housing
- Stainless steel wetted parts

Use in food, beverage, dairy, and pharmaceutical applications where high standards of sanitation and washdown conditions are required. A flat process connection on the bottom allows for quick release of the gauge with minimal risk of contamination. Mount with a triclamp for quick clamping and removal in washdown environments.

Dial gauges are certified for the dairy industry, and select models have a liquid-filled case to dampen vibration and pulsation.

Digital gauges are available with battery power, or loop- and line-powered for applications where the gauge must remain continuously on.

Dial Pressure Gauges with Color-Coded Cases

- Available in pressure ranges from 0 to 400 psi at Grainger.com
- 4" dial
- Plastic housing
- Brass/bronze wetted parts
- ¼" NPT male bottom connection
- Polycarbonate lenses

Gauges are available in a variety of case colors to allow for easy identification and organization of lines or processes.

Digital Industrial & Process Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 5000 psi at Grainger.com
- Plastic housing

Digital LCD shows numeric readings in a variety of selectable engineering pressure units. Threaded bottom connection. Gauges should be compatible with the process media and necessary grade of accuracy required.

G5751 gauges provide readings on digital LCD in 9 selectable units of measure. Require 9V battery (not included).

Dwyer gauges have a 4-digit LCD with selectable engineering units of measure and digital push-button zero. Auto shut-off to conserve battery life; batteries included. **K4240 and K4246** include protective rubber boot. **K4245 and K4247** have a 4-button keypad for advanced features including peak and valley, tare or auto-zero, and conversion of pressure units.

SSI gauges contain a piezoresistive pressure sensing element, signal conditioning circuitry, stainless steel input pressure port, and 4-digit backlit LCD with selectable units: bar, Mpa, and psi. Readings updated 3 times per sec. Operate on 9V battery with battery-saver mode.

Ashcroft gauges have a 5-digit LCD to show readings in 9 selectable units of measure. 20-segment bar graph display. Include batteries.

Weiss gauges have a 4-digit LCD for 4 selectable units of measure plus averaging. Powered by a solar cell on the case housing. Run continuously on as little as 10 lux (1 foot-candle) of ambient light. IP65 weatherproof housing.

Digital Pressure Gauges with Transmitters

- Available in pressure ranges from 0 to 5000 psi at Grainger.com
- 4 to 20mA DC output
- Stainless steel wetted parts

Convert pressure readings into electrical signals that are transmitted to a receiver, control panel, or other system. Digital LCD display with selectable units of measure. Can be used for on-the-spot readings, transmitting readings to external sources, and to alert technicians when a designated set point is met. Commonly used in fixed installations to monitor spikes or drops in pressure or when a sudden change requires an automated or immediate response.

Light-powered gauges have a solar cell that requires a minimum level of ambient light. Ideal for applications that require continuous monitoring, with no battery changes needed.

Sanitary gauges have a triclamp process connection and diaphragm sensor. Commonly used in food, beverage, dairy, pharmaceutical, biotech, and medical manufacturing applications where sanitation and risk of contamination are a concern.

Light-Duty Dial Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 5000 psi at Grainger.com
- Accuracy: ±3-2-3%
- Acrylic lenses

Thread-mounted gauges have a bottom or back connection. Use for most general purpose pressure measurement and monitoring applications.

Gauges with stainless steel cases are corrosion-resistant and suitable for outdoor use or harsh conditions. Wetted parts are stainless steel.

Gauges with plastic cases have brass/bronze wetted parts.

Vibration-resistant gauges have a liquid fill that reduces pulsation and pointer vibration.

Pressure Gauges with Diaphragm Seal for Challenging Media

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 7500 psi at Grainger.com

Paired external diaphragm seal creates an impermeable barrier between the process media and the wetted parts of the gauge. Seal resists harsh and corrosive chemicals, prevents clogs from challenging or loaded media, and protects the gauge from freezing with low-temperature media.

316 SS Mini Seal gauges feature a mini-isolator diaphragm seal. The diaphragm protects the gauge from damage and contamination. Use with applications such as processing wastewater or wood pulp.

Freeze and Clog-Resistant Internal Seal gauges have a Buna-N antifreeze/anticlog barrier which isolates wetted materials from service media. Ideal for use with low-temperature process media as well as materials like wastewater or wood pulp.

Nickel Alloy Mini Seal gauges are commonly used for applications requiring protection from solids and chemicals like chlorine, sulfuric acid, and hydrofluoric acid.

Themoplastic Seal gauges are built to isolate and protect pressure instruments against clogging or contamination due to suspended solids or highly viscous fluids.

Front Flange Panel-Mount Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 600 psi at Grainger.com

Front flange allows gauges to fit securely into a panel cutout using mounting bolts on the outer flange. Fit flush with the panel or the back of the bezel flush with the panel. Commonly used for general purpose measurement and monitoring applications.

D1373 and D1374 gauges have a polycarbonate lens and brass/bronze wetted parts.

G3996 gauges have a glass lens.

Lead-Free Pressure Gauges for Drinking Water

J1380

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 1000 psi at Grainger.com
- Brass/bronze wetted parts

Certified to NSF-61-372 for low-lead compliance and safe for use in potable water applications.

Liquid-filled gauges are intended for harsh environments and high-vibration applications such as pumps that will be in contact with drinking water.

High-Accuracy Gauges for Boiler & Control Rooms

Stainless Steel

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 1000 psi at Grainger.com
- Accuracy: ±0.5%; except K4682 is ±1.0%
- Brass/bronze wetted parts
- Glass lenses

Heavy-duty industrial gauges are used to monitor system pressure for boiler and control rooms. Measure pressure in air, steam, oil, and fresh water systems.

Gauges with adjustable red maxi-pointer allow setting a maximum set point against which the main pointer can be visually gauged.

Tridicator Boiler Gauges

- Pressure accuracy: ±3-2-3%
- Temp. accuracy: ±3% full scale
- Steel housing

Measure pressure and temperature in °F and °C with dual scales on a single dial. Threaded connection on the stem houses a bimetal temperature element which is used to insert the gauge into the process. Commonly used in boilers and hydronic systems.

G3997

Low Pressure Gauges

- Available in pressure ranges from 0 to 200 in wc; 0 to 10 psi; and 0 to 160 oz/in^2 at Grainger.com

Gauges provide highly sensitive low pressure measurements.

Heavy-duty industrial and process gauges have a solid-front case with adjustable movement. Diaphragm sensor. Commonly used for oil, gas, chemical, water, and wastewater pressure control environments.

Inert gas gauges are used to measure inert or nonexplosive gases. Copper alloy diaphragm sensor. Chemical- and corrosion-resistant.

Natural gas gauges are suited for natural gas and other noncorrosive gases. Pic gauges have a capsule type sensor. Winters and Ashcroft gauges have diaphragm sensors.

HVAC & Boiler Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 1000 psi at Grainger.com
- Accuracy: ±1.0%

Thead-mounted heavy-duty gauges are used in industrial and commercial boilers, HVAC, and hydronic system applications.

Commercial gauges are used in HVAC applications to monitor system pressure. A good option for steam, hot water, and chilled water pumping systems. Acrylic lenses.

Industrial gauges are compatible with plumbing and HVAC contractor applications. Commonly used in dry, damp air, and in liquid water applications with nonpotable water. Glass lenses.

Test Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 10,000 psi at Grainger.com
- ¼" NPT male bottom connection

Gauges offer high accuracy and are commonly used for laboratory and inspection applications.

Dial gauges are suited for continuous use or as portable pocket test gauges for on-the-spot checks and inspections. Designed so that the internal movement of the gauge provides accuracy and repeatability.

Digital gauges offer high accuracy and allow users to toggle between engineering units of measure.

Pneumatic calibrator gauges are used for laboratory calibration applications where maximum accuracy and precision are required.

For Commercial & Residential Water Lines 489F23

Low-Pressure Gas Line Test Kit K4559

Gas & Water Line Pressure Test Gauges & Kits

- Available in pressure ranges from 0 to 100 in WC and 0 to 300 psi at Grainger.com

Measure water line pressure in residential or commercial environments as well as low pressure gas in ovens, air filters, or compressors. For detailed information on test kit contents, go to Grainger.com.

Commercial and residential water line test kits are intended for use on drinking water taps. Gauges have lead-free wetted parts.

Low pressure gas and water test kits have a gauge and test block for pressure-decay testing in facilities, process plants, and new construction areas.

Low pressure gas line test kits measure low-pressure gas lines, test new gas installations for leaks, and ensure lines meet inspection codes.

Manifolds and industrial flow test kits are intended for general use testing and inspecting manifolds for leaks.

Pressure and temperature level test kit contains both a pressure gauge and a thermometer.

Pressure Gauges Cleaned for Oxygen Service

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 3000 psi at Grainger.com
- Dial size: 2½"
- Accuracy: ±1.0%
- Stainless steel housing
- Stainless steel wetted parts
- Polycarbonate lens
- ¼" MNPT connection

Gauges have been precision cleaned and certified safe for operation with oxygen service. For critical applications where any residue or contaminant may create a spark or explosion.

Welding Regulator Pressure Gauges

- Available in pressure ranges from 0 to 6000 psi at Grainger.com
- Brass/bronze wetted parts
- Polycarbonate lenses
- ¼ in NPT male bottom connection

Designed for safety when used on welding fuels or in proximity to welding equipment.

Non-sparking gauges are used with welding regulators and manifolds and are compatible with many common welding fuels. Polished brass housing.

Replacement gauges replace worn or damaged pressure gauges used on welding manifolds and welding regulators. Steel housing.

Digital Gauge for Pneumatic Regulators 45MU05

Indicating Compressor & Canister Gauges 2C492

Compressed Gas & Air Pressure Gauges

Suitable for pneumatic and industrial applications.

Gauge for regulators and actuators is a high-pressure gauge with a dual scale in units of psi and kPa.

Gauges for pneumatic regulators have an LCD display that provides clear and highly accurate pressure readings. 4 selectable display units of bar, kg/sq cm, MPa, or psi.

Indicating air filter pressure and canister pressure gauges have color-coded dials with green/yellow/red to indicate when the filter needs to be cleaned or replaced.

Hydraulic Press & Cylinder Pressure Gauges

- Available in pressure ranges from 0 to 40,000 psi at Grainger.com

Intended for use in demanding, high-cycle hydraulic applications such as monitoring and testing system pressure for hydraulic presses, cylinders, tool holding, and tooling systems.

Gauges for hydraulic presses & cylinders use a dual scale to measure system pressure and force. Measure input pressure into cylinders, jacks, and high-pressure systems.

Gauges for hydraulic machinery measure very high pressures with a high degree of accuracy. Commonly used for proof-pressure testing of hydraulic valves and machinery.

Digital gauges measure hydraulic system pressure with high accuracy.

Adapters are compatible with specific gauges and machines and allow a gauge to mate with a specific cylinder, press, or other tool.

G3999

20LK20

Liquid-Level Altitude Pressure Gauges

- Available in pressure ranges from 0 to 690 ft wc at Grainger.com

Use to determine the level of water or liquid in a tank or well. Gauges read head pressure in units of ft. wc (feet water column). Commonly used in tanks, standpipes, and other applications where water depth must be accurately gauged.

Well water gauges measure in units of ft. H20 (feet of water) to indicate the depth of water in a well.

Fire Apparatus Panel-Mount Pressure Gauges

- Available in pressure ranges from -30 to 0 in Hg (vacuum) and 0 to 600 psi at Grainger.com
- Brass/bronze wetted parts

Gauges monitor water pressure in fire trucks, fire apparatus, and other emergency response applications.

Gauges with brass cases have an integral socket and tube to eliminate leaks. Glycerin fill.

Gauges with zytel nyon cases have KEM-X protection from freezing and clogging. Low temperature glycerin fill. Temperature-compensating internal diaphragm.

Pump pressure test kits include vacuum and pressure gauges, hoses, and fittings for testing fire truck/apparatus pumps. Padded carrying case.

Differential Pressure Gauges

- Available in pressure ranges from 15 to 0 to 100 in wc and 0 to 100 psid at Grainger.com

Dial gauges measure and display the difference in pressure between two points in a system.

Gauges for low operating pressure are designed for use with lower total static system pressure, as in systems with maximum working static pressure of 80 psig, 35 psi, or lower.

Gauges for medium and high operating pressure are for systems with maximum working static pressure of 500 psig and higher. Midwest Instrument Series 120 and 220 have piston-type actuators, which permit fluid migration, and are used primarily for liquid applications such as hydraulics, pumps, and heat exchangers. All other Series have diaphragm sensors that permit no bypass of fluid and can be used on air, gas, and liquids in applications such as water treatment and anhydrous ammonia.

Gauges with switches can be connected to a control system to respond when the measured pressure rises or falls below a set point. Allow monitoring and control of a system by a single instrument.

Gauges with air velocity have a dual scale that measures both in. wc (inches of water column) and air velocity in ft./minute. Diaphragm sensor. Commonly used with air and noncorrosive gases in applications such as blowers and exhaust systems where monitoring the velocity of gas through the system is critical.

Digital Differential Pressure Gauges

- Available in pressure ranges from 20 to 0 to 100 in wc at Grainger.com
- ⅛" O.D. smooth-barb back connection
- NEMA 4X housing

Gauges measure and show the difference in pressure between two points in a system. Large 4-digit LCD display with 8 selectable engineering units. Easy 4 button operation with digital push button zero. Operate on 9 to 24V DC or included 9V battery. Commonly used to measure and monitor static pressures in ducts and buildings, filter status, and fan control.

Flow gauges measure the flow and velocity of air or gas across a system in addition to differential pressure.

DICKSON MONARCH INSTRUMENT

Pressure Data Loggers

DICKSON

Water-resistant IP68 logger measures water, gas, or oil pressure. Displays 12 units of measure with user-selectable sampling rate. Data can be downloaded via USB cable or flash card. ¼" NPT connection.

MONARCH TRACK-IT

Battery-powered, water-resistant IP67 loggers display and record pressure, vacuum, temperature, and parameter alone. Feature alarm set points and indicators, real time data, and Min./Max. readings are displayed live. Plugs into a USB port on a PC; allowing you to customize settings, transfer data, or view data in real time with the included Track-It software program. Include software, USB cable, and battery. ¼" male NPT connection.

General Purpose Pressure Transmitters

- Available in pressure ranges from -14.7 to 30 psi and 0 to 8000 psi at Grainger.com
- Stainless steel wetted parts

Convert pressure measurements from liquids, gases, and vapors into electrical output signals.Threaded process connections for direct mounting to systems, and available with various electrical connections to connect to compatible control systems for monitoring. See Grainger.com for detailed information on electrical terminations and connections. Commonly used for process automation and control, pneumatic sensing, presses, machine tools, industrial and commercial HVAC and refrigeration applications.

Transmitters with cable and wire leads include 3-ft. cable.

Absolute Pressure Transmitters

Dwyer®

- 4 to 20mA DC output
- Accuracy: ±1% of full scale
- 2 wires
- 10 to 30V DC power required
- Stainless steel wetted parts
- IP66, NEMA 4X enclosure

Measure system pressure against a reference vacuum rather than ambient pressure. Transmit or send output signals to a compatible control panel or monitoring system. Commonly used for process automation and control, pneumatic sensing, presses, machine tools, industrial and commercial HVAC and refrigeration applications.

Conduit Connection D3893

4-Pin M12 Connector D3896

- Available in pressure ranges from -14.7 to 15 psi and 0 to 7500 psi at Grainger.com
- 4 to 20 mA output
- ¼" NPT process connection
- Thin film sensor technology

Convert pressure measurements from liquids, gases, and vapors into electrical output signals. Connect to compatible systems for pressure control and monitoring.

Transmitters with 4-pin M12 connector have a 4-digit LED display with an illuminated band for easy visibility. User adjustable switch settings and analog scaling. Aluminum housing and stainless steel wetted parts.

Transmitters with screw terminals have a 4-digit backlit LCD display and user-configurable rangeability for quick range changes. Conduit housing with a threaded process connection and a threaded conduit connection for wiring entry. IP 66, NEMA 4X aluminum housing.

Mercoid® ASHCROFT® Dwyer®

Hazardous Location Pressure Transmitters

- Available in pressure ranges from -14.7 psi to 15 psi and 0 to 5000 psi
- NEMA 4X enclosures

Rated for use on industrial processes or in environments with a risk of combustion or explosion.

Explosion-Proof-Rated transmitters have housings designed to contain an explosion of specific gases or vapors, preventing further ignition of combustible dust or gas in the environment.

Intrinsically Safe-Rated transmitters are designed with circuitry that is incapable of discharging electrical, mechanical, or thermal energy into the atmosphere sufficient to cause a fire or explosion. For use in classified hazardous environments.

Energy barriers limit the amount of energy sent to a transmitter in hazardous locations to contain sparks and help prevent fires and explosions.

Digital Manometers

Portable, handheld instruments measure low positive, negative, and differential air and gas pressure. Commonly used in HVAC applications, laboratory testing, field calibration, and for measuring airflow and velocity.

General purpose manometers feature a digital display and selectable pressure units. **Extech** units offer 11 selectable units of measure and record max./min./avg. readings with relative time stamp. Data hold, auto power off, and zero function for offset correction or measurement. **4FB77** has a wide measurement range with high resolution. LCD shows 8 selectable units with data hold, min./max. and zero functions. **Yellow Jacket** unit measures gas, differential, and static pressure. **UEI** units **49CK75** and **9LHH8** offer dual input differential measurement and feature dynamic min./max. capture, data hold, and auto-off. Rugged rubber boot housing. **49KE06** offers dual input differential measurements in 11 selectable units of measure. Auto-ranging with min./max., data hold, and zero. Built-in magnet for hands-free operation.

Static pressure test kits include a dual input digital manometer, static pressure tips, tubing, fittings, and carrying case - all the components needed for testing pressure switches and gas or static pressure in HVAC systems.

Manometers and airflow meters are 2-in-1 units that perform static and differential pressure measurements as well as airflow and air velocity measurements and calculations. **Dwyer** units offer 9 selectable engineering units and store up to 40 readings with min./max./avg. statistics. Calculate and display air velocity and volumetric air flow. **Extech** unit is a pitot tube and differential manometer. Measures air velocity/air flow in tight locations. 5 selectable units of measure. Features data hold, auto-off, zero function, and record/recall for up to 99 readings. Includes pitot tube with connection hoses. **Fluke** units provide quick and accurate static and differential pressure, air velocity, and airflow measurements. 99 point storage capacity with min./max./avg./hold functions.

High-precision manometers offer precise 0.1% FS accuracy. Backlit digital display, 7 selectable pressure units, and internal memory stores up to 40 readings.

Single-pressure manometer measures low pressures in 9 selectable units. Push button auto-zero.

Smartphone-connected manometers measure differential and static pressure in 13 selectable units of measure. User is required to install the manufacturer's smartphone app, which reads, records, and analyzes measurements. Utilize bluetooth wireless connection.

Digital Manometers for Hazardous Locations

- ±0.5% accuracy
- Class I Div. 2 Group A,B,C,D safety rating

Rated intrinsically safe for hazardous locations. Low-energy discharge prevents ignition in areas where combustible or explosive gas or dust is present. Measure negative, positive or differential pressure in selectable units.

Air-measuring kits include all components needed to measure and monitor air velocity.

Digital Pressure Meter for Industrial & Shop Applications

EXTECH INSTRUMENTS

- 2 GB datalogging
- SD card and RS-232 interface

Portable handheld meter displays 10 selectable pressure units on backlit dual LCD display. Datalogger records up to 20M readings via included SD card. Features data hold, max.\min., and record/recall. Adjustable sampling rate. Commonly used in hydraulic and pneumatic industrial shop applications. Order transmitters separately.

Transmitters - Interchangeable transducers plug into meter which automatically senses the transducer's range and calibration. Corrosion-resistant brass alloy construction.

Analog Manometers

Dwyer®

Provide continuous readings of atmospheric, static, vacuum, or differential pressure with no power source required. Commonly used in general purpose HVAC applications as well as specialized applications ranging from paint booths to cleanrooms and laboratories.

Stationary - **MARK II** units have a curved inclined vertical tube to provide measurements at higher ranges in easy-to-read increments. Include 2 static pressure tapes, double column plastic tubing, indicating fluid, mounting screws, and pointer flags. **Series 1227** offers readings as a U-tube or inclined gauge. Clear, shatterproof indicating tube. Includes gauge oil, tubing for pressure source connection, magnetic clips, and carrying case.

Portable - U-shaped flexible tube unrolls when in use, and can be easily rolled up for storage. Feature overpressure safety traps to prevent loss of fluid. Include 1 bottle of fluid, nylon rubber tubing connectors, magnetic mounting clips, and plastic case.

Testing kit contains all components needed for checking pressure in most gas appliances. Includes 1 bottle fluid, pipe thread bushing, 16 in manometer 3T302, rubber tubing, rubber tubing adapter, 2 pipe thread rubber tubing adapters, and plastic case.

Submersible Level Transmitters

FLOWLINE Mercoid® Dwyer® ASHCROFT®

- Available in pressure ranges from 0 to 100 psi and 0 to 690 ft wc at Grainger.com
- Available with cable lengths from 25 to 710 ft. at Grainger.com
- Lightning and surge protection
- Electrical connections are cable and wire leads

Transmitters are placed at the bottom of a tank, well, or other liquid container to measure the height of liquid referenced to atmospheric pressure. Commonly used in a variety of water management applications.

Polyurethane coated cables are for water monitoring, environmental remediation, and water tanks. ETFE (ethylene tetra fluoroethylene) coated cables provide excellent temperature, chemical, and corrosion resistance for wastewater, sludge pits, chemical and oil tanks, slurries, sumps, and reservoirs.

For Tanks and Groundwater - **Flowline** units have 316 SS, 316L SS, Buna-N and PVC wetted materials. **Mercoid** units have a bullet nose design that protects the diaphragm from damage. Wetted materials are 316 SS, 316L SS, PVC, and fluoroelastomer.

For Harsh Applications - **Mercoid** units have a durable bird cage design with large diameter 316 SS diaphragm seal that is non-clogging and damage resistant to floating solids. **Dwyer** units have a flush diaphragm tip that will not clog in aggressive fluids. Ideal for use with sludge and slurries.

Miniature for Boreholes and Wells - **Ashcroft** units have a small 17mm dia. and complete 316 SS construction. **Dwyer** units have a 0.63" dia. to fit into narrow openings. 316 SS body and nose cap.

Pitot Tubes & Airflow Sensors

Measure air flow and air velocity and connect to pressure instruments such as differential pressure gauges, switches, transmitters, and manometers to monitor and control airflow in HVAC systems or specialized applications.

Pitot tubes - Stainless steel tubes are graduated to allow the user to quickly reach the needed insertion depth. Compatible with direct-mounting in ducts and many types of mounting hardware. Pocket tubes have 1/8" dia.; standard tubes have 5/16" dia. Straight tubes allow for easy insertion into ducts. Tubes with compression fitting allow the tube to be fixed into position when inserted into a duct.

Airflow sensors - Blade-style metal sensors are secured to square or rectangular ducts with a flange. Blade design provides minimal disruption of air stream for more accurate measurements. Plastic averaging sensors are ideal for sensing differential pressure. Integral flange with gasket for mounting to square and round ducts.

Static-Pressure Tips, Pickups & Mounting Hardware

Use with differential pressure instruments such as manometers, controllers, and pressure switches to measure airflow.

Static-pressure tips are hook-shaped metal tips that connect to a manometer or transmitter and mount in a duct; except 1W401 is a portable unit with a magnet that holds it in place.

Static-pressure pickups mount to walls or ceilings and connect to pressure monitoring systems. 23Z320 is designed for cleanroom use. 23Z322 is for room mount with plastic enclosure that fits 2" x 4" electrical box. 23Z323 mounts on top of a standard 3/4"-thick ceiling tile, with its filter facing down through a 5/8" hole in the tile. 23Z324 is designed for roof or outside mounting, and is built to withstand harsh conditions.

Static-pressure fittings connect to the tubing of differential pressure instruments to facilitate pressure readings.

Wall plate pickups create an opening on a wall to view pressure readings. Foam gasket creates tight seal. Can be mounted to a standard 2" x 4" electrical box or to walls or ceilings. 23Z321 is designed for cleanroom use.

Mounting glands and flanges are for mounting tips and pickups to manometers and transmitters.

Wind Speed Indicators and Vane Anemometer

WIND SPEED INDICATOR

Rooftop-mounted pickup reads wind velocities from 0 to 80 mph and 1 to 12 Beaufort scale directly on liquid-filled tube. Includes 50-ft. vinyl tubing.

HANDHELD WIND SPEED INDICATOR

Quickly displays wind velocity in 2 scales: 2 to 10 mph and 4 to 66 mph. Pocket size with sturdy plastic case.

VANE ANEMOMETER

Permanent-mount or portable instrument measures velocities from 25 to 400 fpm. Large easy-to-read scales are visible from both sides.

GENERAL® TRACEABLE® EXTECH INSTRUMENTS

Digital Stopwatches

Each includes lanyard and battery.

General—Fully featured stopwatch displays day, date, current time, and lap time. Daily alarm and hourly chime. Manufacturer's lifetime warranty.

Traceable—Continuous timing function lets you time for hours, days, or weeks; the display rolls over to zero when it maxes out, automatically beginning timing again. 9DUY3 is shockproof and waterproof to 3 atmospheres. 4YMT7 is disposable. 5CVT8 has vivid, large digits. 9NU56 simultaneously displays running time, cumulative-split, and interval-split. 300 record memory. Each instrument is provided with a serialized Traceable Calibration Certificate indicating traceability to standards provided by NIST.

Extech—4TM11 includes calendar display (day, month, date), plus alarm with snooze function with time delay. HeatWatch 2ENF7 and 4FB70 display temperature, humidity, and heat index with programmable heat index alarm. Offers fastest/slowest/average lap recall.

Digital Timers

TRACEABLE® Cooper ATKINS® TAYLOR.

- Min. time setting: 0.1 sec.

TRACEABLE

Each timer is provided with a serialized Traceable Calibration Certificate indicating traceability to standards provided by NIST.

Alarm Timer —4-channel device functions as count up/down timer, time in/out display, and 12/24 hr. clock. Memory resets display to previously programmed count-down time.

Clip-It Timer—Multitasking timer clips to any lab surface. Memory saves last programmed setting for quick recall: useful for repetitive timing events. Features loud, 1 min. alarm.

Countdown Timer 8GHH3—View large 1⅓" digits from across the room. 1-touch recall returns channel to previously programmed setting. Countdown/up and stopwatch modes.

Countdown Timer 4YMT6—Jumbo digit, lightweight and portable timer's memory resets display to last programmed time for quick repeat of frequent, routine tests. Loud 30-sec. alarm.

Dual Channel Flashing LED Timer—6-digit, dual channel display. Features 2 simultaneous countdown activities, flashing LED timing indicator/alarm and adjustable volume. Green light flashes counting down, red light flashes once at zero.

Jumbo Timer—Display adjusts from 90° to 180° for angled viewing. Counts up after alarm to show elapsed time since alert. Also has time in/out, 12/24-hr. clock, and stopwatch functions.

Nano Timer—Operates as a countdown alarm timer, stop-watch (count up), or 12/24-hr. clock. Compact design with large digits for readability. 2-channel memory automatically resets display to the original programmed time.

Timer 6KED7—Big-digit timer has adjustable alarm and flashing LED alert. Green light flashes every second after timing reaches 10 sec.; red indicator flashes when zero is reached and shows time elapsed since alarm. Adjust volume for high, low, or off for silent flashing LED alert.

TAYLOR

Digital Timer—Easy-to-use, multipurpose timer counts up or down. Compact with clip, magnet, or stand positioning.

Loud Digital Timer—Times up to 4 events simultaneously with distinctive 100dB alarms for each event. Adjustable volume. Lights flash at zero. Stand or wall mount.

COOPER-ATKINS

24-Hr. Digital Timer—Large single-station timer has a red alert light that flashes when the alarm sounds. Automatically counts up once the set time has elapsed. Handy 1-touch Start/Stop button.

TRACEABLE® WÖHLER

Barometers

Analog—Precision dial barometer measures atmospheric pressure in units of hPa, in Hg, and mm Hg. Durable nickel-chrome housing.

Digital—6NWA3 - Measures barometric pressure in hPa, temperature in °C / °F, and sound level. IR interface for use with printer or PC.

38RJ43 - Large 4-line LCD continuously and simultaneously shows barometric pressure, temperature, relative humidity, barometric pressure trend, and time-of-day. Records Min/Max readings and allows user to set parameters for HI/LO alarms. Connect to a computer and use 38RJ44 software to permanently capture data.

53DU69 - Measures barometric pressure, relative humidity, and temperature and wirelessly transmits data to a cloud-based interface. Audible and visual alarms alert onsite personnel to out-of-range conditions. Remotely monitor controlled environments from any location - connect to data via Apple Watch, smartphone, tablet, or PC using TraceableLIVE cloud service (subscription required).

EXTECH INSTRUMENTS

Desktop Indoor Air Quality (IAQ) CO_2 Monitors

- 0 to 9999 ppm CO_2 concentration
- RH range: 0.1% to 99.9%
- Min./max. CO_2 value recall

21RV54 and 15E593—Display air quality as Good/Normal/Poor, plus year, month, date, and time. Feature automatic baseline calibration (ABC) or use manual calibration in fresh air. 15E593 logs up to 5333 data points that can be downloaded to a Windows® compatible computer for analysis; software and cable included.

21YE40—Calculate statistical weighted averages of TWA (8-hr. time weighted average) and STEL (15-min. short term exposure limit). Employs 6 facial icons to indicate IAQ levels. Displays CO_2 ppm, year, month, date, and time. ABC. Manually stores/recalls 99 readings.

EXTECH INSTRUMENTS

Paperless Temperature/Humidity Monitor

- Graphical data logger
- Stores up to 20,000 readings
- Desk or wall mount

Simultaneously shows numerical and graphical display of humidity, temperature and dew point readings plus time and date. Measures humidity (10% to 95% relative), temp. (-20° to 140°F) and dew point (-4° to 176°F). Probe can be connected directly to the unit or attached to the 6.5-ft. extension cable for measurements in closed environments. Audible and visual alarm with user programmable High/Low setpoints. Include detachable probe, probe cable, USB adapter, universal adapter, and rechargable battery.

Vantage Pro2™ Weather Stations

WEATHER STATIONS

- **Temperature range: indoor 32° to 140°F; outdoor -40° to 150°F**
- **Relative humidity range: indoor 1% to 100%; outdoor 1% to 100%**
- **Wind velocity: 1 to 200 mph**
- **Rainfall: 0 to 199.99"; accuracy: ±4%.**

Monitoring systems update data every 2½ sec. from sensors up to 1000 ft. away. LCDs show barometric pressure, wind direction, wind chill, dew point, and heat index.

4JRH5 is a cabled weather station with sensor array wired to the indoor console. Runs on AC power. All others are wireless, with solar-powered outside sensors and console that requires 3 C batteries (not included) or AC power.

4JRH6 and 4JRH8 feature 24-hr. fan-aspirated radiation shield for max. temperature/humidity accuracy.

4JRH7 and 4JRH8 add UV and solar radiation/energy sensors. Display UV index, dose rate, and daily and accumulated dose.

4JRH9 is a wireless display console only.

Use WeatherLink® software with weather stations for downloading data for reporting, analysis, and sharing over the internet. Supports National Climatic Data Center (NOAA) Weather Watcher, GLOBE student science program, and the Citizen Weather Observer Program of the National Weather Service.

High-Accuracy Thermistor Meters & Probes

- Include NIST certificate of calibration

Meters measure suction- and liquid-line temperatures as well as temperatures across condensing and evaporator coils and ambient temperatures. They feature a backlit display for dark environments, a sealed keypad, and a battery eliminator jack. Use with thermistor probes and different types of sensors for multiple applications.

High-accuracy thermistor meters are commonly used in biological research laboratories and to measure air and room temperatures.

High-accuracy thermistor temperature & humidity meters are commonly used to monitor humidity levels indoors for comfort.

THERMISTOR PROBES

¼" DIAMETER

8-FT CABLE

2-wire probes measure temperatures as a function of changes in electrical resistance. They provide more accurate readings faster than other types of probes over a smaller range of temperatures.

Flange-mounted probes are commonly fixed to the outer wall of a duct and measure both the temperature and quality of air flowing through the duct.

Threaded probes use a thread-mounted sensor for fixed-position temperature sensing in closed tanks and pipes.

Long-Life & High-Accuracy Handheld RTD Meters & Probes

- NIST units include a certificate of calibration

With their wide range and precise accuracy, these handheld meters are used with different RTD probes for specific applications. Commonly used to check and perform calibrations, verify liquid-in-glass, digital and bi-metal thermometers, and to measure the temperature of refrigerators, freezers, incubators, and ovens.

Data-logging meter allows recorded data to be transferred from the thermometer to a PC or Mac with a wired connection.

RTD PROBES

Use a metal sensing element to measure temperatures over a wide operating range. Provide long-term stability compared to other types of probes.

Flex-wire probes have an insulated cable with a beaded junction on the sensing end with the terminal end connected to a meter or receiver.

Threaded probes have thread-mounted sensors for fixed-position temperature measurement of closed vessels like tanks or pipes.

Cooper ATKINS® EXTECH INSTRUMENTS FLUKE.

Wide-Application Handheld Thermocouple Meters & Probes

- NIST units include a certificate of calibration

Handheld thermocouple meters are used with different probes to measure surface and ambient temperatures, as well as for immersion and penetration applications. Can be used to measure contact temperature inputs on motors, insulation, breakers, pipes, connections, liquids, and wires with J-, K-, or T-type thermocouple temperature sensors. Commonly used for general preventative maintenance in industrial, HVAC, and electrical applications.

Data-logging meters can be used with compatible devices such as PCs or smartphones.

Type K Probes—Compression-fitting probes securely mount temperature sensors that measure liquid, air, and gas. Built with strong 316 stainless steel components that resist high temperatures and corrosion. Commonly used for with pyrometers for measuring the temperature of fuel and exhaust gas in extreme temperatures and harsh environments.

Direct-connect probes do not have a cord or cable and are not intended for permanent or fixed installations. Also known as quick-disconnect probes, they consist of a sensor and 3-pin connection type. Often used where quick installation and removal are important requirements of the measuring device.

Flex-wire probes have an insulated cable with a beaded junction on the sensing end. The terminal end is connected to a meter or receiver.

Handheld probes have a straight or coiled cable with a terminal connection like a mini plug or 3-pin connector that pairs them with a meter or receiver. Commonly used for manual inspection, maintenance, and other general temperature measurements.

Multi-Channel Handheld Temperature Meters

- NIST units include a certificate of calibration

Compatible with thermocouples, thermistors, and RTDs to measure different types of samples simultaneously. Models with built-in data-logging feature allow data to be stored, transferred, and uploaded to external sources like a PC.

TRACEABLE®

Critical Environment Digital Thermometers

- Include NIST-traceable certificate of calibration

Digital thermometers use an external bottle, bullet, and immersion probe to take measurements. The bottle is placed into a specific environment like a freezer or oven, and temperature readings are shown on the digital display. Capture max./min. temperatures as well as current temperature.

Thermometers with onboard data-logging allow recorded data to be transferred to a PC or Mac with a wired connection.

Thermometers with remote monitoring have an onboard data-logging feature that allows recorded data to be transferred to a PC or Mac without a wired connection. Data values can be stored via cloud or transmitted over Wi-Fi.

Thermometers with humidity measurement measure and log relative humidity and temperature levels.

Critical Temperature Analog Bottle Thermometers

- NIST certified

Bottles are filled with a biosafe material intended to mimic the critical samples that need to be measured. An analog thermometer is inserted into the bottle for easy temperature readings. Bottles are placed into the environment that needs to be monitored, and the temperature reading mimics the temperature of the critical samples. Bottles are shatter resistant and not impacted by power outages, opening and closing of doors, or other sudden changes. Designed primarily for temperature verification. Commonly used in blood banks, pharmacies, hospitals, and laboratories.

NotifEye™ Wireless Temperature Monitoring Systems

52ET83

- Temp. range: -25° to 180°F
- Wireless range: 2500 ft.
- 900 MHz

Cloud-based system provides an easy, efficient solution for monitoring critical environments. System data is accessible online 24/7, while out-of-range notifications are sent in real time as e-mail and text alerts. Sensors pass information wirelessly to the software database which collects and records data 24/7. Gateway Buffer 52ET88 will store 65,000 readings if the gateway is not receiving power. Wireless Temperature Sensors are battery operated and monitor against preset conditions that are user-defined within the NotifEye application. Wireless Humidity Sensor 52ET86 measures 0% to 90% relative humidity. Wireless Contact Sensor 52ET87 allows for remote signal activation.

Desk or Wall Mount Temperature & Humidity Meters

Meters with cabled sensors provide multiple readings: ambient temperature and humidity via the base's own sensor and remote readings from the location of the remote sensor. Cabled sensors are typically probes placed into containers, on a piece of electronic equipment, or on another moderate low- or high-temperature device.

Clocks with temperature & humidity sensors display the current time, temperature, and relative humidity. 2HPF5 is radio controlled to automatically adjust time via NIST time code.

Direct-reading digital meters measure and display both temperature and humidity.

Wall-Mount Analog Thermometers & Hygrometers

Choose from easy-to-read dial thermometers or traditional liquid-in-glass vertical units. Durable Indoor/Outdoor units are weather resistant. Commonly mounted on walls in warehouses and other industrial facilities.

Direct Reading K3148

Remote Reading G2658

Panel-Mount Dial Thermometers

Industrial thermometers mount to panels with the dial face positioned for easy viewing and monitoring.

Direct Reading thermometers have a stainless steel housing, glass lens, and bimetal stem. Three mounting holes provide secure attachment to a panel.

Remote Reading thermometers allow users to monitor temperatures remotely. Analog dial face mounts to a panel or other cutout, while the cabled probe is positioned in the location or process to be measured. Commonly used to monitor the temperature of liquids or gases flowing through pipes or contained in tanks.

Sanitary Clamp Dial Thermometers

- Fixed angle

Sanitary tri-clamp flange makes these thermometers suitable for use in food-processing applications when the angle of the thermometer directly installed provides optimal visibility and readability. Mount directly to sanitary connections and are easy to remove when frequent cleaning is required. Commonly used for clean-in-place and steam-in-place sanitation requirements.

Long-Reach Thread-Mounted Dial Thermometers

- Temp. range: 0° to 200°F
- 2°F graduations
- Accuracy: ±1%
- ½" NPT back connection
- ¼"-dia. stainless steel stem
- 3" dial with glass window

Extra-long stems reach remote areas. Corrosion-resistant stainless steel cases are hermetically sealed to prevent fogging or icing. Gripping Handle, sold separately, provides an easier grip.

Min./Max.-Reading Thread-Mounted Dial Thermometers

K3092

- 2°F/2°C graduations
- ±2% accuracy
- 3"-dia. dial

Primary needle displays the current temperature and a secondary needle registers min./max. temperature readings. Commonly used for oven and refrigerator temperature monitoring.

Glow-in-the-Dark Thread-Mounted Dial Thermometers

K3130

- ½" NPT connection
- ±1% accuracy
- 2° graduations
- 5"-dia. dial

Dial face glows in low-light conditions for easy reading. Bimetal element drives the pointer to provide accurate measurements with no gears or linkages. Glass lens resists scratches, and is easy to clean and view. Corrosion-resistant stainless steel housings are hermetically sealed to prevent fogging. Commonly used in industrial settings or in laboratories.

Thread-Mounted Dial Thermometers with Transmitter Output

Thermometers have a head-mounted transmitter on the side of the stem. Temperatures are displayed on the dial, and the transmitter connects to an electronic system for remote readings. Durable stainless steel housing and stem, with glass lens. Commonly used on generating boilers, skid-mounted compressors, and in thermal oxidation systems.

Adjustable-Angle HVAC & Boiler 2CYL7

Back-Mount Fixed-Angle 55CL62

Side- & Bottom-Mount Fixed Angle 55CL61

Thread-Mounted Digital Thermometers

- ½" NPT connection
- 0.1°F/0.1°C resolution

Thermometers thread directly onto pipe or tank connections to measure and monitor temperatures. The stem connects to the stainless steel housing with an easy-to-read LCD display. Battery powered or operate using solar or indoor light.

Adjustable-Angle HVAC & Boiler have an adjustable-angle display and can be positioned at different angles for easy viewing. Durable cast-aluminum case is water resistant.

Back-Mount Fixed-Angle thermometers are built with the stem mounted directly on their back. Commonly used in industrial applications.

Side- & Bottom-Mount Fixed-Angle Industrial units are built with the stem attached to the side or bottom so they can be positioned as needed for viewing.

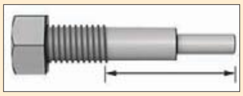
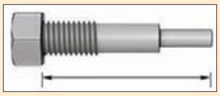
Straight Shank

Stepped Shank

Tapered Shank



Insertion Length



Stem Length

Choosing the Right Thermowell

SHANK TYPE

Straight

Consistent thickness throughout their length. Commonly used for general applications.

Stepped

Smallest diameter tip, and deliver fast response times.

Tapered

Diameter decreases gradually along their length. Durable and commonly used in high velocities.

MATERIAL

Stainless steel is the most widely used thermowell material. Stainless steel is heat- and corrosion-resistant. Low-lead compliant brass thermowells are used for contact with potable water.

Thermowells

Protective metal tubes shield thermometers from environments exposed to harsh conditions like pressure, velocity, corrosion, and vibration. Thermowells contact the media, liquid, or gas being tested, while the thermometer's sensor reads the temperature safely through the thermowell walls.

General Purpose Stepped-Shank Threaded Thermowells have a reduced diameter at the tip compared to the base of the shank, allowing for a faster response time than other styles. Appropriate for use in most light and medium-duty applications without very high temperatures or pressures.

Heavy-Duty Tapered-Shank Threaded Thermowells are made for high-velocity applications.

Light-Duty Straight-Shank Threaded Thermowells are the same size along the immersion length, which creates the most resistance to the flow. A good option for light-duty conditions with lower velocity and/or pressure.

Thermowells for Temperature Regulators & Duct Sensors protect measuring equipment and ensure accurate readings are performed for HVAC systems. Sometimes called immersion wells, they are commonly used with hot water immersion controls.

Liquid-in-Glass Laboratory Thermometers

- Filled with environmentally safe fluids

Thermometers are available with plain glass, coated glass, or armored glass stem. Commonly used in laboratories to record temperatures in water or oil baths, refrigerators, freezers, incubators, and ovens.

Full-immersion thermometers must be fully submerged in an environment or sample for accurate temperature readings. Typically placed inside a water bath or incubator and removed only when verification of temperature is required.

Partial-immersion thermometers must be submerged to a known depth to accurately register temperature readings. A marked line indicates the level they need to be submerged in order to provide an accurate reading. Commonly used to measure temperature in vessels and beakers when the sample to be measured is shallow.

Armored thermometers have an armored metal sheath that protects the glass housing from accidental breakage.

Compact Liquid-in-Glass Pocket Thermometers

- Include NIST traceable calibration certificate, except 6DKC9 and 6DKD0

Thermometers are filled with nontoxic liquid and provide quick, on-the-spot temperature measurements. Compact units are commonly used for field studies, waste-water treatment measurement, and for general temperature readings.

Dial Pocket Thermometers

- 1"-dia. dials
- 5"L stems

Clear, plastic lens displays temperature on an easy-to-read black scale with a white background. Stainless steel case, stem, and bezel that provides shock protection in extreme environments. Thermometers can be quickly calibrated with an external adjustment screw. Often used in food processing, testing, and HVAC applications.

NSF-rated thermometers are used in food processing and production, and the food service and hospitality industries where thermometers come in contact with food.

Dial Thermometers for Compost & Soil

Compost thermometers have threads used for mounting to permanent or semipermanent locations like compost bins. Soil thermometers have a plain bushing and are intended for both long- and short-term immersion in soil. Shaded and labeled zone on the dial highlights if the soil or compost bin is hot, cold, or an ideal temperature.

Digital Pocket Thermometers

- 0.1°F/0.1°C resolution
- 4-digit displays, except 3KGL8 which has a 6-digit backlit display

Digital LCD display reduces reading errors and allows for quick at-a-glance checks. Small, portable units provide faster response times than standard thermometers. Commonly used to record temperatures in food processing, testing, and HVAC applications.

NSF-rated thermometers are used in food processing and production, and the food service and hospitality industries where thermometers come in contact with food.

Vat & Pan Clip-On Dial Thermometers

- NSF Rated

Thermometers with metal stem are used to monitor temperature in open tanks, pans, or vats. Feature a clip to temporarily mount to the side wall of a pot, kettle, tank, or other open vessel for ongoing monitoring. Approved for use in food manufacturing and processing, food service, hospitality, and other applications where the thermometer comes in contact with food. 304 stainless steel housing. For 0.75" wall thickness.

Bath for Process Manufacturing 54DD52

Portable Calibration Baths

Compatible liquid is heated to exact temperatures and various instruments can be submerged in the liquid and calibrated to precise temperatures. Panel control display allows users to set various temperature points. Calibration baths are portable for calibrating instruments in the field.

General purpose baths calibrate short-, square-, and odd-shaped temperature sensors.

Baths for process manufacturing are used in manufacturing plants for pharmaceuticals, biotechnology, and food production.

Portable Field Metrology Drywell Calibrators

Quickly and accurately calibrate bimetal thermometers, temperature sensors including RTDs and thermocouples, and temperature switches in the field. Drywell technology creates specific heat zones that provide even and stable temperature distribution. Features like the large LCD display, function keys, and menu options allow easy operation and programming. The front panel has outlets for plugging in other instruments, and with built-in process electronics, users do not have to bring multiple tools to the field. Commonly used for transmitter loop calibrations, comparison calibrations, or for checking and calibrating thermocouple sensors. Choose from the available stem diameter groupings.

General Purpose Industrial Field Metrology Wells—Calibrate temperature sensors like RTDs, thermocouples, thermometers, and temperature switches.

Ultra-High & Low Temperature Field Metrology Wells—General purpose units calibrate temperature sensors like RTDs, thermocouples, thermometers, and temperature switches at extreme high and low temperatures.

High-Temperature Thermocouple Calibrator Furnaces

Horizontal, open-ended tube furnaces are used for comparison calibration of noble- and base-metal thermocouples. Feature automated setpoint control for a wide temperature range. With nonmetallic blocks, these units will not contaminate thermocouples. Built with a deep immersion depth, so users can calibrate their thermocouples at the depth of use.

Compact Field Drywell Calibrators

Industrial Dual-Block 4LHA6

Single-Block with Adjustable Set Points 33W927

Small and lightweight calibrators are used to test and ensure that RTDs, thermocouples, and bimetal thermometers are accurately calibrated in the field. Can be used for adjustable or fixed setpoints.

INDUSTRIAL DUAL-BLOCK DRYWELL CALIBRATORS WITH ADJUSTABLE SETPOINTS

Calibrators have adjustable setpoints and an LED front panel for easy programming. The dual-block features two blocks for a range of temperatures. They have four removable inserts that interface with an external documenting process calibrator. Include a protective case for storage.

SINGLE-BLOCK DRYWELL CALIBRATORS WITH ADJUSTABLE SETPOINTS

Adjustable setpoints allow users to program multiple setpoints. Select models may be compatible with optional interchangeable inserts for different numbers and diameters of probes.

SINGLE-BLOCK DRYWELL CALIBRATORS WITH FIXED SETPOINTS

Calibrators with fixed setpoints are accurate and easy to operate. Can be paired with external dial and digital thermometers. Commonly used to calibrate temperature-sensing instruments used in food processing and preparation applications.

Handheld Temperature Probe Calibrators

6KD41

39M989

Battery-operated instruments measure and source 17 thermocouple types and millivolts. When used to source temperature signals, these calibrators also measure 4 to 20 mA signals. They are highly accurate and feature configurable source settings for prompt linearity checks.

Intrinsically Safe Compact Reference Temperature Calibrators

5NLL3

- 3-point NIST-traceable, 3-point NVLAP-accredited
- Minimum immersion of 70mm for wet media or 120mm for dry media
- Resolution: 0.1°/0.01°/0.001° (Variable)
- Sampling rate: 0.5 sec/1 sec/2 sec (Variable)

Calibrators are compact, lightweight, and portable and operate at a wide range of temperatures. Large color display for easy programming. The preset temperature points and icons allow users to monitor the calibrator and calibration process. Units have a carrying handle and are commonly used on-site in maintenance shops and in laboratories.

Pressure Calibrators and Modules

FLUKE

Calibration tools and calibrators are made for industrial instrument technicians.

FLUKE 710 SERIES PRESSURE CALIBRATORS

- Switch test captures set, reset, and deadband

Easy-to-use, complete pressure calibration solution sources/measures pressure and vacuum. 717 Series requires external pump, sold separately. 718 Series have an internal hand pump that generates pressures up to 300 psi. 719 Series have an electric pump for one-handed pressure calibration; source/simulate 4 to 20mA.

FLUKE 750P SERIES PRESSURE MODULES

- 0 to 1" H_20 to 10,000 psi

Gauge pressure modules have 1 pressure fitting and measure the pressure with respect to atmosphere. Differential pressure modules have 2 pressure fittings and measure the difference between the applied pressure on the high fitting versus the low fitting. Each module is clearly labeled for range, overpressure, and media compatibility. All modules include NPT, metric (BSP), and M20 adapters.

PROCESS TOOL ACCESSORIES

Fluke 700LTP-1 Low-Pressure Test Pump

Hand-operated pump generates either vacuum to -13 psi (-0.90 bar) or pressures to 100 psi (6.9 bar). Has 2 pressure ports with quick-fit connectors. Test hoses are terminated with ¼" NPT female fittings adapted with BSP/ISO adapters.

Fluke 700PTP-1 Pneumatic Test Pump

Capable of supplying pressures up to 600 psi (40 bar). For use with 700 Series pressure modules or test gauges.

Fluke 700HTPK Hydraulic Test Pump Kit

Includes 700HTP-2 test pump, 700HTH-1 hose kit, and adapters for connection to high-pressure gauges, pressure modules, or 717 Series pressure calibrators to be tested.

Fluke 700PTPK-1 Pneumatic Test Pump Kit

Includes 700PTP-1 test pump and hoses and adapters for connection to the gauges, pressure modules, or pressure calibrators to be tested.

Fluke 700HTP-2 Hydraulic Test Pump

Hand-operated. Generates calibration pressures up to 10,000 psi (690m bar). For high-pressure testing of gauges, pressure modules, or 717 Series pressure calibrators.

Fluke 700HTH-1 Hydraulic Test Hose

10,000 psi (690 bar) working pressure. Stainless steel and nylon construction. Connects a Fluke 700HTP-1 or other hydraulic test pump to a unit under test.

Fluke 700PRV-1 Pressure Relief Valve Kit

Has a relief value settable from 725 to 5800 psi (50 to 200 bar) for use with 700HTP-1 Hydraulic Test Pump. ⅛" NPT male thread fits directly into the Fluke 700HTP-1 Pressure Pump.

Charts sold separately; see page 599.

DICKSON

Temperature and Temperature/Humidity Chart Recorders

- Temp. accuracy: ±1.8°F, except 3" chart models are ±2°F

Selectable chart rotation time and temperature range. Flip-up pen arm eases chart and pen changes. Temperature/humidity models have a 0% to 95% RH range; humidity accuracy is ±2% (10 to 60%), ±3% (60 to 95%).

3" Chart—Record temperature ranges in refrigerators, freezers, and incubators, and ambient conditions. Freestanding, wall-mounted, or suspended.

- Dim.: 3.7"L x 3.7"W x 2.3"D

4" Chart—Compact, portable instruments detect and record temperature changes in warehouses, commercial buildings, and critical storage areas.

- Dim.: 5.2"L x 5.2"W x 2.4"D

6" Chart—With probe for remote measurement, except 1NFH8 and 1NFJ2.

- Dim.: 7.56"L x 7.56"W x 3.25"D

8" Chart—Operate on 120VAC with AA battery backup.

- Dim.: 9.2"L x 9.2"W x 3.1"D

DICKSON

4" Chart Pressure Recorder

4" CHART PRESSURE RECORDERS

- Battery operated
- Dim.: 6.25"L x 6"W x 2.9"D
- ¼" NPT connection, nut not required

Instruments provide 7-day or 24-hr. pressure records for water, gas, and utility pipes. RH range: 0% to 95% noncondensing. Include pen and AA battery.

8" CHART UNIVERSAL INPUT RECORDER

- 120VAC
- Dim.: 9.2"L x 9.2"W x 3.1"D
- Input range: 0 to 20mA, 4 to 20mA 0 to 5VDC, 1 to 5VDC

Remote sensing capability for voltage or current transmitters. Features selectable output and recording times. High/Low alarms and Min./Max. readings. Charts sold separately. Includes pen and AC adapter.

DISPOSABLE TEMPERATURE RECORDERS

- Self-contained power source
- Operating range: 0% to 95% RH (noncondensing)
- Dim.: 5.5"L x 4.12"W x 2.5"D

Suitable for proving the integrity of shipments with temperature-critical storage parameters. Include Document of Shipping sheet and mounting tape.

Water Damage Restoration Kit

EXTECH INSTRUMENTS

Tools for taking detailed measurements of moisture levels under baseboards, between walls, and in hardwood and plywood subfloors. Includes pinless moisture meter, pocket moisture meter, and precision hygrothermometer.

Description	Mfr. Model	Item No.
Water Damage Restoration Kit	MO280-KW	**2TKT8**

Infrared Thermometer Terminology

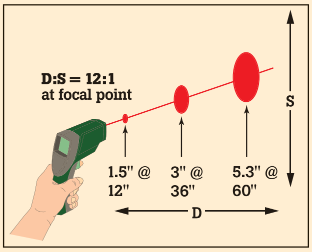
Noncontact IR thermometers determine temperature using thermal radiation from the object(s) being tested.

Focus Spot Size and Distance—Indicates the diameter measured at a given distance from the object. For example, 1" @ 12" indicates that a thermometer focuses on a 1"-dia. spot 12" from the thermometer.

Emissivity—A surface's ability to give off infrared radiation relative to a black body, which theoretically emits at 100% or 1.0. Material and surface texture affect emissivity. For example, a given polished metal may have an emissivity value of 0.20 and wood a value of 0.95. IR thermometer selection may consider whether a surface/immersion probe is required for adjustments to emissivity.

1-Dot Laser Sighting—A laser pointer identifies the target area.

2-Dot/Convergence/Dual Laser Sighting—2 lasers converge to a single point; a 1"-dia. around that point is the measurement area.



Focus Spot Size and Distance

Convergence

FLUKE.

Infrared Thermometers

Bright laser provides precise targeting.

Fluke 59 Max/59 Max+

- Temperature measurement to 662°F (20AZ68) and 932°F (20AZ69)
- Distance to spot ratio: 8:1 for 20AZ68, 10:1 for 20AZ69
- 1P40 rated

Small and lightweight design for easy portability.

Fluke 59 Max
20AZ68

Fluke 64 Max
54DD62

Fluke 62 Max/62 Max+/64 Max

- High-temperature measurement to 932°F (16X949) and 1112°F (16X950 and 54DD62)
- IP54 dust- and water-resistant
- 3m drop-tested
- Distance to spot ratio: 20:1

Lightweight mini IR thermometers are designed for a natural hand fit. Large backlit LCD shows Min./Max./Avg./Dif. 16X950 employs dual-rotating lasers to identify the target.

Fluke 561

- High-temperature measurement to 1022°F
- Noncontact and contact measurement
- 3 emissivity settings

Bright laser provides precise targeting. Easy scroll-through menu. 20Z193 displays thermocouple temperature readings.

Fluke 561
1PEK8

Fluke 566/568

- High-temperature measurement to 1470°F
- Noncontact and contact measurement
- Continuous trending and data logging

Include a hard case for maximum protection.

Fluke 566/568
2DPJ1

Fluke 572-2

- High-temperature measurement to 1652°F
- Distance to spot ratio: 60:1

Rugged, ergonomic design for tough environments. Dual laser sighting for fast, accurate targeting.

Fluke 572-2
29TJ26

FLUKE FLUKE CONNECT

Wireless Temperature Module

Versatile K-type thermocouple thermometer wirelessly relays measurements to other Fluke Connect-enabled test tools. Designed to detect temperature differences between 3 phases in ⅓ the time of previous methods. Sends data to your laptop and goes from logging to analysis and diagnosis. Records over time to monitor circuit load changes for an hour, a shift, or a week.

Find more thermal imagers for troubleshooting, diagnostic, and reporting applications on Grainger.com®.

Why Use Infrared?

Infrared thermography is the only diagnostic technology that helps you instantly visualize and verify thermal performance, detect potential electrical faults, and find hidden sources of water or air leaks. Thermal imaging cameras let you find problems and quantify them with precise noncontact temperature measurements. Use thermal images to document issues and your repairs, and to create professional reports to help you verify your work.

Professional Infrared Cameras

Spot Infrared Camera

Personal Infrared Camera

Thermal Imaging Camera for Smartphones

FLIR

Imagers attach to your smartphone to transform it into a powerful infrared camera. Features such as spot measurement tools, adjustable temperature controls, and a range of color palettes help pinpoint surface temperature differentials so you can identify potential problems. FLIR proprietary Multi Spectral Dynamic Imaging (MSX) enhancement adds visible spectrum detail, while VividIR image processing offers a 4X boost in resolution and clarity. The FLIR OneFit adjustable connector extends up to 4mm to fit many popular protective cases.

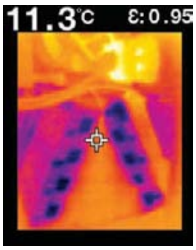
ELECTRICAL Warm Electrical Breaker and Normal Load



HVAC Compressor Coils and Fan Motors

Automotive Hot Break Rotors

Spot Infrared Cameras

FLIR

- Imaging enhances single-spot measurements
- IR detector resolution: 4800 pixels (60 x 80)
- 2" TFT color LCD (176 x 220 pixels)
- Laser pointer
- Adjustable emissivity
- Pistol grip style

Rugged, easy-to-use point-and-shoot cameras help reduce diagnostic time and simplify repair and maintenance operations. Quickly find hidden hot and cold spots for instant troubleshooting in commercial electrical, facility maintenance, HVAC, and similar applications. A spot temperature laser indicator instantly shows what's hot and where to aim; once you find a trouble spot, record images to show customers and include in reports.

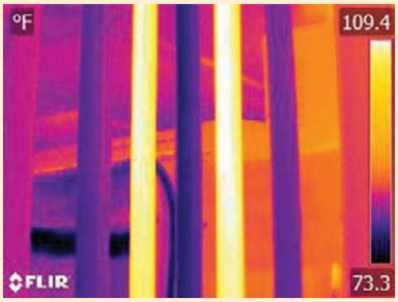
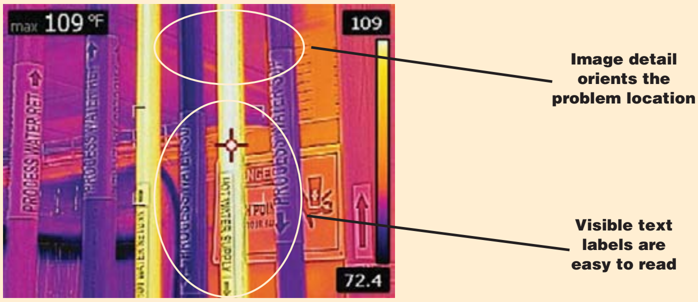
MSX Technology Makes Infrared Imaging Affordable for Everyday Use

Multispectral dynamic imaging (MSX) makes it easier to interpret an infrared image by adding visual-spectrum detail—eliminating the need to refer back to a visual image. Visible edges are detected and added to the infrared image for extraordinary infrared detail that instantly highlights and orients problem locations. Text becomes clearly visible to read labels or identifiers within the image.



Hot Water Transfer Without MSX



Hot Water Transfer Pipes With MSX

The infrared images shown are for illustrative purposes only, and may not have been taken by the camera series depicted.

E4, E5, E6, and E8 Infrared Cameras with Wi-Fi Connectivity

22UL83

- With MSX Enhancement
- IR detector resolution up to 76,800 pixels (320 x 240)
- On-board 640 x 480 digital camera
- 3" color LCD
- Easy to use; weigh only 1.27 lb.

Diagnostic instruments capture and store simultaneous infrared (IR), visual, and MSX-enhanced image data as radiometric JPEGs. Feature spot measurement mode and blending function (Fusion).

Each includes FLIR Tools reporting software, USB cable, power supply/charger with 4 plugs, hard carrying case, and swappable rechargeable battery. NIST Certified model includes calibration certificate.

Enhanced features on E6 and E8 models include level/span picture-in-picture image and area box measurement mode. E8 model also includes an extra battery and external battery charger.

Advanced Features for Commercial and Industrial Thermography

MPEG-4 and video streaming to Apple® and Android™ mobile devices; video recording to SD card

METERLiNK™-enabled to send data to Infrared Camera

High-resolution touch screen

E Series Wireless Professional Infrared Cameras with MSX

5 MP Digital Camera | LED Lamp | Laser Pointer

- METERLiNK enabled
- 5 MP digital camera with LED lamp
- 4" high-contrast touch-screen color LCD
- Simultaneous IR and visual image storage (MSX)
- GPS automatically tags images

Higher performing point-and-shoot imagers have 30 Hz image frequency to capture moving targets. They feature radiometric IR video streaming (MPEG-4). Professional analysis software package integrates seamlessly with the camera for easy downloads, quick reporting, and camera firmware updates in the field. Connect wirelessly to an Apple or Android mobile device to instantly send infrared images or reports via email. Each includes SD card, USB cables, universal power adapter, 2 rechargeable batteries, battery charger with power supply, and hard carrying case.

Industrial/Predictive Maintenance— Cameras offer superior resolution and range performance needed to quickly identify hot spots and discover potential points of failure in electrical distribution and mechanical systems.

Building Diagnostic/Restoration— Cameras offer superior sensitivity to detect even subtle indications of building deficiencies and moisture intrusion.

MPEG-4 and video streaming to Apple® and Android™ mobile devices; video recording to SD card

Infrared Guided Measurement (IGM) Technology

IGM-enhanced tools use thermal imaging to quickly pinpoint potential problems, to help you work faster and get on to the next job.

DM166 Imaging DMM—Feature-packed multimeter is ideal for troubleshooting and diagnosing complex issues in high- and low-voltage applications.

MR160 Imaging Moisture Meter—The thermal imaging sensor helps you quickly see temperature patterns associated with possible hidden moisture, so you know the best place to put the meter probe to capture accurate readings. For details, see Grainger.com®.

MR176 Imaging Moisture Meter—As you seek hidden moisture, IGM and an integrated laser and crosshair mark the precise spot for further testing and investigation. For details, see Grainger.com®.

T Series High-Performance Infrared Cameras with MSX

FLIR

- Auto and manual focus

Articulating thermal imagers have quick-capture mode and intuitive, easy-to-use touchscreen controls. Rigorous inspection requirements are aided by high-performance features: voice, text, and drawn comments annotate images. FOV Match automatically adjusts the digital camera field of view to the IR image field. Compass adds the camera-pointing direction to every image.

Professional reporting software manages large amounts of images and data before generating reports. The imagers can stream video via Wi-Fi direct to an Apple or Android mobile device for field analysis, reporting, and collaboration via PDF or email.

Each includes 25° lens, lens cap, 2-bay charger, FLIR Tools analysis software, video and USB cables, SD memory card, Bluetooth headset (T1K Series), hand strap, neck strap, hard carrying case, power supply, and 2 rechargeable batteries.

Building Diagnostic/Restoration models have built-in RH/dew point alarm that displays areas with risk of surface condensation where mold could occur, and an insulation alarm to identify areas that don't fulfill insulation requirements.

Industrial/Predictive Maintenance models provide wide temperature ranges that meet the needs of thermographers conducting electrical and mechanical inspections.

T500 Series—Lightweight cameras feature maximum flexibility and efficiency for both builidng and industrial applications.

- IR detector resolution: up to 161,472 pixels (464 x 348)
- UltraMax super resolution using FLIR Tools software
- 5 MP digital camera with built-in LED light
- 4" touchscreen color LCD
- Built-in microphone and speaker
- Laser distance meter with area measurement
- Meterlink enabled

T1000 Series—Provide the highest resolution to measure small targets from long distances. Interchangeable and articulating lenses. Flexible ergonomics allow the lens to be pointed to the target and the display or viewfinder tilted to your eye.

- 1% accuracy within limited temperature range
- IR detector resolution: 786,432 pixels (1024 x 768)
- UltraMax resolution: 3,145,728 pixels (2048 x 1536)
- FLIR's Precision Point True HD lenses with ultrasonic motor
- FLIR's Precision Point HD optics together with 1K resolution provide unmatched temperature accuracy of small targets from a distance
- 4.3" touchscreen color LCD

FLIR

- Detector resolution: 640 x 480 pixels
- Field of view: 12.5° horizontal x 12.5° vertical
- Auto and manual focus
- Include (2) batteries, (3) USB cables, power supplies, SD card, hard case and lanyard

Designed to help electric utility and other thermography professionals survey equipment both indoors or outdoors and seek out signs of failure. An integrated eyepiece viewfinder and a bright 4-inch color LCD display make it easy to conduct inspections outside in bright, challenging light conditions. 180° rotating lens platform and ergonomic design helps diagnose failing components in hard-to-reach areas.

FLIR

K Series Thermal Imaging Cameras

- Dropproof to 6.5 ft./2m
- Easy-to-use in a firefighter's gloved hand

Expanded lineup of thermal imaging cameras (TICs) features Flexible Scene Enhancement (FSX) to give you sharp, detailed views of firefighting scenes, from inside, outside, and above the fire—even through thick smoke.

FLIR K1, K2, K33, and K53 Powerful TICs—Standard-issue TICs designed for every firehouse. Provide each crew member with an affordable camera so everyone has the essentials for working faster and safer.

FLIR K45, K55, and K65 High-Performance TICs—High-performance cameras with FSX enhancement offer detailed, rich imagery on a large, bright 4" LCD. Navigate the smokiest environments and instantly distinguish people, room features, and make critical decisions in the field.

IR windows support safe infrared image capture and NFPA compliance with FLIR or competitive cameras

Visible light is clearly transmitted to capture visual as well as infrared images (LED lamps recommended)

IR windows can be used indoors or outdoors and support Laser LocatIR targeting

Infrared Inspection Windows

FLIR

- Broadband crystal is compatible with all infrared cameras and UV, visual, and fusion inspections
- Can be mounted on steel and Lexan panels
- Indoor and outdoor use

Constructed to make thermographic inspection of energized electrical systems as fast and safe as possible, without added expense. Arc-resistant to protect against arc flash incidents. Visible light is transmitted clearly for image capture, although LED lamps are recommended for optimal results. Laser LocatIR targeting is supported for precise data collection.

Each is complete with IR window in an aluminum or stainless steel frame with a hinged cover and calcium fluoride lens. PIRma-lock installation system secures the window assembly safely in place. Permanent identification can be marked on the integrated label area for reference. Limited lifetime warranty against manufacturer defects.

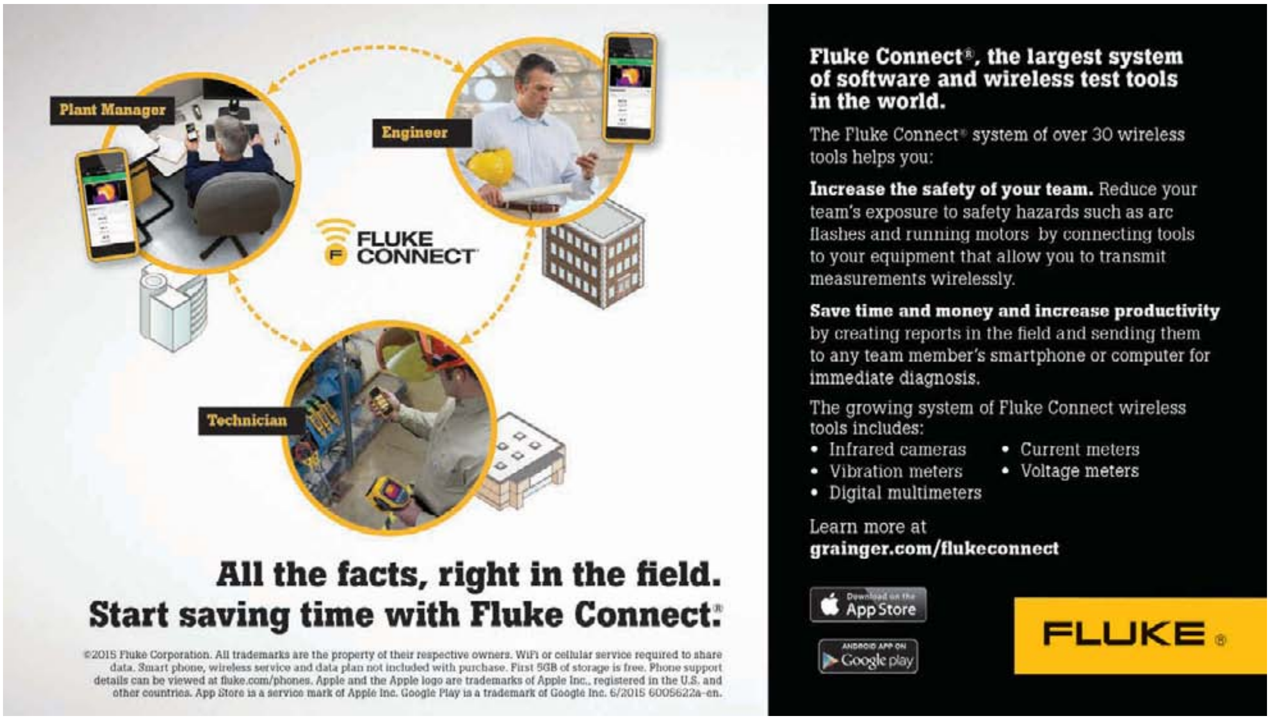
Fluke Connect® the largest system of software and wireless test tools in the world



Twice the Resolution with Rugged Versatility

Get **improved resolution** that delivers the right image quality you need to make the proper diagnosis with up to 2.5 times more pixels and 70% better D:S (compared to the Fluke Ti125 Infrared Camera).

IR-Fusion Technology
The instant blending of visible light and infrared, along with Picture-in-Picture mode, easily reveal both problem and location.

Reduce the amount of time it takes to get an in-focus image with manual or point-and-shoot fixed focus options.

IR-Fusion vs. Picture-In-Picture

IR-Fusion technology is the precise alignment of the infrared and digital images taken by a Fluke IR camera to quickly and accurately troubleshoot a scene by fusing the infrared and digital images. This powerful functionality is the basis for Fluke's AutoBlend mode, which allows adjustable transparency of the infrared image, thereby facilitating easy documentation and communication of the problem spot.

FLUKE.

Fixed Location Infrared Cameras

780AY9

Cameras are designed to be permanently installed and have an output designed to be viewed on a computer or monitor. Instruments use a single detector that, by itself, is limited to measuring the temperature at only one point.

Thermal Imager and Infrared Inspection Windows

Panel Mounted Thermal Imager—Imager incorporates dual vision; thermal and visual cameras which capture fully radiometric data every second. Log into the imager remotely and inspect your electrical assets from your office using its on board web server or using the dedicated MONITIR software.

Infrared Inspection Windows—Intelligent inspection windows provide protected access to help comply with NFPA 70E safety standards. Embedded RFID tag and barcode communicate with CorDEX CONNECT-enabled devices and smartphones to automatically correct for transmission loss. Unlimited voltage range. NEMA Type 3, 12, 4 and IP65 for indoor and outdoor use.

- Broadband crystal operates with any visual, IR, or ultraviolet camera
- Spring-loaded cover; ¼ turn to open

EXTECH INSTRUMENTS FLIR

High-Definition Videoscope Inspection Cameras with Advanced Capabilities

HDV600 Series video borescopes have a large, high-definition color TFT LCD monitor that delivers 640 x 480-pixel images and video. Meter is waterproof (IP67) and camera head with cable is waterproof (IP57). 1 GB SD memory card stores up to 14,600 images or up to 4 hr. of video with voice annotation. AV output for viewing images and video on a monitor. USB port allows data transfer to PC.

Select preconfigured system with camera and cable, or choose monitor-only 6RAX5 and pair with optional cameras (sold separately) for custom configuration. Each HDV600 Series unit includes AC adapter, USB and AV cables, case, and rechargeable lithium polymer battery.

6DWX0 and 6DWU9—Articulating camera head adjusts up to 240° with easy knob control. Allows viewing in obstructed areas where standard camera cannot access. 6DWU9 camera control has built-in wireless to transmit inspection results up to 32 ft.

HD Articulating VideoScope Kit—Articulating 5.5mm camera tip facilitates viewing in obstructed areas where standard camera tips cannot access. Images and videos are viewed on the large high resolution color display and can be stored on the SD memory card (included).

Cameras with Cable and Camera Heads—5.5mm and 5.8mm borescope Cameras have flexible cables and QVGA resolution. 25mm borescope Camera Heads feature heavy-duty fiberglass cable for long distances; VGA resolution.

Videoscope Inspection Cameras with Advanced Capabilities

GENERAL®

Video borescopes employ water-, oil-, and dustproof IP67 probes for inspection and maintenance in a broad range of industrial, government, military, security, infrastructure, construction, aircraft, automotive, diesel, HVAC/R, oil/power/petroleum, and metalworking applications.

Color 3.5" LCD delivers still images and video. Footage can be viewed live, or recorded in still or video format and output to a monitor or PC. Record video up to 3 hr.

LED lamps in viewing tip adjust for precise illumination. Multilanguage onscreen menu adapts to location. 1.5X zoom. Powered by rechargeable Li-ion battery.

Each includes main monitor console, probe, SD card, tip accessories, USB and AV cables, carrying case, and rechargeable battery.

8D202 comes with a flexible, obedient probe that holds its configured shape.

6FAW2 is equipped with an articulating probe whose tip can bend in a ±150º sweep with thumbwheel control: Great for precision inspection in confined spaces.

Accessories—Specialty probes make a video borescope more versatile. Soft metal probes slide through pipes more easily. VGA probes with antireflection and light boost are great for inspecting very dark areas or equipment with shiny surfaces.

For Use With DCS1700, DCS1800, Mfr. Model No. DCS1600		
VGA Resolution Soft Metal Probe Lit by 6 LEDs with Anti-Reflection, Light Boost and 90° Image Rotation, 5.5mm Dia, 3.3 ft. long	P16181HP	**34E658**
For Use With DCS1700, Mfr. Model No. DCS1600		
VGA Resolution Articulating Soft Metal Probe Lit by 5 LEDs with ±150° Sweep, Anti-Reflection, Light Boost and 90° Image Rotation, 5.5mm Dia, 3.3 ft. long	P16HPART	**34E657**

Inspection Cameras

Extech 55RV89—Lightweight video borescope features detachable color TFT LCD for clear imaging. IP67 waterproof. Includes LED lamps. Complete with 2½-ft. flexible gooseneck cable, extension tools, batteries, and a soft carrying case.

Extech 5CVT1—Detachable, wireless color 3.5" LCD monitor. Borescope can also transmit date-stamped video and still images up to 32 ft. to any monitor with a video jack. 2 LED lamps. IP67 waterproof. Includes flexible cable, extension tools, micro SD card with adapter, USB and video interconnect cables, AC adapter, and case.

Milwaukee 40KJ35 and 40KJ38—Recordable inspection cameras can send high-quality 640 x 480 images and video to the 3.5" wireless LCD monitor from up to 30 ft. away, and save them on included 8GB SD card for later review. Use the 3-ft. cable option for complete control of the camera head and faster positioning. 40KJ38 has a 270° pivoting camera head for better visiblity.

Carbon Monoxide Meters

AMPROBE

4FKR1—Displays CO level; adjustable alarm for alerts at 25 to 200 ppm.

BACHARACH

31LA88 and Kit 31LA89—Monoxor Plus continuous sampling monitor measures ambient or flue gas CO between 0 and 2000 ppm in 1 ppm increments. Trend graph shows real-time readings.

EXTECH INSTRUMENTS

4FB71—Has stabilized electromechanical gas-specific sensor.

404K03—Displays CO level; adjustable alarm for alerts at 25 to 200 ppm.

UEI TEST INSTRUMENTS

8EWU2—3-color warning light and audible alarm. Backlit LCD, Max. Hold, and low-battery indicator.
